From the introduction Here is life on another world in another place another time. Here is what it is like to wear an alien skin. Here are new concepts new vistas magic. Why read science fiction. It's alive in a world of dead art dead minds dead institutions it's a bright eyed irreverent little animal scurrying through a petrified landscape of old dead trees it's unashamedly potent and prolific in a world that grows increasingly weary and sterile it dares to raise its voice in boisterous joy sorrow and anger in a place full of sour silence and dead echoes. Contains these legendary tales: The Oldest Soldier by Fritz Leiber After the Myths Went Home by Robert Silverberg The Stars Below by Ursula K Le Guin Straw by Gene Wolfe On the Gem Planet by Cordwainer Smith Beam Us Home by James Tiptree Jr The Barbarian by Joanna Russ Among the Hairy Earthmen by R A Lafferty Man in the Jar by Damon Knight Old Hundredth by Brian W Aldiss and The Signaller by Keith Roberts. A fine idea for an anthology _ adventures in otherness is really what SF is all about isn't it _ and the stories are a very neat mixture of themes and literary methods and of course a bunch of very fine examples of first class narrative prose an artful and elegant group intelligently chosen. Robert Silverberg Ursula Le Guin's Earthsea John Plotz, 2023-04-15 A book on the experience of reading Ursula Le Guin's Earthsea novels. What makes readers fall in love. You might want to start your answer by explaining Ursula Le Guin. She owned John Plotz at age eight on the overlit and understaffed second floor of the DC library. Four decades and who knows how many re-readings later her Earthsea owns him still. The reasons to love her Earthsea are many. Le Guin sets readers adrift among worlds peripatetic but somehow at home. She sublimely mixes comfort and revelatory emancipatory unsettlement. Ursula Le Guin's Earthsea aims to do justice to both Le Guin's passionate simplicity and her revenant complexity. Small wonder the inspiration she has been for later speculative writers like Neil Gaiman Kim

Stanley Robinson and N K Jemisin The boldness and coldness of the later three books of Earthsea is a revelation In Tehanu Tales from Earthsea and The Other Wind she turned a cold eye a dragon s searching eye back on the comfortable green world she herself had made decades earlier They unfold a distinctive vision of the writer s task worldbuilding as responsibility plus openness Call it invitational realism She builds a world that leaves the real task of building of creating of imagining and of reimagining with her readers Drawing on his own crooked path from a DC childhood to teaching in Prague to San Francisco journalism to graduate school and then parenthood Plotz maps the ways that readers young and old find in Earthsea a kind of scholar s stone a delightfully mutable surface that rewards recurrent contemplation [Ursula K. extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed
