The late Mr Lee Kuan Yew 1923 2015 laid the foundations for the creation of a first world education system in Singapore Like many other issues concerning the country his ideas for education were transported in a red box which he took with him wherever he went even up to his last days Inside it was always something designed to help create a better life for all Singaporeans The editors of this volume were inspired by the idea of Mr Lee's red box and by the Founding Father's selfless drive to continuously improve the country he loved As such the book explores in detail Mr Lee's plans including chapters on Education The Man and His Ideas Foundational Pillars of Singapore's Education Education for Nationhood and Nation Building and 21st Century Readiness and Adaptability The chapters also include the authors' visions no matter how great or small for the future of education in Singapore They explore how Mr Lee's educational policies resulted in a system that attracts the right and best candidates to become teachers that forms them into effective teachers specialists and leaders that ensures they and the education system are able to deliver the best possible learning for every child and that establishes a legacy that has allowed the education system to continue to move forward while tackling the challenges of its success From the little red box came the ideas that led to the country's meteoric rise Likewise the editors hope this book will lead to a brighter future in education **Teaching English to Second Language Learners in Academic Contexts** Jonathan M.

Early Language Learning in Context David Hayes, 2022-08-19 This book critically analyses early school foreign language teaching policy and practice foregrounding the influence of the socioeducational and cultural context on how policies are implemented and assessing the factors which either promote or constrain their effectiveness It focuses on four Asian contexts Malaysia South Korea Sri Lanka and Thailand while providing a discussion of policy and practice in Canada and Finland as a comparison Concentrating on the state school sector it criticises the worldwide trend for a focus on English as the principal or only foreign language taught in primary schools founded on a rationale that widespread proficiency in English is important for future national success in a globalised economy It maintains that the economic rationale is not only largely unfounded and irrelevant to the language learning experiences of young children but also that the focus on English exacerbates system inequalities rather than contributing to their reduction The book argues for a broader perspective on language learning in primary schools one that values multilingualism and knowledge of regional and indigenous languages alongside a more diverse range of foreign languages This book will appeal to educational policymakers researchers and students interested in
