On reconstructing Proto-Bantu grammar Koen Bostoen, Gilles-Maurice de Schryver, Rozenn Guérois, Sara Pacchiarotti, 2023-03-15 This book is about reconstructing the grammar of Proto Bantu the ancestral language at the origin of current day Bantu languages While Bantu is a low level branch of Niger Congo the world s biggest phylum it is still Africa s biggest language family This edited volume attempts to retrieve the phonology morphology and syntax used by the earliest Bantu speakers to communicate with each other discusses methods to do so and looks at issues raised by these academic endeavours It is a collective effort involving a fine mix of junior and senior scholars representing several generations of expert historical comparative Bantu research It is the first systematic approach to Proto Bantu grammar since Meeussen s

Bantu Grammatical Reconstructions 1967 Based on new bodies of evidence from the last five decades most notably from northwestern Bantu languages this book considerably transforms our understanding of Proto Bantu grammar and offers new methodological approaches to Bantu grammatical reconstruction Prose and Poetry through Time Stephen Huebscher,2024-10-02 This is the first major study of the Biblical Hebrew verbal system of a prophetic book It is also the first book length study in over 60 years to focus on how genre affects the Hebrew verbal system It advances a data driven argument that Biblical Hebrew verb forms do not function one way in prose and another way in poetry Lastly the author addresses the diachronic development of Hebrew between the destruction of the First Temple and the writing of the Dead Sea Scrolls *Celtic from the West 3* John T. Koch,Barry Cunliffe,2016-09-01 The Celtic languages and groups called Keltos i.e Celts emerge into our written records at the pre Roman Iron Age The impetus for this book is to explore from the perspectives of three disciplines archaeology genetics and linguistics the background in later European prehistory to these developments There is a traditional scenario according to which Celtic speech and the associated group identity came in to being during the Early Iron Age in the north Alpine zone and then rapidly spread across central and western Europe This idea of Celtogenesis remains deeply entrenched in scholarly and popular thought But it has become increasingly difficult to reconcile with recent discoveries pointing towards origins in the deeper past It should no longer be taken for granted that Atlantic Europe during the 2nd and 3rd millennia BC were pre Celtic or even pre Indo European The explorations in Celtic from the West 3 are drawn together in this spirit continuing two earlier volumes in the influential series Multidisciplinary Approaches to Code Switching Ludmila Isurin,Donald Winford,Kees de Bot,2009-07-10 The volume presents a selection of contributions by leading scholars in the field of code switching In the past the phenomenon of code switching was studied within different subfields of linguistics and they all took their own perspectives on code switching without taking into account findings from other subdisciplines This book raises a question of a much broader multidisciplinary approach to studying the phenomenon of code switching calls for integration of disciplines and illustrates how frameworks from one subfield can be applied to models in another The volume includes survey chapters empirical studies contributions that use empirical data to test new hypotheses about code switching or suggest new approaches and models for the study of code switching and chapters that discuss principles and constraints of code switching and code switching vs transfer The book is easily accessible to anyone who is interested in the phenomenon of code switching in bilinguals **Developing Language and Literacy** Ronit Levie,Amalia Bar-On,Orit Ashkenazi,Elitzur Dattner,Gilad Brandes,2022-10-07 This volume dedicated to Dorit Ravid offers 29 new chapters on the multiple facets of spoken and written language learning and usage from a group of illustrious scholars and scientists focusing on typologically different languages and anchored in a variety of communicative settings The book encompasses five interrelated yet distinct topics One set of studies is in the field of developmental psycholinguistics covering the acquisition of lexical and grammatical categories from toddlerhood to adolescence A second

topic involves a section of studies on the interface of cognition and language with chapters on processing production comprehension teaching and learning language in usage and in historical perspective A third topic involves a theoretical and applied perspectives on the acquisition and development of literacy competence including reading writing spelling and text production A fourth topic brings together an array of studies on social environmental and clinical diversity in language highlighting novel issues in multilingualism immigration language and literacy disorders Finally a section of the volume examines in depth questions in Modern Hebrew linguistics as the home language and launching base of Dorit Ravid s research work
