An Evidence-based Approach to the Treatment and Care of the Older Adult with Cancer Diane G. Cope, Anne M. Reb, 2006 Description The book offers a comprehensive overview of the treatment and care of the older adult with cancer The evidence based practice approach is timely and provides the foundation for nursing practice that is the expected standard of care The use of the case study at the end of each chapter assists the reader in the synthesis and application of the information The book addresses every aspect of the care and treatment of not only the cancer patient but also the family The chapter on complementary therapy is a bonus Purpose The purpose is to focus on the unique aspects of treatment and care that the older adult with cancer requires Addressing the older adult with cancer is of paramount importance to not only the health of the individual but of the family community and society The book meets the author's objectives Audience This is written for all healthcare providers The authors have written a book that can be used by geriatric oncology nurses but it is appropriate for the multidisciplinary team that provides care to the older adult with cancer The authors have the professional background with applicable experience to edit this book Features This book covers more than the care and treatment of cancer in the older adult It provides necessary background information that demonstrates the impact of cancer on the older patient and their significant others The assessment information is useful for both experienced and novice nurses The use of chapter case studies enables healthcare providers to apply the chapter content The use of an evidence based practice approach to delivering healthcare is essential The information allows nurses to use the findings from reviewed research literature in providing the best care for their patients in an efficient manner that also considers patient preferences the risks and the benefits of treatment or lack thereof Assessment This book provides guidance to novice to expert nurses in the treatment and care of the older adult cancer patient using a holistic approach The chapters are well written by authors who are experts in their field The Cochrane Guidelines are considered the gold standard for evaluating research that impacts treatment selection and care of all patients Their use in the reference materials lends credibility to the information that is presented in the book Publisher *Social Dynamics of the Life Course* Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micro/macro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course

theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina
