**Economy, One Competitive Strategy?** Andrea M. Herrmann, 2008-12-18 This book examines how firms adapt to the pressures of increasing international competition by testing the arguments on strategy specialization proposed in the competitiveness literature in general and by contributors to the varieties of capitalism debate in particular If different economies are characterized by distinct institutional arrangements successful firms would be those that exploit the related comparative advantages and specialize in the competitive strategies facilitated by national institutions One Political Economy One Competitive Strategy begins with an assessment of how many pharmaceutical firms in Germany Italy and the UK pursue strategies facilitated by national institutions governing the financial markets antitrust activities and the labour market Quantitative analyses reveal that deviant firms competing through institutionally unsupported strategies outnumber conforming firms by far Not only does this finding run counter to the expectations of the competitiveness literature it brings up a whole new line of inquiry How can firms compete through strategies that are not supported by national institutions The book addresses this question and illustrates that firms do not necessarily exploit comparative institutional advantages but that they can also circumvent institutional constraints International markets and individual collaboration on a contractual basis allow firms to compete despite comparative institutional disadvantages These findings suggest that trade liberalization does not lead to strategy specialization but to strategy diversification depending on the inventiveness of entrepreneurs to develop individual approaches to compete **The city trip guide for Rostock (Germany)** YouGuide Ltd, [Doing](#)

**Husserl and Heidegger on Being in the World** Søren Overgaard, 2004-04-30 It is a study of the phenomenological philosophies of Husserl and Heidegger Through a critical discussion including practically all previously published English and German literature on the subject the aim is to present a thorough and evenhanded account of the relation between the two The book provides a detailed presentation of their respective projects and methods and examines several of their key phenomenological analyses centering on the phenomenon of being in the world It offers new perspectives on Husserlian and Heideggerian phenomenology e g concerning the importance of Husserl s phenomenology of the body the relationship between the Husserlian concept of constitution and Heidegger s notion of transcendence as well as in its argument that being designates the central phenomenon for both phenomenologists Though the study sacrifices nothing in terms of argumentative rigor or interpretative detail it is written in such a way as to be accessible and rewarding to non specialists and specialists alike

The Rare Find George Anders, 2011-10-18 One of the nation s biggest music labels briefly signed Taylor Swift to a contract but let her go because she didn t seem worth more than 15 000 a year At least four book publishers passed on the first Harry Potter novel rather than pay J K Rowling a 5 000 advance And the same pattern happens in nearly every business Anyone who recruits talent faces the same basic challenge whether we work for a big company a new start up a Hollywood studio a hospital or the Green Berets We all wonder how to tell the really outstanding prospects from the ones who look great on paper but then fail on the job Or equally important how to spot the ones who don t look so good on paper but might still deliver extraordinary performance Over the past few decades technology has made recruiting in all fields vastly more sophisticated Gut instincts have yielded to benchmarks If we want elaborate dossiers on candidates we can gather facts and video by the gigabyte And yet the results are just as spotty as they were in the age of the rotary phone George Anders sought out the world s savviest talent judges to see what they do differently from the rest of us He reveals how the U S Army finds soldiers with the character to be in Special Forces without asking them to fire a single bullet He takes us to an elite basketball tournament in South Carolina where the best scouts watch the game in a radically different way from the casual fan He talks to researchers who are reinventing the process of hiring Fortune 500 CEOs Drawing on the best advice of these and other talent masters Anders reveals powerful ideas you can apply to your own hiring For instance

Don't ignore the jagged résumé people whose background appears to teeter on the edge between success and failure. Such people can do spectacular work in the right settings where their strengths dramatically outweigh their flaws. Look extra hard for talent that whispers the obscure out of the way candidates who most scouting systems overlook. Be careful with talent that shouts the spectacular but brash candidates who might have trouble with loyalty, motivation, and team spirit. Each field that Anders explores has its own lingo, customs, and history. But the specific stories fit together into a bigger mosaic. In any field, there's an art to clearing away the clutter and focusing on what matters most. It's not necessarily hard, but it requires the courage to take a different approach in pursuit of the rare find.

**The Interception of Vessels on the High Seas**  
Efthymios Papastavridis, 2014-08-28  
The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty-first century. This right is considered the most significant exception to the fundamental principle of the freedom of the high seas, the freedom in peacetime to remain free of interference by ships of another flag. It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea, particularly the trafficking of narcotics and smuggling of migrants. The author questions whether the principle of non-interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans. The book begins with an historical and theoretical examination of the framework underlying interception. This historical survey informs the remainder of the work, which then looks at the legal framework of the right of visit, contemporary challenges to the traditional right of non-interference on the high seas for the maintenance of international peace and security, interferences to maintain the bon usage of the oceans, navigation and fishing, piracy, *jure gentium* and current counter-piracy operations off the coast of Somalia, the problems posed by illegal, unregulated and unreported fishing, interdiction operations to counter drug and people trafficking, and recent interception operations in the Mediterranean Sea organised by FRONTEX.

**Methods, Moments, and Ethnographic Spaces in Asia**  
Nayantara Sheoran Appleton, Caroline Bennett, 2021-04-15  
Asia is changing. Socio-political shifts in the world economy, technological advances of monumental scales, movements of people and ideas alongside ongoing post-colonization projects across the region have created an emerging Asia, one confident and assertive of its place in the contemporary geopolitical sphere. As political and economic powers reassert Asian sovereignty in opposition to perceived Northern dominance and dramatic and rapid development in the region, shift the relationship between the centre and the periphery, new renderings and imaginations of hierarchies of identity and power come to the fore. This changing environment leads to emerging challenges for anthropologists working in the region, both those who have been working there for years and new scholars entering the field. This volume considers these changes and the implications of this on our practice. By focusing on Asia as a site of enquiry, the contributors to this book discuss tensions and opportunities arising in their ethnographic fieldwork in light of a changing Asia. Drawing on personal reflections on Asia's global positioning in this

contemporary moment the contributors consider how fieldwork is being negotiated within the changing dynamics of anthropology in the region This book then is a discussion on the shifting landscape of field sites and the resultant emerging research methodologies and is aimed at those who are already deeply immersed in fieldwork as well as those who are seeking ways to undertake it
