Organizational Change and Strategy David Coghlan, Nicholas S. Rashford, 2006-09-27 This cutting edge text shows how large scale organizational change is in fact a complex iteration of individual team interdepartmental and organization processes whereby each continually and systematically influences the others a topic often neglected by ODC and strategy books Traditionally strategy and organization development and change have occupied different worlds one grounded in the economic and management sciences the other in the applied behavioural sciences In this enlightening text Coghlan and Rashford abridge these two worlds using a framework of organizational levels In this important text the authors here clearly demonstrate how such processes are brought together in an interlevel approach They focus on the involvement of such players as individuals CEO senior managers and others teams senior management team board other teams inter

departmental groups inter team the organization in its external relations This interdepartmental aspect of most organizations is critical to developing and deploying strategic actions yet is often never discussed Exploring both the external and internal discontinuous nature of forces for change this book guides the reader through the intricacies of this highly complex subject Expertly combining theory with practice it will be a valuable book for masters level and advanced undergraduate students and for all those concerned with strategy and change

The Social Cognitive Neuroscience of Leading Organizational Change Robert A. Snyder,2016-03-10 In a very understandable practical and accessible manner this book applies recent groundbreaking findings from behavioral neuroscience to the most complex and vexing challenges in organizations today In particular it addresses managing large scale organizational changes such as mergers and acquisitions providing lessons and tactics that can be usefully applied to in many different settings In addition to discussing successful practices it also identifies the reasons that most past comprehensive long term change projects have failed and unmasks the counterproductive effects of the typical evolutionary or emotion based attempts to change group and individual behavior using neuroscience as its principal tool
