Is Landscape ...? Gareth Doherty, 2015 *Landscape, Heritage and National Identity in Modern Europe* Hans Renes, 2022-10-06 This book describes the way in which landscape and landscape heritage have been and still are used to define national identities It shows how national narratives use different types of landscapes Some nations use nature as their main point of reference partly to circumscribe conflicts between different ethnic groups Other nations use agrarian landscapes that are often described as timeless and rooted Again other nations use history as a major source for defining identities In these cases myths of origins Golden Ages or wars and conflicts deliver the materials for national narratives The final section describes how nation states developed new urban as well as rural landscapes as national showpieces As landscapes are an important but under researched aspect of nation building this book fills a gap in the study of nationalism
