Landscapes Cycles An Environmentalists Journey To Climate Skepticism:

Landscapes & Cycles Jim Steele, 2013-06-01 *Landscapes and cycles* demonstrates why landscape change far more than the levels of carbon dioxide deserve our full attention. *Landscapes and cycles* is easily understood by the layperson. It outlines how to build a more resilient environment and provides the perspective method needed to critically appraise the overzealous catastrophic predictions that dominate the media. It will enlighten anyone concerned about climate change and the fate of endangered species. Page 4 of cover

Doubt and Certainty in Climate Science Alan Longhurst, 2023-03-15 In *Doubt and Certainty in Climate Science* well known oceanographer Alan Longhurst offers a unique vision of climate change and its scientific study. His deep knowledge of oceanographic research, fishery productivity and marine ecological changes over several centuries made him doubt some of the postulates of climate science by scientists working on computers with only a few decades of data. In this book the author reviews what scientists know about climate change, the known unknowns and the unknown unknowns that give rise to uncertainties about future climate change that is causing far reaching social and political change. Longhurst provides an incisive critical review of numerous topics in climate change. Beginning with a review of some regional temperature measurements, he questions the robustness of the leading indicator of climate change, a global average of widely differing measurements of sea and land surface temperature. The book offers unique insights worthy of consideration by those seeking to understand climate change, particularly the important role of the oceans in climate.

CLIMATE CHANGE Jim Hollingsworth, 2020-01-10 *Will the World Really End Unless We Spend Billions on Climate Change Policy*. The people around us are somehow convinced that the world is about to end unless we stop using fossil fuels. There is no scientific evidence to support this. This book explains why this belief is simply not true in terms anyone can understand. Fossil fuels have made America great. This book explains why we need to keep it that way.

Living Dangerously Rick Joyner, 2014-10-16 The issue of climate change is an ongoing debate and it is a crucial issue that will affect us all. *Living Dangerously* is about Rick Joyner's journey to understand climate change and determine if it is real. He learned far more than he expected and the implications are more far reaching than imagined.

Hubris: The Troubling Science, Economics, and Politics of Climate Change Michael Hart, 2015-09-29 The book explores problems and issues that have emerged in national and international discussion of policies to address climate change. It concludes that every solution put forward by the UN and activists poses more problems than might ever emerge from the marginal human impact on natural climate change. Rather than mitigation, governments should focus on adaptation. As is climate change discussions have become captive of a utopian agenda that is using climate change as a stalking horse to drive alarm in the hope that it will convince governments to act.

Madlands Anna Rose, 2012 The co-founder of the Australian Youth Climate Coalition recounts her journey around the world with arch climate skeptic Nick Minchin as they challenged each other's views and provoked each other to confront closely held assumptions The Power of Narrative Raul P. Lejano, Shondel J. Nero, 2020 Introduction Ideology as narrative When skepticism became public Skeptics without borders Unpacking the genetic meta narrative The social construction of climate science Ideological narratives and beyond in a post truth world *Climate* Charles Eisenstein, 2018-09-18 A stirring case for a wholesale reimagining of the framing tactics and goals we employ in our journey to heal from ecological destruction With research and insight Charles Eisenstein details how the quantification of the natural world leads to a lack of integration and our fight mentality With an entire chapter unpacking the climate change denier's point of view he advocates for expanding our exclusive focus on carbon emissions to see the broader picture beyond our short sighted and incomplete approach The rivers forests and creatures of the natural and material world are sacred and valuable in their own right not simply for carbon credits or preventing the extinction of one species versus another After all when you ask someone why they first became an environmentalist they're likely to point to the river they played in the ocean they visited the wild animals they observed or the trees they climbed when they were a kid This refocusing away from impending catastrophe and our inevitable doom cultivates meaningful emotional and psychological connections and provides real actionable steps to caring for the earth Freeing ourselves from a war mentality and seeing the bigger picture of how everything from prison reform to saving the whales can contribute to our planetary ecological health we resist reflexive postures of solution and blame and reach toward the deep place where commitment lives **Climate Change Scepticism** Greg Garrard, Axel Goodbody, George B. Handley, Stephanie Posthumus, 2019-02-07 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Climate Change Scepticism is the first ecocritical study to examine the cultures and rhetoric of climate scepticism in the UK Germany the USA and France Collaboratively written by leading scholars from Europe and North America the book considers climate skeptical texts as literature teasing out differences and challenging stereotypes as a way of overcoming partisan political paralysis on the most important cultural debate of our time **Environmentalism Gone Mad** Alan Carlin, 2015-04-28 Dr Alan Carlin is an economist and physical scientist with degrees from Caltech and MIT and publications in both economics and climate energy who became actively involved in the environmental movement in the 1960s This led to an almost 39 year career as a manager and senior analyst at the U S Environmental Protection Agency In the mid 2000s he began researching the claims by the environmental movement and the UN that the release of carbon dioxide by modern civilization will lead to catastrophic global warming This book is an account of his personal journey of discovery In *Environmentalism Gone Mad* Dr Carlin documents

the dysfunction of the modern environmental movement demonstrating the need of a major course correction to steer it back to reality Environmentalism Gone Mad Alan Carlin, 2015-04-28 Dr Alan Carlin is an economist and physical scientist with degrees from Caltech and MIT and publications in both economics and climate energy who became actively involved in the environmental movement in the 1960s This led to an almost 39 year career as a manager and senior analyst at the U S Environmental Protection Agency In the mid 2000s he began researching the claims by the environmental movement and the UN that the release of carbon dioxide by modern civilization will lead to catastrophic global warming This book is an account of his personal journey of discovery In *Environmentalism Gone Mad* Dr Carlin documents the dysfunction of the modern environmental movement demonstrating the need of a major course correction to steer it back to reality *Environmental Skepticism* Peter Jacques, 2009 Environmental skepticism describes the viewpoint that major environmental problems are either unreal or unimportant This is the first book to analyze the importance of the anti environmental counter movement in world politics and its meaning for democratic and accountable deliberation as well as its importance as a mal adaptive project that hinders the world s people to rise to the challenges of sustainability **Protecting the Planet** Budd Titlow, Mariah Tinger, 2016 An inspirational story of pioneering environmentalists who heightened awareness regarding nature s value and heroes of today who are working to secure a sustainable future *Inside the World of Climate Change Skeptics* Kristin Haltinner, Dilshani Sarathchandra, 2023-03-21 As wildfires rip across the western United States and sea levels rise along coastal cities from Louisiana to Alaska some people nevertheless reject the mainstream scientific consensus on anthropogenic climate change What leads people to doubt or outright denial What leads skeptics to change their minds Drawing from a rich collection of interviews and surveys with self identified climate change skeptics and some former ones sociologists Kristin Haltinner and Dilshani Sarathchandra delve into the underlying dynamics of climate skepticism in the United States In probing how ideas about science religion politics and media affect perceptions of climate change they find a far greater diversity of attitudes and beliefs than one might expect including some pro environmental views With this nuanced understanding of climate change skepticism *Inside the World of Climate Change Skeptics* offers much needed insights on improving communication in ways that can move us toward a better future while advancing environmental policies with widespread political support The Age of Consequences Courtney White, 2015-01-01 Our planet is approaching a critical environmental juncture Across the globe we continue to deplete the five pools of carbon soil wood coal oil and natural gas at an unsustainable rate We ve burned up half the planet s known reserves of oil one trillion barrels in less than a century When these sources of energy rich carbon go into severe decline as they surely will society will follow Former archeologist and Sierra Club activist Courtney White calls this moment the Age of Consequences a time when the worrying consequences of our environmental actions or inaction have begun to raise unavoidable and difficult questions How should we respond What are effective and realistic solutions In exploring these questions White draws on his formidable

complex and often oversimplified issues Engage on a Journey Through the Climate Debate Conclude by engaging with the larger climate debate reflecting on your journey through the book Challenge your own beliefs and the narratives you encounter making informed decisions about the planet's future What do you believe If you've ever questioned what's real and what's exaggerated in the climate change debate a fresh perspective that encourages critical thought and self reflection Understand the climate crisis's complexity and clarify your beliefs amidst overwhelming narratives about the environment

Nowhere Left to Go: How Climate Change Is Driving Species to the Ends of the Earth Benjamin von Brackel, 2022-07-05
Harrowing journeys of animals and plants fleeing skyrocketing temperatures and mega droughts reported from the frontlines of the greatest migration of species since the Ice Age As humans accelerate global warming while laying waste to the environment animals and plants must flee to the margins on scattered nature reserves between major highways or among urban sprawl And when even these places become too hot and inhospitable wildlife is left with only one path to survival an often formidable journey toward the poles as they race to find a new home in a warming world Tropical zones lose their inhabitants beavers settle in Alaska and gigantic shoals of fish disappear just to reappear along foreign coastlines Award winning environmental journalist Benjamin von Brackel traces these awe inspiring journeys and celebrates the remarkable resilience of species around the world But the lengths these plants and animals must go to avoid extinction are as alarming as they are inspirational Sea animals like fish move on average 45 miles a decade to cooler regions while land animals like beavers and butterflies move 11 miles As even the poles of the Earth heat up we're left with a stark and irreversible choice Halt the climate emergency now or face a massive die off of species who are increasingly left with nowhere else to go
