William Croft Thomas Stolz Maarten Mous Ad Backus Evgeniy Golovko Peter Bakker Yaron Matras **Language Contact in Amazonia** Aleksandra Iñáur'evna Aikhenval'd, 2002 This book considers how forms and meanings of different languages at different times may resemble one another and what the explanation is for this The author aims a to explain and identify the relationship between areal diffusion and the genetic development of languages and b to discover the means of distinguishing what may cause one language to share the characteristics of another This is done using the example of Arawak and Tucanoan languages spoken in the large area of the Vaup's river basin in northwest Amazonia which spans Colombia and Brazil In this region language is seen as a badge of identity language mixing interaction and influence are resisted for ideological reasons Professor Aikhenvald considers which grammatical categories are most and which are least likely to be borrowed in a situation of prolonged language contact where lexical borrowing is reduced to a minimum She provides a genetic analysis of the languages of the region and considers their historical relationships with languages of the same family outside it She also examines changes brought about by recent contact with European languages and culture and the linguistic and cultural effects of being part of a group that is aware its language and identity are threatened The book is presented in relatively nontechnical language and will interest linguists and anthropologists **Sociolinguistic and Typological Perspectives on Language Variation** Silvia Ballarè, Guglielmo Inglese, 2023-10-04 Linguistic variation loosely defined as the wholesale processes whereby patterns of language structures exhibit divergent distributions within and across languages has traditionally been the object of research of at least two branches of linguistics variationist sociolinguistics and linguistic typology In spite of their similar research agendas the two approaches have only rarely converged in the description and interpretation of variation While a number of studies attempting to address at least aspects of this relationship have appeared in recent years a principled discussion on how the two disciplines may interact has not yet been carried out in a programmatic way This volume aims to fill this gap and offers a cross disciplinary venue for discussing the bridging between sociolinguistic and typological research from various angles with the ultimate goal of laying out the methodological and conceptual foundations of an integrated research agenda for the study of linguistic variation Language Contact, Inherited Similarity and Social Difference Danny Law, 2014-06-15 This book offers a study of long term intensive language contact between more than a dozen Mayan languages spoken in the lowlands of Guatemala Southern Mexico and Belize It details the massive restructuring of syntactic and semantic organization the calquing of grammatical patterns and the direct borrowing of inflectional morphology including in some of these languages the direct borrowing of even entire morphological paradigms The in depth analysis of contact among the genetically related Lowland Mayan languages presented in this volume serves as a highly relevant case for theoretical historical contact typological socio and anthropological linguistics This linguistically complex situation involves serious engagement with issues of methods for distinguishing contact induced similarity from inherited similarity the role of social and ideological variables in conditioning the outcomes of language contact cross

Spanish as a Contact Language Israel Sanz-Sanchez, 2025-01-31 Languages do not exist beyond their speakers but the history of individual languages has often been told as if they had a life of their own emerging from other languages growing and sometimes dying When applied to Spanish this story line commonly begins in spoken Latin with the language taking shape in medieval Spain before spreading beyond Europe in the colonial period This book proposes a new take on this narrative Instead of seeing Spanish as a linguistic entity with linear development what would its history look like if we think of it as a centuries long constellation of contact events A History of Spanish as a Contact Language revisits the evolution of Spanish from the perspective of the ecology of language centring speakers as the only historical agents of language transmission and change Taking the speakers vantage point opens up exciting possibilities to rethink what Spanish is how it has changed and who has played a role in this process
