Last Leaves of American History: Comprising Histories of the Mexican War and California Emma Willard, 1849

The Mexican War: A Military History Research Collection Bibliography, 1973 This bibliography differs from the previous publications in this series since it concerns a specific time in American history the Mexican War period from 1835 to 1850 From a military standpoint the victorious efforts of American military forces can be considered as the proving ground for the Army and the Navy that emerged during the Civil War The annexation of Texas and the acquisition of lands from Mexico predestined both the expansion of the United States to the Pacific and the conflict which divided brother from brother This bibliography lists pertinent materials to be found in the Military History Research Collection related to this part of American history and is not intended to be a definite listing of bibliographic references on the period *Bibliotheca Americana*, 1852 *Catalog*, 1903 Indiana State Library, 1906 **Catalog. Supplement, Oct. 1, 1906** Indiana State Library, 1906 **Catalog** Indiana State Library, 1906 *Mapping the Nation* Susan Schulten, 2020-03-04 A compelling read that reveals how maps became informational tools charting everything from epidemics to slavery Journal of American History In the nineteenth century Americans began to use maps in radically new ways For the first time medical men mapped diseases to understand and prevent epidemics natural scientists mapped climate and rainfall to uncover weather patterns educators mapped the past to foster national loyalty among students and Northerners mapped slavery to assess the power of the South After the Civil War federal agencies embraced statistical and thematic mapping in order to profile the ethnic racial economic moral and physical attributes of a reunified nation By the end of the century Congress had authorized a national archive of maps an explicit recognition that old maps were not relics to be discarded but unique records of the nation's past All of these experiments involved the realization that maps were not just illustrations of data but visual tools that were uniquely equipped to convey complex ideas and information In *Mapping the Nation* Susan Schulten charts how maps of epidemic disease slavery census statistics the environment and the past demonstrated the analytical potential of cartography and in the process transformed the very meaning of a map Today statistical and thematic maps are so ubiquitous that we take for granted that data will be arranged cartographically Whether for urban planning public health marketing or political strategy maps have become everyday tools of social organization governance and economics The world we inhabit saturated with maps and graphic information grew out of this sea change in spatial thought and representation in the nineteenth century when Americans learned to see themselves and their nation in new dimensions *The Publishers' Circular and General Record of British and Foreign Literature*, 1849 *Women Writers of the American West, 1833-1927* Nina Baym, 2012-08-17 This book recovers the names and works of women who wrote about the American West during the nineteenth and early twentieth centuries some of them long forgotten and others better known such as Willa Cather and Mary Austin Holley It reveals how the authors showed women making lives for themselves in the West how they represented

the diverse region and how they represented themselves

The Latino Continuum and the Nineteenth-Century Americas Carmen E. Lamas,2021-03-09 The Latino Continuum and the Nineteenth Century Americas argues that the process of recovering Latina o figures and writings in the nineteenth century does not merely create a bridge between the US and Latin American countries peoples and literatures as they are currently understood Instead it reveals their fundamentally interdependent natures politically socially historically and aesthetically thereby recognizing the degree of mutual imbrication of their peoples and literatures of the period Largely archived in Spanish it addresses concerns palpably felt within and integral to the US and beyond English language works also find a place on this continuum and have real implications for the political and cultural life of hispanophone and anglophone communities in the US Moreover the central role of Latina o translations signal the global and the local nature of the continuum For the Latino Continuum embeds layered and complex political and literary contexts and overlooked histories situated as it is at the crossroads of both hemispheric and transatlantic currents of exchange often effaced by the logic of borders national cultural religious linguistic and temporal To recover this continuum of Latinidad which is neither confined to the US or Latin American nation states nor located primarily within them is to recover forgotten histories of the hemisphere and to find new ways of seeing the past as we have understood it The figures of the Felix Varela Miguel Teurbe Tol n Eusebio Guiteras Jos Mart and Mart n Mor a Delgado serve as points of departures for this reconceptualization of the intersection between American Latin American Cuban and Latinx studies
