Catalogue of the General Assembly Library of New Zealand New Zealand. Parliament. Library, 1897 **Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle** Eugène-Emmanuel Viollet-le-Duc, 1861 **Catalogue of the Library of Congress** Library of Congress, 1864 **The Aura of the Word in the Early Age of Print (1450-1600)** Jessica Buskirk, Samuel Mareel, 2017-07-05 Did the invention of movable type change the way that the word was perceived in the early modern period In his groundbreaking essay *The Work of Art in the Age of Mechanical Reproduction* the cultural critic Walter Benjamin argued that reproduction drains the image of its aura by which he means the authority that a work of art obtains from its singularity and its embeddedness in a particular context The central question in *The Aura of the Word in the Early Age of Print 1450 1600* is whether the dissemination of text through print had a similar effect on the status of the word in the early modern period In this volume contributors from a variety of fields look at manifestations of the early modern word in English French Latin Dutch German and Yiddish as entities whose significance derived not simply from their semantic meaning but also from their relationship to their material support to the physical context in which they are located and to the act of writing itself Rather than viewing printed text as functional and lacking in materiality contributors focus on how the placement of a text could affect its meaning and significance The essays also consider the continued vitality of pre printing press kinds of text such as the illuminated manuscript and how new practices such as the veneration of handwriting sprung up in the wake of the invention of movable type **The Home, Nations and Empires, and Ephemeral Exhibition Spaces** Dominique Bauer, Camilla Murgia, 2025-10-01 This book explores ephemeral exhibition spaces between 1750 and 1918 The chapters focus on two related spaces the domestic interior and its imagery and exhibitions and museums that display both national imperial identity and the otherness that lurks beyond a country's borders What is revealed is that the same tension operates in these private and public realms namely that between identification and self projection on the one hand and alienation otherness and objectification on the other In uncovering this the authors show that the self the citizen society and the other are realities that are constantly being asserted defined and objectified This takes place they demonstrate in a ceaseless dynamic of projection versus alienation and intimacy versus distancing *Journal of the Royal Institute of British Architects* , 1897 **Early Secular Effigies in England** Henricus Augustinus Tummers, 2023-08-14

Historiography Industrialization Engineering Sciences Building Materials Building Actors Construction History is still a fairly new and small but quickly evolving field The current trends in Construction History are well reflected in the papers of the present conference Construction History has strong roots in the historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well This is reflected in these conference proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of Construction History Papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences The conference integrates perfectly into the daily work at the Institute for Preservation and Construction History at ETH Zurich Its two chairs the Chair for Building Archaeology and Construction History and the Chair for Construction Heritage and Preservation endeavor to cover the entire field and to bridge the gaps between the different approaches methodologies and disciplines between various centuries as well as technologies learning together and from each other The proceedings of 8ICCH give a representative picture of the state of the art in the field and will serve as a reference point for future studies
