Language Contact Cornelius Hasselblatt, Bob de Jonge, Muriel Norde, 2010 The study of languages in contact is an ever relevant topic in linguistics especially at present times when increasing globalization leads to a number of new contact situations This volume features ten papers on various aspects of language contact by leading specialists in the field In these papers contact induced change in a wide variety of languages is approached from various perspectives reflecting the current state of affairs in language contact studies The first main theme in the volume is related to the linguistic effects of migration both in the present and in the past and both in the standard language spoken by ethnic minorities and in immigrant languages that are influenced by the standard The second theme concerns border areas a traditional treasure trove for the study of contact phenomena The third theme is about contact effects without physical contact as well as the role played by translators in this process **Language Contact, Colonial Administration, and the Construction of Identity in Ancient Israel** Samuel L. Boyd, 2021-02-15 In *Language Contact Colonial Administration and the Construction of Identity in Ancient Israel* Boyd addresses a long standing critical issue in biblical scholarship how does the production of the Bible relate to its larger historical linguistic and cultural settings in the ancient Near East Using theoretical advances in the study of language contact he examines in detail the sociolinguistic landscape during the Assyrian Babylonian and Achaemenid periods Boyd then places the language and literature of Ezekiel and Isaiah in this sociolinguistic landscape *Language Contact Colonial Administration and the Construction of Identity in Ancient Israel* offers the first book length incorporation of language contact theory with data from the Bible As a result it allows for a reexamination of the nature of contact between

One Speaker, Two Languages Lesley Milroy, Pieter Muysken, 1995-08-17 Code switching the alternating use of several languages by bilingual speakers does not usually indicate lack of competence on the part of the speaker in any of the languages concerned but results from complex bilingual skills The reasons why people switch their codes are as varied as the directions from which linguists approach this issue and raise many sociological psychological and grammatical questions This volume of essays by leading scholars brings together the main strands of current research in four major areas the policy implications of code switching in specific institutional and community settings the perspective of social theory on code switching as a form of speech behaviour in particular social contexts the grammatical analysis of code switching including the factors that constrain switching even within a sentence and the implications of code switching in bilingual processing and development

Grammars in Contact Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04 Languages can be similar in many ways they can resemble each other in categories constructions and meanings and in the actual forms used to express these A shared feature may be based on common genetic origin or result from geographic proximity and borrowing Some aspects of grammar are spread more readily than others The question is which are they When languages are in contact with each other what changes do we expect to occur in their grammatical structures Only an inductively based cross linguistic examination can provide an answer This is what this volume is about The book starts with a typological introduction outlining principles of contact induced change and factors which facilitate diffusion of linguistic traits It is followed by twelve studies of contact induced changes in languages from Amazonia East and West Africa Australia East Timor and the Sinitic domain Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English Basque in contact with Romance languages in Spain and France and language contact in the Balkans All the studies are based on intensive fieldwork and each cast in terms of the typological parameters set out in the introduction The book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology
