Cognitive Lexicography Carolin Ostermann, 2015-07-31 English lexicography and linguistics have always shared close ties, yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature. This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features. After a short survey of the history and practice of English monolingual learner lexicography, as well as an outline of the relationship between linguistics and lexicography, three new dictionary features are developed. They cover three different cognitive semantic theories as well as three different parts

of the monolingual dictionary entry each time for a new set of lexemes Frame semantics conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns a new defining structure for emotion terms and a new microstructural arrangement for particle entries Dictionary analyses on all as well as user studies on two of the features complement these suggestions The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language *Introduction to Cognitive Pragmatics* Klaus-Uwe Panther, 2022-03-15 This textbook is designed for advanced graduate and postgraduate students and will also be of interest to scholars It blends a cognitive linguistic approach to language and language use with insights from contemporary pragmatics the ultimate aim being to advance a unified model of cognitive pragmatics Basic themes in cognitive linguistics and pragmatics are covered ranging from figurative language and thought e.g. conceptual metaphor and metonymy the role of inferencing in the construction of meaning in particular indirect speech acts to the conceptual and functional motivation of morphosyntactic structure Finally the book offers many suggestions and ideas for student papers as well as larger research projects that promise to reveal new insights into conceptual structure communicative function and their influence on the grammatical structure of language **Applying Cognitive Linguistics**
