Thought in the Graeco-Roman World Orietta Dora Cordovana, 2024-09-23 The debate that has arisen around the concept of the Anthropocene forms the basis of this book It investigates certain forms of environmental interrelation and ecological sensitivity in the Graeco Roman world The notions of environmental depletion exploitation and loss of plant species and the ancients knowledge of species diversity are the main cores of the research The aim is to interrogate historical sources and diverse evidence and to analyse political and socioeconomic structures according to a reading focused on possible antecedents cultural prodromes alignments of thought or divergencies with respect to major modern environmental problems and current ecological conceptualisations As a result sustainable behaviour biodiversity and its practical uses can also be identified in ancient societies In the context of environmental studies this contribution is placed from the perspective of a historian of antiquity with the aim of outlining the forma mentis and praxis of the ancients with respect to specific environmental issues Ancient civilizations always provided ad hoc solutions for specific emergencies but never developed a

comprehensive ecological culture of environmental protection as in modernity

Jewish Identity and Politics between the Maccabees and Bar Kokhba Benedikt Eckhardt, 2011-10-28 The 300 years between the beginning of Maccabean resistance against Seleucid rule and the end of the Bar Kokhba revolt were formative for the development of Jewish identity in antiquity The frequent political changes from Seleucid to Hasmonean Herodian and Roman rule presented profound challenges to Jewish self understanding Political adjustments were coupled with internal reconfigurations We witness the invention and reinterpretation of rituals the emergence of new religious groups and the use of scripture as argument This volume brings together the perspectives of scholars of different background in order to make use of the multifaceted evidence The interdisciplinary approach leads to a comprehensive picture of the interrelation between identity and politics in this crucial period of ancient Jewish history

A Cultural History of the Senses in Antiquity Jerry Toner, 2014-10-23 The ancient world used the senses to express an enormous range of cultural meanings Indeed the senses were functionally significant in all aspects of ancient life often in ways that were complex and interconnected Antiquity was also a period where the senses were experienced vividly cities stank statues were brightly painted and literature made full use of sensory imagery to create its effects In a steeply hierarchical world with vast differences between the landed wealthy the poor and the slaves the senses played a key role in establishing and maintaining boundaries between social groups but the use of the senses in the ancient world was not static New religions such as Christianity developed their own way of using the senses acquiring unique forms of sensory related symbolism in processes which were slow and often contested The aim of this volume is to provide an overview of these structures and developments and to show how their study can yield a more nuanced understanding of the ancient world A Cultural History of the Senses in Antiquity presents essays on the following topics the social life of the senses urban sensations the senses in the marketplace the senses in religion the senses in philosophy and science medicine and the senses the senses in literature art and the senses and sensory media

Island Practice Pam Belluck, 2013-06-25 With a Foreword by Nathaniel Philbrick author of the bestseller *In the Heart of the Sea* If you need an appendectomy he can do it with a stone scalpel he carved himself If you have a condition nobody can diagnose creeping eruption perhaps he can identify what it is and treat it A baby with toe tourniquet syndrome a human leg that s washed ashore a horse with Lyme disease a narcoleptic falling face first in the street a hermit living underground hardly anything is off limits for Dr Timothy J Lepore This is the spirited true story of a colorful contrarian doctor on the world famous island of Nantucket Thirty miles out to sea in a strikingly offbeat place known for wealthy summer people but also home to independent minded idiosyncratic year rounders Lepore holds the life of the island often quite literally in his hands He s surgeon medical examiner football team doctor tick expert unofficial psychologist accidental homicide detective occasional veterinarian When crisis strikes he s deeply involved

He's treated Jimmy Buffett, Chris Matthews and various Kennedy relatives but he makes house calls for anyone and lets people pay him nothing or anything: oatmeal raisin cookies, a weather-beaten 44 Magnum, a picture of a Nepalese shaman. Lepore can be controversial and contradictory, espousing conservative views while performing abortions and giving patients marijuana cookies. He has unusual hobbies: he's a gun fanatic, roadkill collector and concocter of pastimes like knitting dog hair sweaters. Ultimately, *Island Practice* is about a doctor utterly essential to a community at a time when medicine is increasingly money-driven and impersonal. Can he remain a maverick even as a healthcare chain subsumes his hospital? Every community has or some would say needs a Doctor Lepore, and his island's drive to retain individuality in a cookie-cutter world is echoed across the country. Monica Gillian Clark, 2015-08-03. In *Monica: An Ordinary Saint*, Gillian Clark reconciles competing images of the life and legacy of Augustine's mother, arriving at a woman who was shrewd and enterprising but also meek and gentle.

Bodily Fluids in Antiquity Mark Bradley, Victoria Leonard, Laurence Totelin, 2021-04-26. From ancient Egypt to Imperial Rome, from Greek medicine to early Christianity, this volume examines how human bodily fluids influenced ideas about gender, sexuality, politics, emotions and morality, and how those ideas shaped later European thought. Comprising 24 chapters across seven key themes: language, gender, eroticism, nutrition, dissolution, death and afterlife, this volume investigates bodily fluids in the context of the current sensory turn. It asks fundamental questions about physicality and fluidity: how were bodily fluids categorised and differentiated? How were fluids trapped inside the body perceived, and how did this perception alter when those fluids were externalised? Do ancient approaches complement or challenge our modern sensibilities about bodily fluids? How were religious practices influenced by attitudes towards bodily fluids, and how did religious authorities attempt to regulate or restrict their appearance? Why were some fluids taboo and others cherished? In what ways were bodily fluids gendered? Offering a range of scholarly approaches and voices, this volume explores how ideas about the body and the fluids it contained and externalised are culturally conditioned and ideologically determined. The analysis encompasses the key geographic centres of the ancient Mediterranean basin, including Greece, Rome, Byzantium and Egypt. By taking a longue durée perspective across a richly intertwined set of territories, this collection is the first to provide a comprehensive, wide-ranging study of bodily fluids in the ancient world. *Bodily Fluids in Antiquity* will be of particular interest to academic readers working in the fields of classics and its reception, archaeology, anthropology and ancient to Early Modern history. It will also appeal to more general readers with an interest in the history of the body and history of medicine. The Archaeology and Material Culture of the Babylonian Talmud Markham J. Geller, 2015-11-02. The Babylonian Talmud remains the richest source of information regarding the material culture and lifestyle of the Babylonian Jewish community, with additional data now supplied by Babylonian incantation bowls. Although archaeology has yet to excavate any Jewish sites from Babylonia, information from

Parthian and Sassanian Babylonia provides relevant background information which differs substantially from archaeological finds from the Land of Israel One of the key questions addresses the amount of traffic and general communications between Jewish Babylonia and Israel considering the great distances and hardships of travel involved
