the war that was the justification for the dismemberment of great cities by officials engineers and planners This was not the first time that Tunnard had to re evaluate his principles as he had done so in the 1930s in rejecting Arts and Crafts in favour of Modernism This book tracks his changing ideology by reference to his writings his colleagues and his work Christopher Tunnard is one of the most influential figures in Landscape Architecture and his journey is one that still resonates in the discipline today His leading role in first embracing the tenets of Modernism and then moving away from to embrace a more conservationist approach can be seen in the success and impact on the profession of those with whom he worked and taught
