Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2019-08-22 This book presents the outcomes of the 20th IEEE ACIS International Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD 2019 which was held on July 8-10 2019 in Toyama Japan. The aim of the conference was to bring together researchers and scientists, business people and entrepreneurs, teachers, engineers, computer users and students to discuss the various fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Further, they presented research results on all aspects: theory, applications and tools of computer and information science and discussed the practical challenges encountered in their work and the solutions they adopted to overcome them. The book highlights the best papers from those accepted for presentation at the conference. They were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round 15 of the conference's most promising papers were selected for this Springer SCI book and not the conference proceedings. We eagerly await the important contributions that we know these authors will make to the field of computer and information science.
