Landmarks Of Texas Architecture Lawrence W Speck:

Landmarks of Texas Architecture Lawrence W. Speck, 1986-06 This selection of twenty of Texas proudest architectural achievements is a tiny sampling of the state's rich but little heralded architectural heritage The visual presentation of these buildings in Richard Payne's insightful photographs is evidence enough to any student of Texas culture that there are deep and meaningful tracks of our civilization in the state's built environment In the stones of the Alamo and the steel and glass of our downtown skyscrapers lie the silent embodiment of who we are and where we have been from the Introduction Texas architecture has never been nor is it likely to be in the future an easily digested whole This collection drawn from the 1983 Texas Society of Architects exhibit *Creating Tomorrow's Heritage* provides a look at twenty of the most interesting responses to the challenges posed by Texas history and geography It reveals that what Texas architecture lacks in cohesiveness it more than compensates for in vitality Variations in circumstance and background coupled with the kind of freedom which heterogeneity breeds have produced a lively climate for architectural development in Texas a place where in the absence of pat answers intriguing questions have been raised The same freedom which has produced a dearth of cohesion has encouraged exploration and invention The same disparities which have made tidy categorization of historical movements or periods difficult have led to some evocative hybrids new and telling syntheses which are genuinely of their place Of interest to anyone who has strolled the Paseo del Rio in San Antonio or admired the dramatically lit State Capitol at night *Landmarks of Texas Architecture* is a book to be looked at and enjoyed a place to start in creating one's own list of architectural favorites Part of the growing interest in Texas history and culture *Landmarks* adds to our understanding of the forces which shaped the Texas of yesterday and will build the Texas of tomorrow [Architecture in Texas](#) Jay C. Henry, 1993 Written in an accessible style Henry's work places Texas architecture in the wider context of American architectural history by tracing the development of building in the state from late Victorian styles and the rise of neoclassicism to the advent of the International Style His work provides a welter of new facts both about the era's buildings and the architects who designed them and he has catalogued and described most of the important landmarks of the period *Southwestern Historical Quarterly* a significant contribution to the study of Texas architecture Drury Blakeley Alexander author of *Texas Homes of the Nineteenth Century* Texas architecture of the twentieth century encompasses a wide range of building styles from an internationally inspired modernism to the Spanish Colonial Revival that recalls Texas earliest European heritage This book is the first comprehensive survey of Texas architecture of the first half of the twentieth century More than just a catalog of buildings and styles the book is a social history of Texas architecture Jay C Henry discusses and illustrates buildings from around the state drawing a majority of his examples from the ten to twelve largest cities and from the work of major architects and firms including C H Page and Brother Trost and Trost Lang and Witchell Sanguinet and Staats Atlee B and Robert M Ayres David Williams and O Neil Ford The majority of buildings he considers are public ones but a separate chapter

Fair Park as the site of the great State Fair of Texas Many of the exhibition structures livestock barns and sports and performance venues built for the fair over the previous 50 years were incorporated into the new layout and design of the exposition The architectural style that was applied to the old and new buildings at Fair Park was described as Texanic a combination of Texas iconography and classical motifs with the more spare streamlined regimen of the moderne style The result was a revelation to the millions of visitors that attended the Texas Centennial Exposition in 1936 [Encyclopedia of Twentieth Century Architecture](#) R.
