Morality Jonathan Sacks,2020-09-01 A distinguished religious leader s stirring case for reconstructing a shared framework of virtues and values With liberal democracy embattled public discourse grown toxic family life breaking down and drug abuse and depression on the rise many fear what the future holds In Morality respected faith leader and public intellectual Jonathan Sacks traces today s crisis to our loss of a strong shared moral code and our elevation of self interest over the common good We have outsourced morality to the market and the state but neither is capable of showing us how to live Sacks leads readers from ancient Greece to the Enlightenment to the present day to show that there is no liberty without morality and no freedom without responsibility arguing that we all must play our part in rebuilding a common moral foundation A major work of moral philosophy Morality is an inspiring vision of a world in which we can all find our place and face the future without fear

Disbelief Will M. Gervais,2024-07-30 Does God exist This straightforward question has spawned endless debate ranging from apologists supposed proofs of God s existence to New Atheist manifestos declaring

belief in God a harmful delusion In *Disbelief* Will M Gervais PhD a global leader in the psychological study of atheism shows that the ubiquity of religious belief and the peculiarities of atheism are connected pieces in the puzzle of human nature It is undeniable that religion is a core tenet of human nature It is also true that our overwhelmingly religious species is also as atheistic as it has ever been Yet no scientific understanding of religion is complete without accounting for those who actively do not believe In this refreshing and revelatory book Gervais argues that religion is not an evolutionary puzzle so much as two evolutionary puzzles that can only be solved together First is the Puzzle of Faith the puzzle of how Homo sapiens and Homo sapiens alone came to be a religious species Second is the Puzzle of Atheism how disbelief in gods can exist within our uniquely religious species The result is a radically cohesive theory of both faith and atheism showing how we became a uniquely religious species and why many are now abandoning their belief Through a firsthand account of breakthroughs in the scientific study of atheism including key findings from cognitive science cultural evolution and evolutionary psychology *Disbelief* forces a rethinking of the prevailing theories of religion and reminds both believers and atheists of the shared psychologies that set them on their distinct religious trajectories In casual prose and with compelling examples Gervais explains how we became religious why we're leaving faith behind and how we can get along with others across the religious divides we've culturally evolved

Cultural Evolution Kevin McCaffree, 2022-03-14 Since the dawn of social science theorists have debated how and why societies appear to change develop and evolve Today this question is pursued by scholars across many different disciplines and our understanding of these dynamics has grown markedly Yet there remain important areas of disagreement and debate what is the difference between societal change development and evolution What specific aspects of cultures change develop or evolve and why Do societies change develop or evolve in particular ways perhaps according to cycles or stages or in response to survival necessities How do different disciplines from sociology to anthropology to psychology and economics approach these questions This book provides complex and nuanced answers to these and many other questions First the book invites readers to consider the broad landscape of societal dynamics across human history beginning with humanity's origins in small nomadic bands of hunter gatherers through to the emergence of post industrial democracies Then the book provides a tour of several prominent existing theories of cultural change development and evolution Approaches to explaining cultural dynamics will be discussed across disciplines and schools of thought from meme theories to established cumulative cultural evolutionary theories to newly emerging theories on cultural tightness looseness The book concludes with a call for theoretical integration and a frank discussion of some of the most unexamined structures that drive cultural dynamics across schools of thought

Look Around George R. Sinclair Jr., 2020-07-08 What do you see when you look around Where does it lead and to what end Is there some purpose to it all And if so where do you fit in And how might we fit in together Maybe you have a faith but desire greater understanding Maybe you had a faith and are disillusioned Or maybe you want a faith but are skeptical This book invites another look It begins a conversation Who is God What is faith What does God want from us Why suffering Why worship Why work Through these and other everyday questions this book suggests possible answers Answers don't arrest thought Answers provoke thought and action life This book invites readers to look around so that they might discover a faith for the twenty first century a faith in conversation with science a faith fit for deep personal questions a faith ready to engage complex public issues Like Moses on Mount Pisgah wondering about a land he could see but never enter when looking around we may be awakened to hope

The Naturalness of Belief Charles Taliaferro, Paul Copan, 2018-11-13 Despite its name naturalism as a world view turns out to be rather unnatural in its strict and more consistent form of materialism and determinism This is why a number of naturalists opt for a broadened version that includes objective moral values intrinsic human dignity consciousness beauty personal agency and the like But in doing so broad naturalism begins to look more like theism As many strict naturalists recognize broad naturalism must borrow from the metaphysical resources of a theistic world view in which such features are very natural common sensical and quite at home in a theistic framework The Naturalness of Belief begins with a naturalistic philosopher's own perspective of naturalism and naturalness The remaining chapters take a multifaceted approach in showing theism's naturalness and greater explanatory power They examine not only rational reasons for theism's ability to account for consciousness intentionality beauty human dignity free will rationality and knowledge they also look at common sensical existential psychological and cultural reasons in addition to the insights of the cognitive science of religion

Evolution, Development and Complexity Georgi Yordanov Georgiev, John M. Smart, Claudio L. Flores Martinez, Michael E. Price, 2019-06-25 This book explores the universe and its subsystems from the three lenses of evolutionary contingent developmental predictable and complex adaptive processes at all scales It draws from prolific experts within the academic disciplines of complexity science physical science information and computer science theoretical and evo devo biology cosmology astrobiology evolutionary theory developmental theory and philosophy The chapters come from a Satellite Meeting Evolution Development and Complexity EDC hosted at the Conference on Complex Systems in Cancun 2017 The contributions have been peer reviewed and contributors from outside the conference were invited to submit chapters to ensure full coverage of the topics This book explores many issues within the field of EDC such as the interaction of evolutionary stochasticity and developmental determinism in biological systems and what they might teach us about these twin processes in other complex systems This text will appeal to students and

Command and Persuade Peter Baldwin, 2023-05-02 Why when we have been largely socialized into good behavior are there more laws that govern our behavior than ever before? Levels of violent crime have been in a steady decline for centuries for millennia even. Over the past five hundred years, homicide rates have decreased a hundred fold. We live in a time that is more orderly and peaceful than ever before in human history. Why then does fear of crime dominate modern politics? Why when we have been largely socialized into good behavior are there more laws that govern our behavior than ever before? In *Command and Persuade*, Peter Baldwin examines the evolution of the state's role in crime and punishment over three thousand years. Baldwin explains that the involvement of the state in law enforcement and crime prevention is relatively recent. In ancient Greece, those struck by lightning were assumed to have been punished by Zeus. In the Hebrew Bible, God was judge, jury, and prosecutor when Cain killed Abel. As the state's power as lawgiver grew, more laws governed behavior than ever before. The sum total of prohibited behavior has grown continuously. At the same time, as family, community, and church exerted their influences, we have become better behaved and more law-abiding. Even as the state stands as the socializer of last resort, it also defines through law the terrain on which we are schooled into acceptable behavior.

Darwin's Roadmap to the Curriculum Glenn Geher, David Sloan Wilson, Hadassah Head, Andrew Gallup, 2019-05-01 There is a paradox when it comes to Darwinian ideas within the academy. On one hand, Darwin's theories have famously changed the foundational ideas related to the origins of life, shaping entire disciplines in the biological sciences. On the other hand, people in educated societies across the globe today are famously misinformed and uneducated about Darwinian principles and ideas. Applications of evolutionary theory outside the traditional areas of biology have been slow to progress, and scholars doing such work regularly run into all kinds of political backlash. However, a slow but steady push to advance the teaching of evolution across academic disciplines has been under way for more than a decade. This book serves to integrate the vast literature in the interdisciplinary field of Evolutionary Studies (EvoS), providing clear examples of how evolutionary concepts relate to all facets of life. Further, this book provides chapters dedicated to the processes associated with an EvoS education, including examples of how an interdisciplinary approach to evolutionary theory has been implemented successfully at various colleges, universities, and degree programs. This book also offers chapters outlining a variety of applications to an evolution education, including improved sustainable development, medical practices, and creative and critical thinking skills.

Exploring controversies surrounding evolution education this volume provides a roadmap to asking and answering Darwinian questions across all areas of intellectual inquiry **A Multidisciplinary Approach to Pandemics** Philippe

Bourbeau, Jean-Michel Marcoux, Brooke A. Ackerly, 2022 This edited volume provides a comparative analysis of the ways in which pandemics are theorized and studied across several disciplines The Bible, Homer, and the Search for Meaning in Ancient Myths John Heath, 2019-04-29 The Bible Homer and the Search for Meaning in Ancient Myths explores and compares the most influential sets of divine myths in Western culture the Homeric pantheon and Yahweh the God of the Old Testament Heath argues that not only does the God of the Old Testament bear a striking resemblance to the Olympians but also that the Homeric system rejected by the Judeo Christian tradition offers a better model for the human condition The universe depicted by Homer and populated by his gods is one that creates a unique and powerful responsibility almost directly counter to that evoked by the Bible for humans to discover ethical norms accept death as a necessary human limit develop compassion to mitigate a tragic existence appreciate frankly both the glory and dangers of sex and embrace and respond courageously to an indifferent universe that was clearly not designed for human dominion Heath builds on recent work in biblical and classical studies to examine the contemporary value of mythical deities Judeo Christian theologians over the millennia have tried to explain away Yahweh s Olympian nature while dismissing the Homeric deities for the same reason Greek philosophers abandoned them they don t live up to preconceptions of what a deity should be In particular the Homeric gods are disappointingly plural anthropomorphic and amoral at best But Heath argues that Homer s polytheistic apparatus challenges us to live meaningfully without any help from the divine In other words to live well in Homer s tragic world an insight gleaned by Achilles the hero of the Iliad one must live as if there were no gods at all The Bible Homer and the Search for Meaning in Ancient Myths should change the conversation academics in classics biblical studies theology and philosophy have especially between disciplines about the gods of early Greek epic while reframing on a more popular level the discussion of the role of ancient myth in shaping a thoughtful life **Death Anxiety and Religious Belief** Jonathan

Jong, Jamin Halberstadt, 2016-08-25 There are no atheists in foxholes or so we hear The thought that the fear of death motivates religious belief has been around since the earliest speculations about the origins of religion There are hints of this idea in the ancient world but the theory achieves prominence in the works of Enlightenment critics and Victorian theorists of religion and has been further developed by contemporary cognitive scientists Why do people believe in gods Because they fear death Yet despite the abiding appeal of this simple hypothesis there has not been a systematic attempt to evaluate its central claims and the assumptions underlying them Do human beings fear death If so who fears death more religious or nonreligious people Do reminders of our mortality really motivate religious belief Do religious beliefs actually provide comfort against the inevitability of death In Death Anxiety and Religious Belief Jonathan Jong and Jamin Halberstadt begin to answer these questions drawing on the extensive literature on the psychology of death anxiety and religious belief from

childhood to the point of death as well as their own experimental research on conscious and unconscious fear and faith In the course of their investigations they consider the history of ideas about religion s origins challenges of psychological measurement and the very nature of emotion and belief The Epistemology of Spirit Beliefs Hans Van Eyghen,2023-04-14 This book assesses whether belief in spirits is epistemically justified It presents two arguments in support of the existence of spirits and arguments that experiences of various sorts perceptions mediumship possession and animistic experiences can lend justification to spirit beliefs Most work in philosophy of religion exclusively deals with the existence of God or the epistemic status of belief in God Spirit beliefs are often regarded as aberrations and the falsity of such beliefs is often assumed This book argues that various beliefs concerning spirits can be regarded as justified when they are rooted in experiences that are not defeated It argues that spirit beliefs are not defeated by recent theories put forth by neuroscientists cognitive scientists or evolutionary biologists Additional arguments are made that traditional theistic belief is epistemically linked to spirit beliefs and that unusual events can be explained in terms of spirit activity The book draws on theistic arguments phenomenal conservatism and defenses of religious experiences to argue for the justification of spirit beliefs The arguments draw on examples from various religious traditions ranging from Christianity and Islam to Haitian Vodou and Tibetan Bon The Epistemology of Spirit Beliefs will be of interest to researchers and advanced students working in philosophy of religion religious epistemology ethnography and cognitive neuroscience The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution NonCommercial CC BY NC 4 0 International license **Framing** Mikael Klintman,2025-02-11 A smart incisive toolkit for understanding how the framing of information influences the way we see the world In today s chaotic media landscape working out who and what to believe is a daunting task Lies and misinformation are only part of the problem often the way a story is presented has just as much effect on us as what the story is In Framing sociologist Mikael Klintman offers a cutting edge toolkit for exposing and analysing the rhetoric that saturates our everyday lives Combining insights from the social sciences economics and evolutionary biology he lays out a four part approach to understanding how information is framed for us built around the key elements of texture temperature position and size Demonstrating this approach through an array of real world examples from climate change denial to the subtle messaging of caviar ads Klintman reveals how canny communicators mislead us without relying on overt deception At the same time he probes the deeper evolutionary and cultural roots of our susceptibility to frames **What Is Religion?** Aaron W. Hughes,Russell T. McCutcheon,2021-10-08 Controversies over how to define the word religion have persisted for decades culminating in those who now choose to study the word itself and not just what it is said to name What is Religion Debating the Academic Study of Religion invites readers to eavesdrop on scholarly debates over the limits of and uses for a word commonly used but infrequently defined in a precise manner This volume takes the temperature of the modern field of Religious Studies by inviting a diverse group of international scholars to offer their own
