Landscape Balance And Landscape Assessment:

Landscape Balance and Landscape Assessment Rudolf Krönert, 2001-06-11 The book's aim is to present recommendations for sustainable land use and management. The authors follow a hierarchical approach that is inherent in landscape structures and processes as well as in planning practice. During the last decades, landscape ecology has developed tremendously. Future research tendencies are also covered. All methodological approaches are explained with examples from different regions.

Landscape Balance and Landscape Assessment Rudolf Krönert, Uta Steinhardt, Martin Volk, 2013-03-09 During the last decades, landscape ecology has developed tremendously. It concerns both the theoretical basis and practical application. The authors follow a hierarchical approach that is inherent in landscape structures and processes as well as in planning practice. They show first approaches for the inclusion of factors of the landscape balance into planning procedures and new methods. GIS coupled modeling, remote sensing combined with more classical approaches from the basis of landscape assessment. Approaches for multicriterial landscape assessments are also presented. The overall target is to give recommendations for sustainable land use and management. Each chapter concludes with a synthesis of the theme under discussion. Ideas concerning the state of the art are integrated as well as future trends in research. All methodological approaches are explained with examples from differing regions.

Landscapes in the Eastern Mediterranean between the Future and the Past Ioannis N. Vogiatzakis, Theano S. Terkenli, Maria Gabriella Trovato, Nizar Abu-Jaber, 2020-05-15 Landscapes have long been viewed as multifunctional, integrating ecological, economic, sociocultural, historical, and aesthetic dimensions. Landscape science and public awareness in Europe have been progressing in leaps and bounds. The challenges involved in landscape-related issues and fields, however, are multiple and refer to landscape stewardship and protection as well as to the development of comprehensive theoretical and methodological approaches in tandem with public sensitization and participatory governance and in coordination with appropriate top-down planning and policy instruments. Landscape scale approaches are fundamental to the understanding of past and present cultural evolution and are now considered to be an appropriate spatial framework for the analysis of sustainability. Methods and tools of landscape analysis and intervention have also gone a long way since their early development in Europe and the United States. Although significant progress has been made, there remain many issues which are understudied or not investigated at all, at least in a Mediterranean context. This Special Issue addresses the application of landscape theory and practice in the Eastern Mediterranean and mainly but not exclusively reports on the outcomes of an

international conference held in Jordan in December 2015 with the title Landscapes of Eastern Mediterranean Challenges Opportunities Prospects and Accomplishments The focus of this Special Issue landscapes of the Eastern Mediterranean region thus constitutes a timely area of research interest not only because these landscapes have so far been understudied but also as a rich site of strikingly variegated long standing multicultural human environmental interactions These interactions resting on and taking shape through millennia of continuity in tradition have been striving to adapt to technological advances while currently juggling with manifold and multilayered socioeconomic and climate environmental crises

Landscape Modelling and Decision Support Wilfried Mirschel,Vitaly V. Terleev,Karl-Otto Wenkel,2020-03-02 This book contributes to a deeper understanding of landscape and regional modelling in general and its broad range of facets with respect to various landscape parameters It presents model approaches for a number of ecological and socio economic landscape indicators and also describes spatial decision support systems DSS frameworks and model based tools which are prerequisites for deriving sustainable decision and solution strategies for the protection of comprehensively functioning landscapes While it mainly focuses on the latest research findings in regional modelling and DSS in Europe it also highlights the work of scientists from Russia The book is intended for landscape modellers scientists from various fields of landscape research university teaching staff and experts in landscape planning and management landscape conservation and landscape policy

Sustainable Development of Multifunctional Landscapes Katharina Helming,Hubert Wiggering,2013-03-09 New demands on landscapes and natural resources call for multifunctional approaches to land development Tools are required to identify the effects of land management on landscape sustainability and to support the decision making process on the multipurpose utilisation of landscape resources Scientists from across Europe installed the Landscape Tomorrow network to be prepared for new challenges in research to sustainable land development in an international perspective This publication analyses general principles of landscape multifunctionality develops methods to assess the sustainability of agricultural and forestry land management and identifies strategies of sustainable land management Moreover it contributes to the scientific basis for future land development strategies and helps support land use decision making on the political planning and management level

Encyclopedia of Ecology Brian D. Fath,2014-11-03 The groundbreaking Encyclopedia of Ecology provides an authoritative and comprehensive coverage of the complete field of ecology from general to applied It includes over 500 detailed entries structured to provide the user with complete coverage of the core knowledge accessed as intuitively as possible and heavily cross referenced Written by an international team of leading experts this revolutionary encyclopedia will serve as a one stop shop to concise stand alone articles to be used as a point of entry for undergraduate students or as a tool for active researchers looking for the latest information in the field Entries cover a range of topics including Behavioral Ecology Ecological Processes Ecological Modeling Ecological Engineering Ecological Indicators Ecological Informatics Ecosystems Ecotoxicology Evolutionary Ecology General Ecology Global Ecology Human Ecology

Development and Perspectives of Landscape Ecology O. Bastian, Uta Steinhardt, 2002 The book gives a fundamental representation of landscape ecology which proves to be a young but an interesting and very important trans disciplinary science for the solution of environmental problems Both the theoretical basis and practical application of landscape ecology are considered Great value is attached to describe approaches and experiences from Germany and Central Europe and to discuss them in an international context The book is addressed to landscape planners managers conservationists and architects to biologists and geographers to colleges universities authorities and to the general public being interested in ecological issues Among the themes are e g the roots and the position of landscape ecology problems of scale and dimension landscape analysis diagnosis potentials evaluation change prognosis tools like remote sensing and information systems spatial planning and nature conservation

Multifunctional Land Use Ülo Mander, Hubert Wiggering, Katharina Helming, 2007-05-11 Global change land use policies and EU enlargement affect the driving forces for landscape functioning land use management and rural development New demands on landscapes and natural resources call for multifunctional approaches to land development Tools are required to i identify the effects of land management on landscape sustainability and ii support the decision making process on the multipurpose utilisation of landscape resources Scientists from across Europe installed the Landscape Tomorrow network to be prepared for new challenges of research on sustainable land development in a European perspective In this publication they i analyse general principles of land use multifunctionality ii highlight the specific requirements and approaches of implementing multifunctional land use from different disciplinary viewpoints iii report on success stories of multifunctional land use from different geographic and political settings and iv discuss modelling and monitoring approaches to scientifically assess the impact of multifunctional land use implementation The book contributes to the scientific basis for future land development strategies and helps supporting land use decision making on the political planning and management level

Scale Issues in Remote Sensing Qihao Weng, 2014-01-21 Provides up to date developments in the field of remote sensing by assessing scale issues in land surface properties patterns and processes Scale is a fundamental and crucial issue in remote sensing studies and image analysis GIS and remote sensing scientists use various scaling techniques depending on the types of remotely sensed images and geospatial data used Scaling techniques affect image analysis such as object identification and change detection This book offers up to date developments methods and techniques in the field of GIS and remote sensing and features articles from internationally renowned authorities on

three interrelated perspectives of scaling issues scale in land surface properties land surface patterns and land surface processes It also visits and reexamines the fundamental theories of scale and scaling by well known experts who have done substantial research on the topics Edited by a prominent authority in the geographic information science community Scale Issues in Remote Sensing Offers an extensive examination of the fundamental theories of scale issues along with current scaling techniques Studies scale issues from three interrelated perspectives land surface properties patterns and processes Addresses the impact of new frontiers in Earth observation technology high resolution hyperspectral Lidar sensing and their synergy with existing technologies and advances in remote sensing imaging science object oriented image analysis and data fusion Prospects emerging and future trends in remote sensing and their relationship with scale Scale Issues in Remote Sensing is ideal as a professional reference for practicing geographic information scientists and remote sensing engineers as well as supplemental reading for graduate level students

Environmental Monitoring G. Bruce Wiersma, 2004-04-27 The current rate and scale of environmental change around the world makes the detection and understanding of these changes increasingly urgent Subsequently government legislation is focusing on measurable results of environmental programs requiring researchers to employ effective and efficient methods for acquiring high quality data Focusing on pollution issues and impacts resulting from human activities Environmental Monitoring is the first to bring together the conceptual basis behind the complex and specific approaches to the monitoring of air water and land Coverage includes integrated monitoring at the landscape level as well as case studies of existing monitoring programs such as the Chesapeake Bay Program The book also addresses the recent legislative focus on high quality data results and conducting monitoring programs in different ecosystems and environmental media

Applications in Ecological Engineering Sven Erik Jørgensen, 2009-07-25 Ecological engineering involves the design construction and management of ecosystems that have value to both humans and the environment It is a rapidly developing discipline that provides a promising technology to solve environmental problems Ecological Engineering covers the basic theory of ecological engineering as well as the application of these principles in environmental management Provides an overview of the theory and application of environmental engineering International focus and range of ecosystems makes Ecological Engineering an indispensable resource to scientists Based on the best selling Encyclopedia of Ecology Full color figures and tables support the text and aid in understanding

Handbook of Drought and Water Scarcity Saeid Eslamian, Faezeh A. Eslamian, 2017-09-01 This volume includes over 30 chapters written by experts from around the world It examines numerous management strategies for dealing with drought and scarcity These strategies include management approaches for different regions such as coastal urban rural and agricultural areas It offers multiple strategies for monitoring assessing and forecasting drought through the use of remote sensing and GIS tools It also presents drought mitigation management strategies such as groundwater management rainwater harvesting conservations practices and more
