Benedek, Gary H. Wynn, 2016-08-03 The number of individuals diagnosed with posttraumatic stress disorder has

increased in the past decade not only in the military and veteran population but within the civilian population as well. Traditional treatments such as pharmacotherapy and psychotherapy have provided less than ideal results proving to be less effective when used alone to treat the disorder. Complementary and Alternative Medicine for PTSD supplements these traditional treatments using new and effective techniques to fill the therapeutic void. The alternative therapies covered include acceptance and commitment therapy, acupuncture, alternative pharmacology, canine assistive therapy, family focused interventions, internet and computer based therapy, meditation techniques, mobile applications, recreational therapy, resilience training, transcranial magnetic stimulation, virtual reality exposure therapy, and yoga. Each chapter delivers the most up to date understanding of neurobiology, best practices, and key points for clinicians and patients considering inclusion of these treatments in patient care. Drs. David Benedek and Gary Wynn offer insight into the future of complementary and alternative medicine, shining a light onto how these techniques fit into clinical practice to create the most beneficial treatments for the patient. This book is both an essential resource and practical guide to everyday clinical interactions. It is a necessary addition to the medical library for students and senior clinicians alike.

North American Monarch Butterfly Ecology and Conservation Jay E. Diffendorfer, Wayne E. Thogmartin, Ryan G. Drum, 2020-10-23. This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series; they are collections of at least ten articles all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings, and historical advances in a hot research area. Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Bearing Capacity of Roads, Railways and Airfields Andreas Loizos, Imad Al-Qadi, Tom Scarpas, 2017-07-20. Bearing Capacity of Roads, Railways and Airfields includes the contributions to the 10th International Conference on the Bearing Capacity of Roads, Railways and Airfields (BCRRA 2017), 28-30 June 2017, Athens, Greece. The papers cover aspects related to materials, laboratory testing, design, construction, maintenance, and management systems of transport infrastructure, and focus on roads, railways, and airfields. Additional aspects that concern new materials and characterization, alternative rehabilitation techniques, technological advances, as well as pavement and railway track substructure sustainability, are included. The contributions discuss new concepts and innovative solutions and are concentrated but not limited on the following topics: Unbound aggregate materials and soil properties; Bound materials characteristics, mechanical properties, and testing; Effect of traffic loading; In situ measurements, techniques, and monitoring; Structural evaluation; Pavement serviceability condition; Rehabilitation and maintenance issues; Geophysical assessment; Stabilization and reinforcement; Performance modeling; Environmental challenges; Life cycle assessment and sustainability. Bearing Capacity of Roads, Railways and Airfields is essential reading for academics and professionals involved or interested in transport infrastructure systems, in particular.

roads railways and airfields **Cataract Surgery** Jorge L. Alió,H. Burkhard Dick,Robert H. Osher,2022-07-27 This book provides a comprehensive approach to the specialty of cataract surgery Chapters are authored by an international group of experts who evaluate technology recommend surgical technique and review the management of both anticipated and unexpected complications With more than 30 chapters everyday challenges such as the white mature and uveitic cataract are included while the most difficult cases like the loose lens posterior polar aniridic and the traumatic cataract are covered in detail The editors have also included topics like IOL repositioning and exchange Cataract Surgery Advanced Techniques for Complex and Complicated Cases offers the reader an encyclopedic collection of invaluable lessons that will help both the surgeon who is early in his career as well as the veteran cataract surgeon *The Psychometrics of Standard Setting* Mark D. Reckase,2023-01-31 This book provides a unifying structure for the activities that fall under the process typically called standard setting on tests of proficiency Standard setting refers to the methodology used to identify performance standards on tests of proficiency The results from standard setting studies are critical for supporting the use of many types of tests The process is frequently applied to educational psychological licensure certification and other types of tests and examination systems The literature on procedures for standard setting is extensive but the methodology for standard setting has evolved in a haphazard way over many decades without a unifying theory to support the evaluation of the methods and the validation of inferences made from the standards This book provides a framework for going beyond specific standard setting methods to gain an understanding of the goals for the methods and how to evaluate whether the goals have been achieved The unifying structure provided in this book considers policy that calls for the existence of performance standards the relationship of proficiency test design to the policy and tasks assigned to subject matter experts to help them convert the policy to estimates of locations on the reporting score scale for the test The book provides guidance on how to connect the psychometric aspects of the standard setting process to the intentions of policy makers as expressed in policy statements Furthermore the structure is used to support validity arguments for inferences made when using standards Examples are provided to show how the unifying structure can be used to evaluate and improve standard setting methodology Strategies to Improve Cardiac Arrest Survival Institute of Medicine,Board on Health Sciences Policy,Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions,2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age race ethnicity or gender at any time in any location often without warning Cardiac arrest is the third leading cause of death in the United States following cancer and heart disease Four out of five cardiac arrests occur in the home and more than 90 percent of individuals with cardiac arrest die before reaching the hospital First and foremost cardiac arrest treatment is a community issue local resources and personnel must provide appropriate high quality care to save the life of a community member Time between onset of arrest and provision of care is fundamental and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest Specific actions can be implemented now to decrease this time

and recent advances in science could lead to new discoveries in the causes of and treatments for cardiac arrest. However, specific barriers must first be addressed. *Strategies to Improve Cardiac Arrest Survival* examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of *Strategies to Improve Cardiac Arrest Survival* provide high priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States. Shifting Mobility Dewan Masud Karim, 2023-12-01. In the face of resource depletion, environmental changes, lifestyle changes, demographic and digital adaptation, old ideologies of city building and expensive and complex automobility solutions are in freefall. These changes are creating severe friction between the old and new paradigms. This book provides new perspectives through the process of ideological disassociation and concepts of human mobility code. The basic premise of the book: human mobility is an essential component of our creativity that comes from our unconscious desire to become a part of a community. Several new concepts in the book start with the hallmark of new discovery of human mobility code and its implications of urban mobility boundary systems to stay within safe planetary zone. A new discovery of human mobility code from comprehensive research findings prove that each individual develops a unique mobility footprint and becomes our mobility identity. Beyond individual hallmarks, human develops collective mobility codes through interaction with the third space on which entire mobility systems lie and are created by the fundamentals of city planning and the design process. Readers are introduced to an innovative mobility planning process and reinvention of multimodal mobility approaches based on new mobility code while formulating new concepts, practical solutions, and implementation techniques, tools, policies, and processes to reinforce low carbon mobility options while addressing social equity, environmental, and health benefits. Finally, the book arms us with knowledge to prevent the disaster of full technological enlightenment against our natural human mobility code.
