Last Volcano Romance Understand Magnificent:

Mountains of Fire Clive Oppenheimer, 2023-09-27 Meeting with volcanoes around the world a volcanologist interprets their messages for humankind In *Mountains of Fire* Clive Oppenheimer invites readers to stand with him in the shadow of an active volcano Whether he is scaling majestic summits listening to hissing lava at the crater's edge or hunting for the far flung ashes from Earth's greatest eruptions Oppenheimer is an ideal guide offering readers the chance to tag along on the daring seemingly impossible journeys of a volcanologist In his eventful career as a volcanologist and filmmaker Oppenheimer has studied volcanoes around the world He has worked with scientists in North Korea to study Mount Paektu a volcano name sung in national anthems on both sides of the Demilitarized Zone He has crossed the Sahara to reach the fabled Ti roko volcano in the Tibesti Mountains of Chad He spent months camped atop Antarctica's most active volcano Mount Erebus to record the pulse of its lava lake *Mountains of Fire* reveals how volcanic activity is entangled with our climate and environment as well as our economy politics culture and beliefs These adventures and investigations make clear the dual purpose of volcanology both to understand volcanoes for science's sake and to serve the communities endangered and entranced by these mountains of fire

Oceanic Japan Stefan Huebner, Nadin Heé, Ian Jared Miller, William M. Tsutsui, 2024-11-30

Japan's oceans demand our attention. Violent, prolific and changeful, they define life and death on the archipelago, pushing the shore under the rush of tsunamis, charging typhoons, circulating feeding millions and seeding conflicts over territory and resources. And yet, Japan studies remains largely beholden to a terrestrial view of the world that is at odds with the importance of the sea. This terrestrial bias also means that on those occasions when oceans are recognized, they are most often presented as dividers or connectors, spaces in between rather than rich ecologies and meaningful sites. Oceanic Japan is meant to help readers re-envision Japanese history in order to show how the seas created the country that we know today. The book convenes a diverse multinational multidisciplinary group of scholars to expand the scope of Japan studies and the field of environmental humanities. The chapters draw from the broader turn to the sea, characterized by new oceanic and terraqueous perspectives developing within these fields and in areas such as Pacific history and Indian Ocean studies. The volume editors' vision is bifocal. On one hand, they aim to reorient East Asian studies and Japan studies to the sea, underlining how oceans have shaped dynamics from the Tokugawa Era forward into the age of empire and the crisis of the Anthropocene. On the other hand, they argue for a more nuanced environmental approach within the burgeoning field of Oceanic studies. Seeing oceanic spaces as more than entrepôts or political spheres requires thinking in new, often vertical, volumetric ways. The chapters follow human and non-human actors to recognize the variegation of watery ecologies through winds, tides, coasts, seabeds, and currents such as the Kuroshio and Oyashio, which have always shaped life on the archipelago.

Death, Family, and Love Michael H. Mitias, 2020-08-27 What does it mean to die? What is the role of death in human life? The theme of this novel focuses on these two questions in the medium of a duel between the god of death, Mowt, and Dr. Athenaion, a devotee of the god of love. In the course of delineating the duel, the author spotlights the meaning of death as a human phenomenon in the context of a truly loving family. Mowt inflicts several devastating calamities upon Dr. Athenaion, but in spite of this infliction, two love affairs sprout and see the light of day in the Athenaion family.
