AOP – SOP via overboeking van langetermijnplanning naar LIS/PIS/Capaciteit

- Zie de specificatie 172 – AOP - Sales Quantity Budget and Transfer to SOP voor alle stappen voor het plannen van verkoophoeveelheden.
- De huidige specificatie begint met de overboeking van bevestigde verkoophoeveelheden aan Globale afzet- en productieplanning (SOP). In SOP vindt globale capaciteitsplanning plaats om te controleren of de te verkopen goederen kunnen worden afgehandeld met beperkte middelen van het bedrijf die nodig zijn voor productie.
- Nadat het productieplan door SOP als haalbaar is beschouwd, wordt dit doorgegeven aan een planningscenario in de module Long Term Planning (LTP). In LTP worden geplande onafhankelijke behoeften (PIR) gecreëerd.
- Op basis van deze geplande onafhankelijke behoeften wordt materiaalbehoefteplanning (MRP) gesimuleerd om geplande behoeften te creëren en controleren voor alle artikelen (onderdelen, grondstoffen) en resources. Bij simulatie van MRP kunnen ook de capaciteiten van de vestigingen worden gecontroleerd. Vervolgens kan capaciteitsafstemming worden uitgevoerd om de knelpunten op te lossen.
- Nadat een MRP is uitgevoerd zoals hierboven beschreven, wordt een van de hoofddoelstellingen van het logistieke deel van AOP bereikt: de totale bezetting berekenen van de activiteitsoorten die zijn toegewezen aan de productiewerkplekken die nodig zijn voor de begrote verkoophoeveelheden. De bezetting is gebaseerd op het verbruik van activiteitsoorten die zijn aangegeven in de routings van de producten (halffabrikaten en gereede producten) van het productieplan.

New Perspectives on Investment in Infrastructures G. J. M. Arts, W. Dicke, L. Hancher, 2008 The essays in this bundle analyse the effects on long term investment in different infrastructures and from different perspectives and disciplines

Airline Network Development in Europe and its Implications for Airport Planning Guillaume Burghouwt, 2016-03-23 The ongoing deregulation and liberalization of worldwide air transport markets confronts airport planners with an increasingly problematic context On the one hand the capital intensive large scale and complex airport investments need a detailed long medium term planning of airport infrastructure Such planning requires at least predictable traffic volumes and traffic composition within the planning horizon On the other hand airline route networks are increasingly dynamic structures that frequently show discontinuous changes As a consequence the much more volatile airport traffic restricts the value of detailed traffic forecasts Volatility of airport traffic and its composition requires flexibility of airport strategies and planning processes The book explores this dilemma through a detailed study of airline network development airport connectivity and airport planning in the deregulated EU air transport market The questions the book seeks to answer are how have airlines responded to the regime changes in EU aviation with respect to the configuration of their route networks what has been the impact of the reconfiguration of airline network configurations for the connectivity of EU airports how can airport planners and airport authorities deal with the increasingly uncertain airline network behaviour in Europe

Planning the Impossible Eirini Kasidou, 2021-07-05 International airports have become an inherent part of many urban regions and key transport infrastructures for metropolitan economies Yet they are also a source of tensions often associated with the contrasting impacts of their operation Taking the example of Charles de Gaulle airport CDG in Paris the

author analyzes the factors influencing urban development and the related spatial strategies Step by step she traces the history of the airport examines prominent conflicts and their management by planners and derives broader lessons Intended for town planners policy makers and urban designers the book makes an important contribution to understanding the challenges and assessing the effectiveness of planning approaches for airport regions *Hearing on the Real Estate Crisis* United States. Congress. Senate. Committee on Small Business. Subcommittee on Competitiveness and Economic Opportunity, 1992 **Marketing, de essentie, 7/e** Gary Armstrong, 2006 Outsourcing Planning Jantine Grijzen, 2010 This thesis addresses the wide involvement of consultants in regional spatial planning projects in the Netherlands Although consultants have become important actors in public policy making and media and politics have frequently addressed this as a problem until now the scientific literature has paid little attention to them This thesis shows that the wide involvement of consultants can best be explained from the perspective of increasing problems of coordination and cooperation in Dutch regional spatial planning Planning has become an activity performed by many governments and stakeholders together with overlapping policies expertise and procedures From an external position consultants can act as intermediaries between interdependent actors both by mediating between personal relations as well as by connecting substantive issues Hiring consultants however is also a sign of emptying out governments when governments outsource core tasks like policy articulation and cooperation with other governments they can lose the capability to develop high quality and democratic plans in a complex and interdependent world Theory and Implementation of Economic Models for Sustainable Development J.C. van den Bergh, M.W. Hofkes, 1998-06-30 There is widespread concern for long term environmental issues in relation to economic processes and developments Among the concerned scientists are economists who have taken up the challenge to apply economic insights and tools for the study of long term environment economy interactions and to give the concept of sustainable development economic hands and feet This book presents a pluralistic perspective on efforts problems and successes in this area This collection of papers was originally prepared for an international symposium titled Economic Modelling of Sustainable Development Between Theory and Practice which was hosted by the Vrije Universiteit in Amsterdam on December 20th 1996 The main motivation for this symposium was that the usefulness of the concept of sustainable development for theoretical and applied modelling is still being debated growth theorists resource economists ecological economists policy makers and many others are trying to deal with the concept in various and sometimes conflicting ways The aim of the symposium was to bring together different theoretical and implementational perspectives on modelling for sustainable development We hope that this volume will inform a wide audience about the perspectives and progress in this important area of research as well as stimulate further research notably on applied modelling and practical methods for the analysis of sustainable development at various spatial scales The papers have in due course been revised several times based on comments made by discussants referees and the editors **Modelling Welfare State Reform**

G.M.M. Gelauff, J.J. Graafland, 2014-06-28 In order to analyze the economic effects of various policy proposals for reforming the welfare state a model has been developed called MIMIC The structure of this model is presented in the first part of this book The model combines various modern labour market theories with a detailed description of relevant labour market institutions in an applied general equilibrium context The second part of the volume contains an elaborate presentation of the simulation results of MIMIC such as various tax policies a reduction in benefits or the official minimum wage individualization of the tax and social security system and the introduction of negative income tax The model has proved to be a unique instrument for policy evaluation for the Netherlands

Econometrics of Health Care G. Duru, Jean H. Paul Paelinck, 2012-12-06 Econometrics of Health Care which we have sometimes called medico metrics is a field in full expansion The reasons are numerous our knowledge of quantitative relations in the field of health econometrics is far from being perfect a large number of analytical difficulties combining medical latent factors e.g. and economic facts spatial behaviour e.g. are faced by the research worker medical and pharmaceutical techniques change rapidly medical costs rocket more than proportionally with available resources of being tightened medical budgets are in the process So it is not surprising that the practice of hygieconometrics to produce a neologism is more and more included in the programmes of econometricians The Applied Econometrics Association has devoted to the topic two symposia in less than three years Lyons February 1983 Rotterdam December 1985 without experiencing any difficulties in getting valuable papers on econometrics of risks and medical insurance on the measurement of health status and of efficiency of medical techniques on general models allowing simulation These were the themes for the second meeting but other aspects of medical economic problems had presented themselves already to the analyst medical decision making and its consequences the behaviour of the actors patients and physicians regional medicometrics and what not some of them have been covered by the first meeting Finally in July 1988 took place in Lyons the Fourth International Conference on System Science in Health Care it should not be astonishing

Boordtabellen en business planning , The Law of Groups of Companies Christine Van Den Wyngaert, M Kruithof, 1991-12 The law and regulations governing groups of enterprises have undergone an amazing development during the last ten to twenty years The growing attention paid in legal writing to the specific issues raised by the group phenomenon is a direct consequence of the widespread and increasing utilization of separate legal entities to organize business activities whether in the profit or non profit sector It is increasingly felt that the traditional approach of today's company law does not provide adequate answers for the questions raised by today's enterprise organization Few national regulations have paid specific attention to the growth of groups of companies This does not mean that group law does not exist but rather that it has developed from its roots in judicial case law administrative practice and in many particular provisions of different statutes Legal doctrine has paid a great deal of attention to group

relationships often utilizing material originating from other legal systems At the EEC level a directive on groups of companies has been envisaged but no agreement has been reached on its content The purpose of the research which resulted in the present publication was to document and orient research by everyone interested in the study of the law of groups of enterprises The Law of Groups of Companies systematically classifies the wealth of literature which was thus revealed and makes clear that although formal statutes on groups of companies rarely exist the law has been developing and concepts structures and reasoning have kept the minds of many legal writers active This book is a publication of the Studiecentrum Ondernemingsgroepen Centre d Etude des Groupes d Entreprises **Project Appraisal and Macroeconomic Policy** T.

van der Burg, 2012-12-06 Environmental economics addresses the issues that arise on the boundaries between economic systems and natural systems such as pollution and natural resource depletion and degradation Like any other branch of applied economics it has drawn its tools and techniques from the wide range already available in economics generally selecting adapting and extending these to meet its own particular requirements in its own particular context Here as elsewhere in economics public policy analysis requires quantitative assessments of the economic impact of different policy choices Perhaps the most distinctive contribution of environmental economics has been the development of techniques for the economic valuation of environmental goods and services in the absence of markets for such goods and services or in the presence of markets that are at best imperfect or incomplete Nevertheless policy analysis still relies on one or another of three broad groups of methods used in economics generally One is project appraisal which at the micro level provides an evaluation of the costs and benefits of investment options to inform the choice among them while at the macro level policy analysis rests either on computable general equilibrium CGE models or on economy wide macroeconomic models All models are simplifications designed to focus attention on the important features of the problem at hand and neglecting other features that might for a different problem assume greater importance **De keten uitgedaagd** Remco van Wijk, Niels de Winne, 2014-03-15 Verantwoording is een maatschappelijk vraagstuk van de eerste orde maar ook een bron van groeiende zorg en irritatie voor veel organisaties In 2004 startten het ministerie van Financiën en het ministerie van Justitie een onderzoek naar de mogelijke toepassing van eXtensible Business Reporting Language XBRL als uniforme gegevensstandaard voor verantwoording In 2006 lag er een architectuur voor Standard Business Reporting In 2007 werden de eerste berichten in XBRL via een generieke voorziening succesvol bij de Belastingdienst en de Kamer van Koophandel afgeleverd Eind 2009 werd er serieus ingezet op de grootschalige transitie van informatieketens Sinds 2013 biedt Logius met Standard Business Reporting een werkende en efficiënte standaardoplossing voor massale verantwoording De keten uitgedaagd Besturen en verantwoorden in een wereld vol ICT beschrijft de weg die Standard Business Reporting heeft afgelegd van opgave tot oplossing Specialisten uit de praktijk en wetenschappers geven een gefundeerd en gedetailleerd inzicht in de uitdagingen die komen kijken bij de transitie van informatieketens In haar veelzijdigheid is het boek exemplarisch voor de benodigde
