Contemporary Perspectives on Research on Child Care in Early Childhood Education Olivia Saracho, 2021-04-01 Child care environments have received extensive

research attention by those interested in understanding how participating in nonparental child care might influence the children's development and learning Throughout the United States US Census Bureau 2011 and Europe Organization for Economic Co operation and Development 2006 a large number of young children are cared for outside of the home by non parental adults Young children's nonparental care is commonly referred to as child care and is provided to children whose ages range from birth to 12 years of age The provision of child care services has become an increasingly important part of early childhood education In fact the United Nations Children's Fund 2019 states that a large majority of children worldwide spend at least some of their week in child care such arrangements include center care family child care in home child care relative child care and supplemental child care Child care researchers have been conducting studies to understand how participating in nonparental child care might influence the children's development and learning outcomes There are more than enough child care studies to make numerous major inferences For example research outcomes show that child care quality seems to be more influential than either the kind of child care or age of admission in determining the children's development and learning The adults child care affects the quality in child care In the environment adults who are caring for the children have the opportunity to effectively assume both nurturing and instructional roles to help young children cultivate their social and cognitive abilities The teachers effectiveness is related to their individual characteristics such as formal education specialized training and the classroom environment However the majority of the studies show that both family and quality of child care have the most significant effects on the children's development and learning Therefore the concept of child care has heavily influenced modern views Researchers scholars and educators are beginning to understand the current foundations based on theoretical frameworks that contribute to the purposes of the child care in the United States and Europe The contents of the child care volume reflect the major shifts in the views of these early childhood researchers scholars and educators in relation to research outcomes on child care its historical roots the role of child care in early childhood education and its relationship to theory research and practice

Early Childhood Curriculum for All Learners Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12 Early Childhood Curriculum for All Learners Integrating Play and Literacy Activities is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills The authors link solid play based research to specific developmentally appropriate practices By combining these two areas the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play In addition the text focuses on socio dramatic play a recently acknowledged essential aspect of child initiated play interactions It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades Implementation of the information presented in this book will enable children to experience a richer transition into primary
