The Archaeology of Colonialism Claire L. Lyons, John K. Papadopoulos, 2002 The Archaeology of Colonialism demonstrates how artifacts are not only the residue of social interaction but also instrumental in shaping identities and communities Claire Lyons and John Papadopoulos summarize the complex issues addressed by this collection of essays Four case studies illustrate the use of archaeological artifacts to reconstruct social structures They include ceramic objects from Mesopotamian colonists in fourth millennium Anatolia the Greek influence on early Iberian sculpture and language the influence of architecture on the West African coast and settlements across Punic Sardinia that indicate the blending of cultures The remaining essays look at the roles myth ritual and religion played in forming colonial identities In particular they discuss the cultural middle ground established among Greeks and Etruscans clothing as an instrument of European colonialism in nineteenth century Oceania sixteenth century Andean urban planning and kinship relations and the Dutch East India Company settlement at the Cape of Good Hope

The Strange Death of Moral Britain Christie Davies, In the last half of the twentieth century a once respectable and religious Britain became a seriously violent and dishonest society one in which person and property were at risk family breakdown was ubiquitous and drug and alcohol abuse was rising The Strange Death of Moral Britain demonstrates in detail the roots of Britain's decline It also shows how a society strongly Protestant in both morality and identity became one of the most secular societies in the world The culture wars about abortion capital punishment and homosexuality which have convulsed the United States have little meaning in Britain where there is neither a moral majority nor any indigenous emphasis on rights In the period when Britain had a strong national and religious identity defense of this identity led to legal persecution of male homosexuals As Britain's identity crumbled homosexuality ceased to be an important issue for most people Similarly all the pressing questions on abortion capital punishment and homosexuality were settled permanently on a purely utilitarian basis in Britain where all sources of moral argument are weak The ending of the death penalty marked the decline of the influence of the official hierarchies of church and state the Church of England the armed forces and their representative the Conservative Party The Strange Death of Moral Britain is a study of moral change secularization loss of identity and the growth of deviant behavior in Britain in the twentieth century Based on detailed scholarship it is tightly argued and clearly written with a minimum of jargon It will be of interest to scholars in religious studies and British social history and to a general reading public concerned with timely moral controversies Christie Davies was for eighteen years a professor at the University of Reading England and has been a visiting lecturer in the United States and India He is the author of several books including *The Mirth of Nations* available from Transaction and his articles have appeared in leading academic journals in sociology criminology social history and religious studies among others

Church and State in Old and New Worlds Hilary M. Carey, John Gascoigne, 2010-12-06 Drawing on a diverse range of case studies in both the Old World of Europe and the New World of the European settler societies in the United States Australia and New Zealand this volume offers an original perspective on the conduct of church state relations and how these have

been reshaped by translation from the Old to the New Worlds **Free Will and the Human Sciences in Britain, 1870-1910** Roger Smith, 2015-07-28 From the late nineteenth century onwards religion gave way to science as the dominant force in society This led to a questioning of the principle of free will if the workings of the human mind could be reduced to purely physiological explanations then what place was there for human agency and self improvement Smith takes an in depth look at the problem of free will through the prism of different disciplines Physiology psychology philosophy evolutionary theory ethics history and sociology all played a part in the debates that took place His subtly nuanced navigation through these arguments has much to contribute to our understanding of Victorian and Edwardian science and culture as well as having relevance to current debates on the role of genes in determining behaviour **Identity and Affect** John R. Campbell, Alan Rew, 1999-02-20 When forces of globalisation and local culture converge distinctive social habitats are created Drawing on case studies of South Asian East African Melanesian and European societies Identity and Affect provides a contextual analysis of the formation and expression of local identities and of the affective self constitution of social agents The contributors examine in particular the growing fragmentation of social relations in these areas and the impact this is having on individuals and communities who forced into an increasingly outward orientation are initiating processes of cultural redefinition and social realignment The different effects of colonialism on identity formation are examined in studies of communalism in Sri Lanka untouchables in India cargo cults in New Guinea and the substitution of food exchange for cannibalism in Kaluana Focusing on Italians in London and south Asians in East Africa the formation and experience of belonging to cultural diaspora is explored from the perspective of the individual and the social collectivity The authors conclude with an exploration of some of the defining experiences of modernity specifically how individuals in industrial capitalist societies have come to see their identity as dependent on modern forms of industrial public sector work

Blocker Jr., David M. Fahey, Ian R. Tyrrell, 2003-12-17 A comprehensive encyclopedia on all aspects of the production consumption and social impact of alcohol Alcohol and Temperance in Modern History An International Encyclopedia spans the history of alcohol production and

consumption from the development of distilled spirits and modern manufacturing and distribution methods to the present. Authoritative and unbiased, it brings together the work of hundreds of experts from a variety of disciplines with an emphasis on the extraordinary wealth of scholarship developed in the past several decades. Its nearly 500 alphabetically organized entries range beyond the principal alcoholic beverages and major producers and retailers to explore attitudes toward alcohol in various countries and religions, traditional drinking occasions and rituals, and images of drinking and temperance in art, painting, literature, and drama. Other entries describe international treaties and organizations related to alcohol production and distribution, global consumption patterns, and research and treatment institutions, as well as temperance prohibition and antiprohibitionist efforts worldwide.

The Cultural Work of the Late Nineteenth-Century Hostess S. Harris, 2016-04-30

The Cultural Work of the Late Nineteenth Century Hostess explores the influence well-placed energetic women had on literary and political culture in the U.S. and in England in the years 1870-1920. Fields, an American, was first married to James T. Fields, a prominent Boston publisher; after his death, she became companion to Sarah Orne Jewett, one of the foremost New England writers. Gladstone was a daughter of William Gladstone, one of Great Britain's most famous Prime Ministers. Both became well-known as hostesses entertaining the leading figures of their day; both also kept journals and wrote letters in which they recorded those figures' conversations. Susan K. Harris reads these records to exhibit the impact such women had on the cultural life of their times. The Cultural Work of the Late Nineteenth Century Hostess shows how Fields and Gladstone negotiated alliances with key figures, to their parties' designs, and fought to develop major cultural institutions ranging from the Organization of Boston Charities to London's Royal College of Music.

A History of the Book in America David Paul Nord, Joan Shelley Rubin, Michael Schudson, David D. Hall, 2015-12-01

The fifth volume of *A History of the Book in America* addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period, factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies receive imaginative scrutiny, as well. The *Enduring Book* demonstrates that the corporate consolidations of the last half century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures.

Native American Higher Education in the United States

Cary Carney, 2017-09-08 Many aspects of Native American education have been given extensive attention There are plentiful works on the boarding school program the mission school efforts and other aspects of Indian education Higher education however has received little examination Select articles passages and occasional chapters touch on it but usually only in respect to specific subjects as an adjunct to education in general There is no thorough and comprehensive history of Native American higher education in the United States Native American Higher Education in the United States fills this need and is now available in paperback Carney reviews the historical development of higher education for the Native American community from the age of discovery to the present The author has constructed his book chronologically in three eras the colonial period featuring several efforts at Indian missions in the colonial colleges the federal period when Native American higher education was largely ignored except for sporadic tribal and private efforts and the self determination period highlighted by the recent founding of the tribally controlled colleges Carney also includes a chapter comparing Native American higher education with African American higher education The concluding chapter discusses the current status of Native American higher education Carney's book fills an informational gap while at the same time opening the field of Native American higher education to continuing exploration It will be valuable reading for educators and historians and general readers interested in Native American culture

Crime Scene London Mike Hutton, 2025-04-28 Chronicles London's 1500 year history of crime from poverty driven acts to notorious figures and scandals shaping the city's dark legacy London has a history that emerges from the mist of time some 1500 years ago and is one that evolves yet never ends It has always been a breeding ground for crime as people from around the world are drawn by its numerous attractions and opportunities Each generation has produced its own colourful cast of robbers murderers and fraudsters Much of the crime was prompted by poverty and foul living conditions but the main driver has always been the desire or need for money by whatever means and the risks involved Until the eighteenth century this often involved a trip to perform the Tyburn jig in front of a baying crowd of thousands For a time Londoners staggered around in a gin induced haze Mothers often abandoned or even sold their children just for a chance to block out the horrors of a seething London The lanes and alleys around Covent Garden were lined with prostitutes many still children

Famous beauties were kept by aristocrats and royalty and referred to as courtesans although in many cases the dividing line between them and their less fortunate sisters lining the streets was thin indeed The ending of the Great War saw the appearance of drugs although at this stage they were mainly confined to the rich and influential as London entered the jazz age The second world war and the Blitz was not all about the spirit and bravery of Londoners as gangs plundered wrecked houses and even stole from corpses After the war the likes of the violent Jack Spot and Billy Hill were superseded by the Kray twins and the sadistic Richardson brothers as they fought for control of London s drinking clubs A little light relief was offered throughout the years by a succession of sexual scandals Those particularly welcome involved senior politicians A heady brew indeed covering centuries of crimes and indiscretions brought together this very readable account by author and social historian Mike Hutton **Announcement of the Graduate Division** Iowa State University.
