Large Carnivore Conservation David J. Mattson, Rebecca Watters, Avery C. Anderson, Susan G. Clark, Douglas Clark, Linaya Workman, D. Scott Slocum, William M. Pym, Micheal L. Gibeau, Seth M. Wilson, Gregory A. Neudecker, James J. Jonkel, J. Daniel Oppenheimer, Lauren Richie, David N. Cherney, Christina Milloy, 2020-03-04 Strategies for protecting wolves mountain lions and more by taking the human species into account as well Very valuable Journal of Wildlife Management Drawing on six case studies of wolf grizzly bear and mountain lion conservation in habitats stretching from the Yukon to Arizona Large Carnivore Conservation argues that conserving and coexisting with large carnivores is as much a problem of people and governance of reconciling diverse and sometimes conflicting values perspectives and organizations and of effective decision making in the public sphere as it is a problem of animal ecology and behavior By adopting an integrative approach editors Susan G Clark and Murray B Rutherford seek to examine and understand the interrelated development of conservation science law and policy as well as how these forces play out in courts other public institutions and the field In combining real world examples with discussions of conservation and policy theory Large Carnivore Conservation not only explains how traditional management approaches have failed to meet the needs of all parties but also highlights examples of innovative successful strategies and provides practical recommendations for improving future conservation efforts Building on decades of work this book integrates biological knowledge with human dimensions study and charts a course for coexistence with large carnivores Douglas W Smith Senior Wildlife Biologist Yellowstone National Park

Beyond the North American Model of Wildlife Conservation Anja Heister, 2022-10-26 The North American Wildlife Conservation Model NAM is the driver of a strong anthropocentric stance which has legalized an ongoing annual exploitation of hundreds of millions of wild animals who are killed in the United States through trapping hunting and other lethal practices Increasingly the American public opposes the killing of wild animals for recreation trophies and profit but has little if any knowledge of the Model The purpose of this book is to empower the public with knowledge about the NAM s insufficiencies and to help expedite the shift from lethal to compassionate conservation an endeavour urgently needed particularly under the threats of climate change human population growth and accelerating plant and animal species extinctions With a focus on trapping this book exposes the NAM s belief in human supremacy and its consequences for wild animals and their ecosystems the same value that is driving the ongoing global destruction of nature and accelerating species extinction Motivated by a deep concern for wild animals who suffer and whose lives are extinguished each year by sportsmen and women this book exposes the violent treatment of wild animals inherent in governmental promoted hunting and trapping programs while emphasizing the importance of empathy and compassion for other animals in conservation and in our lives

Bears of the World Vincenzo Penteriani, Mario Melletti, 2020-11-26 Bears have fascinated people since ancient times The relationship between bears and humans dates back thousands of years during which time we have also competed with bears for shelter and food In modern times bears have come under pressure through encroachment on their habitats climate change and illegal trade in their body parts including the Asian bear bile market The IUCN lists six bears as vulnerable or endangered and even the least concern species such as the brown bear are at risk of extirpation in certain countries The poaching and international trade of these most threatened populations are prohibited but still ongoing Covering all bears species worldwide this beautifully illustrated volume brings together the contributions of 200 international bear experts on the ecology conservation status and management of the Ursidae family It reveals the fascinating long history of interactions between humans and bears and the threats affecting these charismatic species

Drivers of Landscape Change in the Northwest Boreal Region Valerie Barber, 2020-01-04 The northwest boreal region NWB of North America is a land of extremes Extending more than 1 3 million square kilometers 330 million acres it encompasses the entire spectrum between inundated wetlands below sea level to the tallest peak in North America Permafrost gradients span from nearly continuous to absent Boreal ecosystems are inherently dynamic and continually change over decades to millennia The braided rivers that shape the valleys and wetlands continually change course creating and removing vast wetlands and peatlands Glacial melt erosion fires permafrost dynamics and wind blown loess are among the shaping forces of the landscape As a result species interactions and ecosystem processes are shifting across time The NWB is a data poor region and the intention of the NWB Landscape Conservation Cooperative is to determine what data are not available and what data are available For instance historical baseline data describing the economic and social relationships in association with the ecological condition of the NWB landscape are often lacking Likewise the size and remoteness of this region make it challenging to measure basic biological information such as species population sizes or trends The paucity of weather and climate monitoring stations also compound the ability to model future climate trends and impacts which is part of the nature of working in the north The

purpose of this volume is to create a resource for regional land and resource managers and researchers by synthesizing the latest research on the historical and current status of landscape scale drivers including anthropogenic activities and ecosystem processes future projected changes of each and the effects of changes on important resources Generally each chapter is coauthored by researchers and land and natural resource managers from the United States and Canada Large Carnivore Conservation and Management Tasos Hovardas,2018-07-11 Large carnivores include iconic species such as bears wolves and big cats Their habitats are increasingly being shared with humans and there is a growing number of examples of human carnivore coexistence as well as conflict Next to population dynamics of large carnivores there are considerable attitude shifts towards these species worldwide with multiple implications This book argues and demonstrates why human dimensions of relationships to large carnivores are crucial for their successful conservation and management It provides an overview of theoretical and methodological perspectives heterogeneity in stakeholder perceptions and behaviour as well as developments in decision making stakeholder involvement policy and governance informed by human dimensions of large carnivore conservation and management The scope is international with detailed examples and case studies from Europe North and South America Central and South Asia as well as debates of the challenges faced by urbanization agricultural expansion national parks and protected areas The main species covered include bears wolves lynx and leopards The book provides a novel perspective for advanced students researchers and professionals in ecology and conservation wildlife management human wildlife interactions environmental education and environmental social science **Billionaire Wilderness** Justin Farrell,2021-03-02 Offers an unprecedented look inside the world of the ultra wealthy and their relationship to the natural world showing how the ultra rich use nature to resolve key predicaments in their lives Justin Farrell immerses himself in Teton County Wyoming to investigate interconnected questions about money nature and community in the twenty first century Farrell draws on three years of in depth interviews with ordinary millionaires and the world s wealthiest billionaires four years of in person observation in the community and original quantitative data to provide analytical insight on the ultra wealthy He also interviewed low income workers who could speak to their experiences as employees for and members of the community with these wealthy people **Understanding Conflicts about Wildlife** Catherine M. Hill,Amanda D. Webber,Nancy E. C. Priston,2017-05-01 Conflicts about wildlife are usually portrayed and understood as resulting from the negative impacts of wildlife on human livelihoods or property However a greater depth of analysis reveals that many instances of human wildlife conflict are often better understood as people people conflict wherein there is a clash of values between different human groups Understanding Conflicts About Wildlife unites academics and practitioners from across the globe to develop a holistic view of these interactions It considers the political and social dimensions of human wildlife conflicts alongside effective methodological approaches and will be of value to academics conservationists and policy makers Transnational Indians in the North American West Clarissa Confer,Andrae

Marak,Laura Tuennerman,2015-10-07 This collection of eleven original essays goes beyond traditional border driven studies to place the histories of Native Americans indigenous peoples and First Nation peoples in a larger context than merely that of the dominant nation As Transnational Indians in the North American West shows transnationalism can be expressed in various ways To some it can be based on dependency so that the history of the indigenous people of the American Southwest can only be understood in the larger context of Mexico and Central America Others focus on the importance of movement between Indian and non Indian worlds as Indians left their reserved lands to work hunt fish gather pursue legal cases or seek out education to name but a few examples Conversely even natives who remained on reserved lands were nonetheless transnational inasmuch as the reserves did not fully belong to them but were administered by a nation state Boundaries that scholars once viewed as impermeable it turns out can be quite porous This book stands to be an important contribution to the scholarship that is increasingly breaking free of old boundaries *Yellowstone Wolves* Douglas W. Smith,Daniel R.

Stahler,Daniel R. MacNulty,2020-12-28 This beautifully illustrated volume on the Yellowstone Wolf Project includes an introduction by Jane Goodall and an exclusive online documentary The reintroduction of wolves to Yellowstone National Park was one of the greatest wildlife conservation achievements of the twentieth century Eradicated after the park was first established these iconic carnivores returned in 1995 when the US government reversed its century old policy of extermination In the intervening decades scientists have built a one of a kind field study of these wolves their behaviors and their influence on the entire ecosystem *Yellowstone Wolves* tells the incredible story of the Yellowstone Wolf Project as told by the people behind it This wide ranging volume highlights what has been learned in the decades since reintroduction as well as the unique blend of research techniques used to gain this knowledge We learn about individual wolves population dynamics wolf prey relationships genetics disease management and policy and the rippling ecosystem effects wolves have had on Yellowstone s wild and rare landscape Featuring a foreword by Jane Goodall beautiful images a companion online documentary by celebrated filmmaker Bob Landis and contributions from more than seventy wolf and wildlife conservation luminaries from Yellowstone and around the world *Yellowstone Wolves* is an informative and beautifully realized celebration of the extraordinary Yellowstone Wolf Project
