Book Description

Sudden, extreme deaths have always fascinated us-- and now more than ever as athletes and travelers rise to the challenges of high-risk sports and journeys on the edge. In this spellbinding book, veteran travel and outdoor sports writer Peter Stark reenacts the dramas of what happens inside our bodies, our minds, and our souls when we push ourselves to the absolute limits of human endurance. Combining the adrenaline high of extreme sports with the startling facts of physiological reality, Stark narrates a series of outdoor adventure stories in which thrill can cross the line to mortal peril. Each death or brush with death is at once a suspense story, a cautionary tale, and a medical thriller. Stark describes in unforgettable detail exactly what goes through the mind of a cross-country skier as his body temperature plummets-- apathy at ninety-one degrees, stupor at ninety. He puts us inside the body of a doomed kayaker tumbling helplessly underwater for two minutes, five minutes, ten minutes. He conjures up the physiology of a snowboarder frantically trying not to panic as he consumes the tiny pocket of air trapped around his face under thousands of pounds of snow. These are among the dire situations that Stark transforms into harrowing accounts of how our bodies react to trauma, how reflexes and instinct compel us to fight back, and how, why, and when we let go of our will to live. In an increasingly tamed and homogenized world, risk is not only a means of escape but a path to spirituality. As Peter Stark writes, "You must try to understand death intimately and prepare yourself for death in order to live a full and satisfying life." In this fascinating, informative book, Stark reveals exactly what we're getting ourselves into when we choose to live-- and die-- at the extremes of endurance.

Peter Stark, 2023-08-29 A vivid account of the rivalry between future president William Henry Harrison and the Shawnee chief Tecumseh and of the Native American alliance that fought westward expansion from the New York Times bestselling author of Astoria Taut multi layered a much needed reevaluation of this crucial period of our nation s history Laurence Bergreen author of Over the Edge of the World The conquest of Indigenous land in the eastern United States through corrupt treaties and genocidal violence laid the groundwork for the conquest of the American West In Gallop Toward the Sun acclaimed author Peter Stark exposes the fundamental conflicts at play through the little known but consequential struggle between two extraordinary leaders William Henry Harrison was born to a prominent Virginia family the son of a signer of the Declaration of Independence He journeyed west became governor of the vast Indiana Territory and sought statehood by attracting settlers and imposing one sided treaties Tecumseh by all accounts one of the nineteenth century s greatest leaders belonged to an honored line of Shawnee warriors and chiefs His father killed while fighting the Virginians flooding into Kentucky extracted a promise from his sons to never give in to the land hungry Americans An eloquent speaker Tecumseh traveled from Minnesota to Florida and west to the Great Plains convincing far flung tribes to join a great confederacy and face down their common enemy Eager to stop U S expansion the British backed Tecumseh s confederacy in a series of battles during the forgotten western front of the War of 1812 that would determine control over the North American continent Tecumseh s brave stand was likely the last chance to protect Indigenous people from U S expansion and prevent the upstart United States from becoming a world power In this fast paced narrative with its sharply drawn characters high stakes diplomacy and bloody battles Peter Stark brings this pivotal moment to life **360 Degrees of Reading** W. Tarzan was an Eco-tourist-- Luis Antonio Vivanco, Robert J. Gordon, 2006. Adventure is currently enjoying enormous interest in public culture. The image of Tarzan provides a rewarding lens through which to explore this phenomenon. In their day, Edgar Rice Burroughs's novels enjoyed great popularity because Tarzan represented the consummate colonial era adventurer: a white man whose noble civility enabled him to communicate with and control savage peoples and animals. The contemporary Tarzan of movies and cartoons is in many ways just as popular but carries different connotations. Tarzan is now the consummate eco-tourist, a cosmopolitan striving to live in harmony with nature using appropriate technology and helpful to the natives who cannot seem to solve their own problems. Tarzan is still an icon of adventure because like all adventurers, his actions have universal qualities: doing something previously untried, revealing the previously undiscovered, and experiencing the unadulterated. Prominent anthropologists have come together in this volume to reflect on various aspects of this phenomenon and to discuss contemporary forms of adventure.

Outdoors in the Southwest Andrew Gulliford, 2014-04-18. More college students than ever are majoring in Outdoor Recreation, Outdoor Education, or Adventure Education, but fewer and fewer Americans spend any time in thoughtful, respectful engagement with wilderness. While many young people may think of adrenaline-laced extreme sports as prime outdoor activities, with *Outdoors in the Southwest*, Andrew Gulliford seeks to promote appreciation for and discussion of the wild landscapes where those sports are played. Advocating an outdoor ethic based on curiosity, cooperation, humility, and ecological literacy, this essay collection features selections by renowned southwestern writers including Terry Tempest Williams, Edward Abbey, Craig Childs, and Barbara Kingsolver, as well as scholars, experienced guides, and river rats. Essays explain the necessity of nature in the digital age, recount rafting adventures, and reflect on the psychological effects of expeditions. True-life cautionary tales tell of encounters with nearly disastrous flash floods, 900-foot falls, and lightning strikes. The final chapter describes the work of Great Old Broads for Wilderness, the Colorado Fourteeners Initiative, and other exemplars of wilderness tithing, giving back to public lands through volunteering, stewardship, and eco-advocacy. Addressing the evolution of public land policy, the meaning of wilderness, and the importance of environmental protection, this collection serves as an intellectual guidebook, not just for students but for travelers and anyone curious about the changing landscape of the West.

Civil War Wests Adam Arenson, Andrew R. Graybill, 2015-03-07 This volume unifies the concerns of Civil War and western history revealing how Confederate secession created new and shifting borderlands In the West both Civil War battlefields and Civil War politics engaged a wider range of ethnic and racial distinctions raising questions that would arise only later in places farther east Likewise the histories of occupation reincorporation and expanded citizenship during Reconstruction in the South have ignored the connections to previous as well as subsequent efforts in the West The stories contained in this volume complicate our understanding of the paths from slavery to freedom for white as well as non white

Americans By placing the histories of the American West and the Civil War and Reconstruction into one sustained conversation this volume expands the limits of both by emphasizing how struggles over land labor sovereignty and citizenship shaped the U S nation state in this tumultuous era This volume highlights significant moments and common concerns of this continuous conflict as it stretched across the continent and throughout the nineteenth century Provided by publisher
