The History of French Literature on Film Kate Griffiths, Andrew Watts, 2020-12-24 French novels plays poems and short stories however temporally or culturally distant from us continue to be incarnated and reincarnated on cinema screens across the world From the silent films of Georges Melies to the Hollywood production of Gustave Flaubert's Madame Bovary directed by Sophie Barthes The History of French Literature on Film explores the key films directors and movements that have shaped the adaptation of works by French authors since the end of the 19th century Across six chapters Griffiths and Watts examine the factors that have driven this vibrant adaptive industry as filmmakers have turned to literature in search of commercial profits cultural legitimacy and stories rich in dramatic potential The volume also explains how the work of theorists from a variety of disciplines literary theory translation theory adaptation theory can help to deepen both our understanding and our appreciation of literary adaptation as a creative practice Finally this volume seeks to make

clear that adaptation is never a simple transcription of an earlier literary work. It is always simultaneously an adaptation of the society and era for which it is created. Adaptations of French literature are thus not only valuable artistic artefacts in their own right, so too are they important historical documents which testify to the values and tastes of their own time.

Psychology of Technology V.K. Kool, Rita Agrawal, 2016-12-23. This unique treatise expands on the philosophy of technology to argue for a psychology of technology based on the complex relationships between psychology, biology, and technology, especially in the light of our relationships with our digital devices, our online lives, and our human experience. Drawing from disciplines ranging from philosophy and evolution to cognition and neuroscience, it examines myriad aspects of the brain's creative development, the cognitive sensory and motor processes that enable technological progress and its resulting efficiencies and deficiencies, along with our discomforts and pleasures. These experiences are key to behavioral and affective processes in technology, manifest in such diverse phenomena as multitasking, the shift in tech design from ergonomics to hedonomics, and the many types of online problem behaviors. Through these rich pages, readers can understand more deeply the history and future of human adjustment and adaptation in an environment intertwined with technology and with the ascendancy of video games and virtual reality, new conceptions of the human self. Among the topics covered: Could we have remained a tech-devoid society? Technology, ergonomics, and the non-executive functions of our body. New directions in brain-computer interface. From avatars and agents to virtual reality technology. On measuring affective responses to objects. Psychology, technology, ethics, and culture. A timely lens on a field that will grow in importance as it shapes our existence. *Psychology of Technology* will be read and discussed by not only psychologists, social scientists, and behavioral scientists, but also by technology designers and developers, and those in biotechnology.

Remakes and Remaking Rüdiger Heinze, Lucia Krämer, 2015-02-15. From *Avatar* to danced versions of *Romeo and Juliet*, from Bollywood films to *Star Wars* Uncut. This book investigates film remakes as well as forms of remaking in other media such as ballet and internet fan art. The case studies introduce readers to a variety of texts and remaking practices from different cultural spheres. The essays also discuss forms of remaking in relation to neighbouring phenomena like the sequel, prequel, and re-adaptation. *Remakes and Remaking* thus provides a necessary and topical addition to the recent conceptual scholarship on intermediality, transmediality, and adaptation.

Niche Tactics Caroline O'Donnell, 2015-04-10. *Niche Tactics* aligns architecture's relationship with site with its ecological analogue, the relationship between an organism and its environment. Bracketed

Informative and thought provoking the book demonstrates how this enormously popular series of secular myths used images of racial and ecological crisis to respond to events like the Cold War the race riots of the 1960s the Civil Rights movement the Black Power movement and the Vietnam War The work utilizes interviews with key filmmakers and close readings of the five Apes films and two television series to trace the development of the series theme of racial conflict in the context of the shifting ideologies of race during the sixties and seventies The book also observes that today amid growing concerns over race relations the resurgent popularity of Apes and Twentieth Century Fox s upcoming film may again make Planet of the Apes a pop culture phenomenon that asks who we are and where we are going Instructors considering this book for use in a course may request an examination copy here *Mediating Vulnerability* Anneleen Masschelein ,Florian Mussnug,Jennifer Rushworth,2021-11-25 *Mediating Vulnerability* examines vulnerability from a range of connected perspectives It responds to the vulnerability of species their extinction but also their transformation This tension between extreme danger and creativity is played out in literary studies through the pressures the discipline brings to bear on its own categories particularly those of genre Extinction and preservation on the one hand transformation adaptation and re mediation on the other These two poles inform our comparative and interdisciplinary project The volume is situated within the particular intercultural and intermedial context of contemporary cultural representation Vulnerability is explored as a site of potential destruction human as well as animal but also as a site of potential openness This is the first book to bring vulnerability studies into dialogue with media and genre studies It is organised in four sections Human Animal Violence Resistance Image Narrative and Medium Genre Each chapter considers the intersection of vulnerability and genre from a comparative perspective bringing together a team of international contributors and editors The book is in dialogue with the reflections of Judith Butler and others on vulnerability and it questions categories of genre through an interdisciplinary engagement with different representational forms including digital culture graphic novels video games photography and TV series in addition to novels and short stories It offers new readings of high profile contemporary authors of fiction including Margaret Atwood and Cormac McCarthy as well as bringing lesser known figures to the fore *The Evolution of the Planet of the Apes: Race, Politics, and Film* Pasquale De Marco, The Planet of the Apes franchise is one of the most iconic and enduring in cinema history Since the release of the original film in 1968 the series has captivated audiences worldwide inspiring countless sequels prequels television shows and other merchandise At the heart of the Planet of the Apes enduring appeal lies its ability to tap into the zeitgeist of the times reflecting the social and political issues that resonate with audiences The original film released at the height of the civil rights movement and the Vietnam War deftly explored themes of race prejudice and the human condition earning critical acclaim and becoming a box office success The subsequent films in the franchise have continued to grapple with these complex issues while also introducing new layers of commentary on topics such as environmentalism the rise of technology and the nature of humanity itself The reboot series launched in 2011 has brought the franchise to a new

generation of viewers while remaining faithful to the core themes that have made it so enduring.
