Language and Neoliberalism Marnie Holborow, 2015-02-20 Language and Neoliberalism examines the ways in which neoliberalism or the ideology of market rule finds expression in language In this groundbreaking original study Holborow shows at once the misleading character of ideological meaning and the underlying social reality from which that meaning emerges In universities it is now the norm to use terms like entrepreneurial and business partnerships How have these terms become a core component of education and gained such force Markets have become metaphorically a power in their own right They now tell governments how to act and warn them against too much public spending Post crash the capitalist market continues to be crisis prone and in that context the neoliberal ideology remains contested Free of jargon and assuming no specialist knowledge this book will strike a chord internationally by showing how neoliberal ideology has literally gone global in language Drawing on Volo inov and Bakhtin Williams and Gramsci and introducing concepts from Marxist political economy Language and Neoliberalism is essential reading for all interested in the intersection of linguistics applied linguistics and politics

Discourses of Neoliberalism in Singapore's Higher

Education Context Marissa K. L. E, 2022-11-30 E explores using textual words and visual image data from the corporate newsletters of two prominent Asian universities how particular discourses and their associated discursive representations of neoliberal logic and subjectivity occur in higher education In particular she looks at the expression of both institutional priorities and state imperatives that lend themselves to a complementarity built upon two contradictory perspectives individualism and communitarianism She argues that the ever increasing demand for and utility of higher education in neoliberal society means that it no longer functions merely to provide knowledge and skills but has implications for society the individual and the state with regard to their ways of thinking doing and being Contributing to a growing corpus of literature on how higher education around the world is being shaped by neoliberal policies E's research is based on work done in the city state of Singapore a less well represented context in current literature While both higher education institutions possess significantly different institutional identities and backgrounds the alignment of their varied representations of neoliberal logic and subjectivity with state sanctioned imperatives that indirectly impose demands and constraints shows how neoliberalism as ideology adapts to the socio political socio cultural and socio economic dimensions that make up the Singapore context The discursive representations of context dependent neoliberal logics and subjectivity are discussed in terms of their ideological implications focusing primarily on the complementarity between seemingly contradictory ideological positions E's work uses an innovative framework that integrates aspects of Discourse Theory with Critical Discourse Analysis and demonstrates the use of this framework through empirical linguistic and image analysis Appealing to academics and graduate students in linguistics especially those with an interest in critical multimodal discourse analysis audiences from the domains of higher education research critical geography sociology and political science will also find this a useful book

Language Policy and Political Economy Thomas Ricento, 2015-02-02 This volume articulates a new framework for language policy research that explores the connections between language policy and political economy The chapters are united in their focus on English a language that has enjoyed a reputation as a global language over the course of the last century and that is perceived as a tool for socioeconomic mobility The book argues that adopting a new political economic approach to language policy research will enhance our ability to provide more consistent explanations about the status functions benefits and limitations of English in its various roles in non English dominant countries The book poses the questions Does English serve as a lingua franca and does it advance the interests of sustainable economic and social development in low income countries Written by leading experts in language policy research the chapters reveal the myriad and complex ways in which government leaders policymakers and communities make decisions about the languages that will be taught as subjects or used as media of instruction in schools English is often advertised as a social good with unquestioned instrumental value yet access to quality English medium education in low income countries tends to be restricted to those with sufficient economic means to pay for it As the capitalist world economy continues to change and grow

and assuming that translation technologies continue to improve it is likely that the roles and relative importance of English as a global language will change significantly. Assessing the costs and benefits of acquiring English therefore takes on increased urgency. The book argues that a political economic approach is particularly appropriate in this endeavor as it takes into account theories and empirical findings from a range of disciplines in order to assess and explain real world phenomena that do not fit neatly into boxes labeled economic social political or cultural. Together the chapters in this volume argue for a new direction in language policy studies grounded in political economy that will explain why English has been experienced as both a blessing and curse in different parts of the world why English continues to be useful as a lingua franca for particular sectors of the global economy and why it is a detriment to economic development in many low income countries. The book will be invaluable to language policy scholars policy makers and educators significantly advancing research in this important field.

The Discourses of Capitalism Christian W. Chun, 2017-03-27 Since the global economic crisis of 2007-2008 capitalism has been the topic of widespread general discussion in both mainstream and social media. In this book Christian W. Chun examines the discourses of capitalism taken up by people in their responses to a street art installation created by Steve Lambert entitled *Capitalism Works for Me*. In doing so he considers several key questions including: How do everyday people view and make sense of capitalism and its role in their work and personal lives? What are the discourses they use in their common sense understandings of the economy to defend or reject capitalism as a system? Chun looks at how dominant discourses in social circulation operate to co-construct and support capitalism and the accompanying counter discourses that critique it. This is key reading for advanced students of discourse analysis language and globalization politics media communication studies and related areas. Political Economy and Sociolinguistics David Block, 2018-02-08 Shortlisted for the BAAL Book Prize 2019. This book explores how political economy intersects with sociolinguistics specifically how neoliberalism inequality and social class mediate language in society issues. The chapter concludes that such research generally contains little in the way of thorough and in depth coverage of the key ideas and conceptual frameworks said to undergird it. With this consideration in mind Chapters 2, 3 and 4 are organised around in depth discussions of respectively political economy as a general disciplinary frame neoliberalism as the variegated variety of capitalism dominant in the world today and stratification inequality and social class as phenomena intrinsic to capitalism which in the neoliberal era have come to the fore as key issues. Drawing directly on the background provide in Chapters 2-4 Chapters 5 and 6 explore two distinct political economy informed lines of research on the one hand the neoliberal citizen and on the other hand discursive class warfare.
