Applied Linguistics and Politics Christian W. Chun, 2022-02-24 In the current climate of extreme nationalism and fear-mongering, a new politics for a socially just world is needed more than ever. Featuring internationally renowned scholars, Applied Linguistics and Politics explores how innovative theories, methodologies and pedagogies in applied linguistics can address the political challenges and issues arising in the 21st century. Adopting a Gramscian theoretical framework, the five parts of this volume focus on the various ways in which the political is discursively and materially realized in its dialogic co-constructions within the media, the economy, culture and identity, affect and education. Examining the power instantiations of sociolinguistic and semiotic practices in society from a variety of critical perspectives, this book questions how applied linguists can respond to and challenge current discourses of issues such as militarism, nationalism, Islamophobia, sexism, racism and the free market, and suggests future directions for research. Making use of a range of methodologies from discourse analysis, sociolinguistics, semiotics and political science, Applied Linguistics and Politics demonstrates how linguistics can intervene in the political and help mobilize and organize for an economically and socially just society. **Proceedings: One English - many approaches, needs and realities ,**

understanding of the globalised use of English as a lingua franca The final section considers the implications of this perspective on communication for how the subject of English language teaching might be redefined The book is relevant for anyone who sees the need for a critical consideration of established concepts in linguistics and language pedagogy
