Thordardottir, 2019-04-09 Although most children learn language relatively quickly as many as 10 per cent of them are slow to start speaking and are said to have developmental language disorder DLD Children with DLD are managed by a variety of different professionals in different countries are offered different services for different periods of time and are given a variety of different therapeutic treatments To date there has been no attempt to evaluate these different practices Managing Children with Developmental Language Disorder Theory and Practice Across Europe and Beyond does just this reporting on the findings of a survey carried out as part of the work of COST Action IS1406 a European research network Law and colleagues analyse the results of a pan European survey looking at how different services are delivered in different countries at the cultural factors underpinning such services and the theoretical frameworks used to inform practice in different

countries The book also provides a snapshot of international practices in a set of 35 country specific vignettes providing a benchmark for future developments but also calling attention to the work of key practitioners and thinkers in each of the countries investigated This book will be essential reading for practitioners working with children with language impairments those commissioning services and policy in the field and students of speech and language therapy **Children with Social, Emotional and Behavioural Difficulties and Communication Problems** Melanie Cross, 2011-08-15 Children and young people with social emotional and behavioural difficulties SEBD are far more likely to have communication problems than their peers Exploring the ways in which children's language and emotional development are linked Melanie Cross considers the reasons why behavioural and communication difficulties often occur together [MITESOL Conference Proceedings](#) MITESOL 2009 - 2010, 2011 **The Handbook of Language Assessment Across Modalities** Tobias Haug, Wolfgang Mann, Ute Knoch, 2021-12-21 The identification of language problems and subsequent evaluation of interventions depend in part on the availability of useful and psychometrically robust assessments to determine the nature and severity of their problems and monitor progress The purpose of these assessments may be to measure a child's language proficiency that is how they perform relative to other children and whether they have the language level expected and needed for schooling or they may have a specifically clinical purpose to identify the occurrence and nature of a disorder The purpose of assessment is key to the aspects of language targeted in an assessment and the methods used to target these In the case of spoken English there are many language assessments ranging from broad language tests to more narrowly focused measures reflecting the complexity of the language system and its use *Communication Sciences and Disorders* Dale F.
