Bilingualism in the Community Rena Torres Cacoullos, Catherine E. Travis, 2018-03-08 Does the use of two languages by bilinguals inevitably bring about grammatical change Does switching between languages serve as a catalyst in such change It is widely held that linguistic code switching inherently promotes grammatical convergence languages becoming more similar to each other through contact evidence for this however remains elusive A model of how to study language contact scientifically Bilingualism in the Community highlights variation patterns in speech using a new bilingual corpus of English and Spanish spontaneously produced by the same speakers Putting forward quantitative diagnostics of grammatical similarity it shows how bilinguals two languages differ from each other aligning with their respective monolingual benchmarks The authors argue that grammatical change through contact is far from a foregone conclusion in bilingual communities where speakers are adept at keeping their languages together yet separate The book is compelling reading for anyone interested in bilingualism and its importance in society
