**Language Contact, Continuity and Change in the Genesis of Modern Hebrew** Edit Doron, Malka Rappaport Hovav, Yael Reshef, Moshe Taube, 2019-09-18 The emergence of Modern Hebrew as a spoken language constitutes a unique event in modern history a language which for generations only existed in the written mode underwent a process popularly called revival acquiring native speakers and becoming a language spoken for everyday use Despite the attention it has drawn this particular case of language shift which differs from the better documented cases of creoles and mixed languages has not been discussed within the framework of the literature on contact induced change The linguistic properties of the process have not been systematically studied and the status of the emergent language as a discontinuous stage of its historical sources has not been evaluated in the context of other known cases of language shift The present collection presents detailed case studies of the syntactic evolution of Modern Hebrew alongside general theoretical discussion with the aim of bringing the case of Hebrew to the attention of language contact scholars while bringing the insights of the literature on language contact to help shed light on the case of Hebrew

*The Oxford Handbook of Language Contact* Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from

Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change

*Quantitative Approaches to Grammar and Grammatical Change* Sam Featherston, Yannick Versley, 2016-07-25 The newly emerging field of theoretically informed but simultaneously empirically based syntax is dynamic but little represented in the literature This volume addresses this need While there has previously been something of a gulf between theoretical linguists in the generative tradition and those linguists who work with quantitative data types this gap is narrowing In the light of the empirical revolution in the study of syntax even people whose primary concern is grammatical theory take note of processing effects and attribute certain effects to them Correspondingly workers focusing on the surface evidence can relate more to the concepts of the theoreticians because the two layers of explanation have been brought into contact And these workers too must account for the data gathered by the theoreticians An additional innovation is the generative analysis of historical data this is now seen as psycholinguistic theory relevant data like any other These papers are thus a snapshot of some of the work currently being

done in evidence based grammar using both experimental and historical data      *A Corpus-Driven Approach to Language Contact* Evangelia Adamou,2016-01-29 This book proposes a corpus driven approach to language contact based on the study of endangered languages Drawing on variationist and language contact frameworks it presents an analysis of spoken corpora from Europe and Mexico using a combination of criteria The aim of this approach is to establish patterns of multilingual speech prevailing in different communities and allow for crosslinguistic comparison      **Language Contact and Contact Languages** Peter Siemund,Noemi Kintana,2008 This new volume on language contact and contact languages presents cutting edge research by distinguished scholars in the field as well as by highly talented newcomers It has two principal aims to analyze language contact from different perspectives notably those of language typology diachronic linguistics language acquisition and translation studies and to describe explain and elaborate on universal constraints on language contact The individual chapters offer systematic comparisons of a wealth of contact situations and the book as a whole makes a valuable contribution to deepening our understanding of contact induced language change With its broad approach this work will be welcomed by scholars of many different persuasions      **The Sociolinguistics of Globalization** Jan Blommaert,2010-04-08 Human language has changed in the age of globalization no longer tied to stable and resident communities it moves across the globe and it changes in the process The world has become a complex web of villages towns neighbourhoods and settlements connected by material and symbolic ties in often unpredictable ways This phenomenon requires us to revise our understanding of linguistic communication In *The Sociolinguistics of Globalization* Jan Blommaert constructs a theory of changing language in a changing society reconsidering locality repertoires competence history and sociolinguistic inequality

*The Grammar of Interactives* Bernd Heine, 2023-01-16 This book explores a domain of discourse processing referred to as interactive grammar based on an analysis of grammatical descriptions of over 100 languages spoken across the world While much previous work has treated interactive grammar as a fairly marginal part of language Bernd Heine describes it here as a distinct category that contrasts with sentence grammar both in its functions and its structural behavior He identifies ten types of interactives i e extra clausal expressions of linguistic discourse attention signals directives discourse markers evaluatives ideophones interjections response elicitors response signals social formulae and vocatives The analysis reveals that speakers make use of two contrasting modes for structuring their discourses both of which are needed for successful communication one is sentence grammar which has a propositional format and analytic organization the other is interactive grammar which has a holophrastic organization and a focus on social communication While the argument structure of sentence grammar is shaped by the propositional format of sentences that of interactive grammar is shaped by the indexical nature of the situation of discourse This distinction shows interesting correlations both with findings from neurolinguistic studies on differential activity in the two hemispheres of the human brain and with observations from social psychology on the differences between systems of reasoning and judgment

functions systemic elaborations language practices semiotic developments How should linguistic theory incorporate the empirical findings of language contact studies and how could these alter underlying postulates of existing models choice of analysis and epistemic framework Which role has language contact been playing in the history of linguistic research and academic life And how has this idea influenced individual researchers and their approaches **Substrate and Adstrate**

Micah Corum, 2015-04-24 This volume provides a large scale in depth analysis of locative structures in Nigerian Pidgin and Ghanaian Pidgin English and compares those structures to locatives in their lexifier substrate and adstrate languages The work draws on new research methods for investigating substrate and adstrate influence in semantics and creole genesis

Iconicity and Analogy in Language Change Janice Aski, Cinzia Russi, 2015-09-25 This book examines the alternation between accusative dative and dative accusative order in Old Florentine clitic clusters and its decline in favor of the latter Based on an exhaustive analysis of data collected from medieval Florentine and Tuscan texts we offer a novel analysis of the rise of the variable order the transition from one order to the other and the demise of the alternation that relies primarily on iconicity and analogy The book employs exophoric pragmatic iconicity a language external iconic relationship based on similarity between linguistic structure and the speaker writer's conceptualization of reality and endophoric iconicity a language internal iconic relationship where the iconic ground is construed between linguistic signs and structures Analogy is viewed as a productive process that generalizes patterns or extends grammatical rules to formally similar structures and obtains the form of the analogical relationship between the masculine singular definite article and the third person singular accusative clitic which shared the same phonotactically constrained distribution patterns The data indicate that exophoric pragmatic iconicity exploits and maintains the alternation whereas endophoric iconicity and analogy conspire to end it

Modality in Contact Carmelo Alessandro Basile, 2024-09-02 This book explores the evolution of modal constructions of necessity and obligation in New Englishes Focusing on Singapore English analysis of corpus data reveals lower levels of grammaticalization compared to its lexifier British English This trend is explained through the lenses of a pan stratist model which considers a spectrum of forces influencing the dynamics of contact On the one hand cognitive mechanisms seem to favour the selection of less grammaticalized and more transparent variants from the lexifier On the other hand the substrate is positioned as a background force actively contributing to the selection of new material to address functional gaps in the system

Coordinating Conjunctions in Sinitic Languages Kevin Kin-wing Chan, 2024-12-31 The book is a comprehensive typological study of coordinating conjunctions in Sinitic languages and other languages worldwide focusing on the grammaticalization pathways through which conjunctions emerge Utilizing an extensive database of coordinating conjunctions including first hand data from 234 Chinese dialects and 45 non Sinitic languages as well as 830 sets of second hand data this research aims to reconstruct the primary grammaticalization paths of coordinating conjunctions in Sinitic languages while making typological generalizations and classifications The study contributes to the understanding of how

**The Verbal System of the Aramaic of Daniel** Tarsee Li, 2009-03-25 This book explains the verbal system of the Aramaic of Daniel in the context of current research on grammaticalization which though first mentioned by Meillet in 1912 did not flourish until the beginning of the 1980 s and has only more recently been applied to the study of Ancient Near Eastern languages Although various aspects of the Aramaic of Daniel have been subject of numerous studies including a few exhaustive studies on the verbal system in the last century it remains among the most difficult to explain The explanation offered here is coherent with the historical development of Aramaic as well as the observable tendencies in the development of human languages in general
