Passing Peter Bjerregaard, Anders Emil Rasmussen, Tim Flohr Sørensen, 2016-03-17 Passing is a common euphemism for the death of a person as he or she is said to pass away or pass on This open ended saying has at its heart a notion of transformation from one state to another which in turn grants the possibility of grasping or approximating the passage of time and the materiality of death and decay This book begins with the idea that since all material things whether animals

human beings objects or buildings undergo some form of passing then the specific transformation in these passages and the materiality actively given to it can offer us a grasp of otherwise precarious temporalities It examines how human beings strive to relate to the temporal dimension of death and decay by giving new shape and direction to being and by examining its natural transformations Focusing on the materiality of passing and thereby the relationship between embodiment temporality and death Materialities of Passing offers rich case studies from Europe Papua New Guinea South Africa and the Russian Far East for exploring the material spatial and directional aspects of the very interface between life and death As such it will appeal to scholars of anthropology death studies archaeology philosophy and cultural studies **The Wiley Blackwell Handbook of Humanism** Andrew Copson,A. Nordic Classicism John Stewart, 2018-09-06 Nordic Classicism presents the first English language survey of an important yet short lived movement in modern architectural history It was through the Nordic classical movement that Scandinavian architecture first attracted international attention It was the Nordic Pavilions rather than Le Corbusier's modernism which generated most admiration at the 1925 World Fair and it was the Nordic classical architects including Gunnar Asplund Sigurd Lewerentz and Alvar Aalto who went on to establish Scandinavia's reputation for modern design Yet this brief classical movement was quickly eclipsed by the rise of international modernism and has often been overlooked in architectural studies The book explores the lives and works of various key contributors to Nordic classicism with eleven chapters each focussing on a different architect and on one of the period's outstanding works including the Stockholm Central Library the Resurrection Chapel and the Woodland Cemetery Famous architects and their works are examined alongside many lesser known examples to provide a comprehensive and in depth account As we approach the centenary of many of the events to which the book refers now is a timely opportunity to explore the key themes of the Nordic classical movement its architects their buildings and the social and cultural changes to which they were responding

The Memorial to the Missing of the Somme Gavin Stamp, 2010-08-06 Edwin Lutyens Memorial to the Missing of the Somme at Thiepval in

Northern France visited annually by tens of thousands of tourists is arguably the finest structure erected by any British architect in the twentieth century. It is the principal tangible expression of the defining event in Britain's experience and memory of the Great War: the first day of the Battle of the Somme on 1 July 1916, and it bears the names of 73,000 soldiers whose bodies were never found at the end of that bloody and futile campaign. This brilliant study by an acclaimed architectural historian tells the origin of the memorial in the context of commemorating the war dead; it considers the giant classical brick arch in architectural terms and also explores its wider historical significance and its resonances today. So much of the meaning of the twentieth century is concentrated here: the Thiepval Memorial to the Missing casts a shadow into the future, a shadow which extends beyond the dead of the Holocaust to the Gulag to the disappeared of South America and of Tiananmen. Reissued in a beautiful and striking new edition for the centenary of the Somme.

Deathscapes James D. Sidaway, 2016-05-13. Death is at once a universal and everyday but also an extraordinary experience in the lives of those affected. Death and bereavement are thereby intensified at and frequently contained within certain sites and regulated spaces such as the hospital, the cemetery and the mortuary. However, death also affects and unfolds in many other spaces: the home, public spaces and places of worship, sites of accident, tragedy and violence. Such spaces or Deathscapes are intensely private and personal places while often simultaneously being shared, collective sites of experience and remembrance, each place mediated through the intersections of emotion, body, belief, culture, society and the state. Bringing together geographers, sociologists, anthropologists, cultural studies academics and historians among others, this book focuses on the relationships between space, place and death, bereavement in western societies. Addressing three broad themes: the place of death, the place of final disposition and spaces of remembrance and representation, the chapters reflect a variety of scales ranging from the mapping of bereavement on the individual or in private domestic space through to sites of accident, battle, burial, cremation and remembrance in public space. The book also examines social and cultural changes in death and bereavement practices including personalisation and secularisation. Other social trends are addressed by chapters on green and garden burial, negotiating emotion in public/private space, remembrance of violence and disaster and virtual space. A meshing of material and more than representational approaches consider the nature, culture, economy and politics of Deathscapes: what are in effect some of the most significant places in human society.
