Hambleton, Robin, 2014-11-24 Cities are often seen as helpless victims in a global flow of events and many view growing inequality in cities as inevitable This engaging book rejects this gloomy prognosis and argues that imaginative place based leadership can enable citizens to shape the urban future in accordance with progressive values advancing social justice promoting care for the environment and bolstering community empowerment This international and comparative book written by an experienced author shows how inspirational civic leaders are making a major difference in cities across the world The analysis provides practical lessons for local leaders and a significant contribution to thinking on public service innovation for anyone who wants to change urban society for the better Beyond Mobility Robert Cervero, Erick

Guerra, Stefan Al, 2017-12-05 Beyond Mobility also seeks to rethink how projects are planned and designed in cities and suburbs at multiple geographic scales from micro designs such as parklets to corridors and city regions The book closes with a reflection on the opportunities and challenges in moving beyond mobility with attention to emerging technologies such as self driving cars and ride hailing services and social equity topics such as accessibility livability and affordability

Peripheral Centralities Nicholas A. Phelps, Roger Keil, Paul Maginn, 2025-04-01 The term peripheral centralities may seem

something of an oxymoron and yet the spatial peripheries of cities have often been more central to urban development processes than is appreciated To better understand the nature of peripheral centrality *Peripheral Centralities The Lost and Past Urbanity of the Suburbs* brings together a wide variety of examples of lost and forgotten peripheral centralities of different sizes purpose geographical location and political complexion dating from the first decades of the twentieth century to the present day Following the introduction two chapters provide broad overviews of peripheral centralities in international and national systems of centralities The next four chapters look at plans from settings as different as Dublin and Shanghai that for one reason or another failed to materialize The following eight chapters each describes cases where projects have been realized ranging from peripheral townships in England to a Chinese steel city To conclude the book the editors highlight the themes revealed in the foregoing chapters and consider the part an appreciation of peripheral centralities might play in the development of urban theory from the outside in

Introduction to Rural Planning Nick Gallent, Iqbal Hamiduddin, Meri Juntti, Sue Kidd, Dave Shaw, 2015-06-30 *Introduction to Rural Planning Economies Communities and Landscapes* provides a critical analysis of the key challenges facing rural places and the ways that public policy and community action shape rural spaces The second edition provides an examination of the composite nature of rural planning which combines land use and spatial planning elements with community action countryside management and the projects and programmes of national and supra national agencies and organisations It also offers a broad analysis of entrepreneurial social action as a shaper of rural outcomes with particular coverage of the localism agenda and *Neighbourhood Planning in England* With a focus on accessibility and rural transport provision this book examines the governance arrangements needed to deliver integrated solutions spanning urban and rural places Through an examination of the ecosystem approach to environmental planning it links the procurement of ecosystem services to the global challenges of habitat degradation and loss climate change and resource scarcity and management A valuable resource for students of planning rural development and rural geography *Introduction to Rural Planning* aims to make sense of current rural challenges and planning approaches evaluating the currency of the rural label in the context of global urbanisation arguing that rural spaces are relational spaces characterised by critical production and consumption tensions

Design Governance Matthew Carmona, Claudio De Magalhaes, Lucy Natarajan, 2016-12-19 *Design Governance* focuses on how we design the built environment where most of us live work and play and the role of government in that process To do so it draws on the experience of the Commission for Architecture and the Built Environment CABE a decade long globally unique experiment in the governance of design This book theorises design governance as an arm and aspiration of the state tells the story of CABE warts and all and what came before and after unpacks CABE's informal toolbox its methods and processes of design governance and reflects on the effectiveness and legitimacy of design as a tool of modern day government The result is a new set of concepts through which to understand the governance of design as a distinct and important sub field of urban design

How to Build Houses and Save the

Countryside Shaun Spiers, 2018-03-14 England has a housing crisis We need to build many more new homes to house our growing population but house building is controversial particularly when it involves the loss of countryside Addressing both sides of this critical debate Shaun Spiers argues that to drive house building on the scale needed government must strike a contract with civil society in return for public support and acceptance of the loss of some countryside it must guarantee high quality affordable developments in the right locations Simply imposing development as recent governments of all political persuasions have attempted will not work Focusing on house building and conservation politics in England Spiers uses his considerable experience and extensive research to demonstrate why the current model doesn't work and why there needs to be both planning reform and a more active role for the state including local government *Sir Peter Hall: Pioneer in Regional Planning, Transport and Urban Geography* Richard D. Knowles, Céline Rozenblat, 2016-02-09 This book sheds light on Sir Peter Hall's visions and contributions as recalled by experts Specialists from the fields of transport and geography testify to Sir Peter Hall's enormous impact on urban planning urban geography and transport geography and The IGU Commission on Transport and Geography together with the IGU Urban Commission would like to commemorate this After an Introduction by Richard Knowles and Celine Rozenblat Peter Taylor presents his high level contribution Polymath in City Studies and Jonathan Reades presents Sir Peter Hall's views on Location and Innovation This is followed by An Innovator of Enhancing Transport and Urban Development Relationships by Chia Lin Chen Kathy Pain explains their common work on The Mega City Regions while Michael Batty recalls how they collaborated on World Cities and Information Cities Celine Rozenblat and Dan O Donoghue welcome The Visionary for World and European cities **Sustainable Railway Futures** Becky P.Y. Loo, Claude Comtois, 2016-03-03 Revitalizing railways as a major sustainable transport mode in modern societies faces many issues and challenges This in depth overview places the importance of railways in the wider context of comprehensive sustainability which encompasses sustainable development social and economic equity and community livability Some scholars have described the 21st century as a period of renaissance for railways and suggest this transport mode can fulfil people's desire for high mobility with low negative environmental social economic and financial impacts In light of these new expectations for railways in both passenger and freight transport worldwide this book offers the latest research insights on the renewed interest about railway expansions and their wide ranging environmental socio economic and even political implications Planning the Great Metropolis David Johnson, 2015-01-09 As the Regional Plan Association embarks on a Fourth Regional Plan there can be no better time for a paperback edition of David Johnson's critically acclaimed assessment of the 1929 Regional Plan of New York and Its Environs As he says in his preface to this edition the questions faced by the regional planners of today are little changed from those their predecessors faced in the 1920s Derided by some accused by others of being the root cause of New York City's relative economic and physical decline the 1929 Plan was in reality an important source of ideas for many projects built during the New Deal era of the 1930s In his detailed

examination of the Plan Johnson traces its origins to Progressive era and Daniel Burnham's 1909 Plan of Chicago. He describes the making of the Plan under the direction of Scotsman Thomas Adams, its reception in the New York Region and its partial realization. The story he tells has important lessons for planners, decision makers and citizens facing an increasingly urban future where the physical plan approach may again have a critical role to play. [Reinventing a Small, Worldly City](#) Ana Gonçalves, 2016-11-10. Focusing on Cardiff, the capital city of Wales in the UK, this book reflects on a contemporary small European city, its development characteristics and present struggles. Following a century in which it was dubbed the world's coaltropolis, the decline in demand for coal meant that Cardiff endured an acute process of de-industrialisation. In seeking to address this and the related high levels of unemployment it has experienced, a process of cultural and social reinvention since the 1980s and more significantly after Wales turned into a devolved nation in the late 1990s, Cardiff's development from a small port into a capital city is examined and special attention is paid to the city's cultural and social transformation in recent decades that has relied on the expansion of specific cultural clusters and tourism, which have been decisive for the transformation of its cultural identity and in shaping the city's individual and collective memories and identities. Cardiff epitomises a quintessential case of urban reinvention, cultural regeneration and social transformation lying between two apparently contradictory paradigms: the need to respond to global demands and the effort to maintain its cultural distinctiveness and Welsh roots. Therefore, it sets the scene for a wider reflection on small cities, especially in the European setting, and what generally characterises these cities: their liveability, cultural creativity and community empowerment, as well as the fact that they facilitate mobility and social interaction. These worldly cities, the book contends, present interesting opportunities and challenges at the urban, economic, social and cultural levels that rely on more human-scale, people-based approaches to cities, thus defying existing urban hierarchies and categorisations. *Economy and Architecture* Juliet Odgers, Mhairi McVicar, Stephen Kite, 2015-07-16. *Economy and Architecture* addresses a timely, critical and much-debated topic in both its historical and contemporary dimensions. From the Apple Store in New York City to the street markets of the Pan American Highway, from commercial Dubai to the public schools of Australia, this book takes a critical look at contemporary architecture from across the globe whilst extending its range back in history as far as the Homeric epics of ancient Greece. The book addresses the challenges of practicing architecture within the strictures of contemporary economies grounded on the fundamental definition of economy as the well-managed household derived from the Greek *oikonomia* (*oikos* = house and *nemein* = manage). The diverse enquiries of the study are structured around the following key questions: How do we define our economies? How are the values of architecture negotiated among the various actors involved? How do we manage the production of a good architecture within any particular system? How does political economy frame and influence architecture? The majority of examples are taken from current or recent architectural practice, historical examples which include John Evelyn's villa Blenheim Palace, John Ruskin's Venice and early twentieth-century Paris, place the

debates within an extended critical perspective

Shane Ewen, 2016-02-01 Urban history is a well established and flourishing field of historical research Written by a leading scholar this short introduction demonstrates how urban history draws upon a wide variety of methodologies and sources and has been integral to the rise of interdisciplinary and comparative approaches to history since the second half of the twentieth century Shane Ewen offers an accessible and clearly written guide to the study of urban history for the student teacher researcher or general reader who is new to the field and interested in learning about past approaches as well as key themes concepts and trajectories for future research He takes a global and comparative viewpoint combining a discussion of classic texts with the latest literature to illustrate the current debates and controversies across the urban world The historiography of the field is mapped out by theme including new topics of interest with a particular focus on space and social identity power and governance the built environment culture and modernity and the growth and spread of transnational networking By discussing a number of historic and fast growing cities across the world What is Urban History demonstrates the importance of the history of urban life to our understanding of the world both in the present and the future As a result urban history remains pivotal for explaining the continued growth of towns and cities in a global context and is particularly useful for identifying the various problems and solutions faced by fast growing megacities in the developing world

Urban Design Governance Matthew Carmona, João Bento, Tommaso Gabrieli, 2023-04-17 Urban Design Governance takes a deep dive into the governance of urban design around Europe It examines interventions in the means and processes of designing the built environment as devised by public authorities and other stakeholders across the continent In particular the focus is on the use of soft powers and allied financial mechanisms to influence design quality in the public interest In doing so the book traces the scope use and effectiveness of the range of informal non regulatory urban design governance tools that governments municipalities and others have at their disposal Developed from the Urban Maestro project a joint initiative of the United Nations Human Settlement programme UN Habitat UCL and the Brussels Bouwmeester Ma tre Architecte BMA Urban Design Governance offers the first panorama of informal urban design governance tools from across Europe and places the tools within a theoretical and analytical framework with the potential to be applied locally and internationally Last the book discusses and reveals the essential pre requisites for the effective governance of urban design Governments everywhere are increasingly seeing these sorts of tools as part of a necessary investment in delivering the high quality built environments that their residents businesses and investors demand This book shows how

No Little Plans Ian Wray, 2019-05-30 Is planning for America anathema to the pursuit of life liberty and happiness Is it true as ideologues like Friedrich Von Hayek Milton Friedman and Ayn Rand have claimed that planning leads to dictatorship that the state is wholly destructive and that prosperity is owed entirely to the workings of a free market To answer these questions Ian Wray s book goes in search of an America shaped by government plans and bureaucrats not by businesses bankers and shareholders He demonstrates that government plans did not damage

American wealth On the contrary they built it and in the most profound ways In three parts the book is an intellectual roller coaster Part I takes the reader downhill examining the rise and fall of rational planning and looks at the converging bands of planning critics led on the right by the Chicago School of Economics on the left by the rise of conservation and the counterculture and two brilliantly iconoclastic writers Jane Jacobs and Rachel Carson In Part II eight case studies take us from the trans continental railroads through the national parks the Federal dams and hydropower schemes the wartime arsenal of democracy to the postwar interstate highways planning for New York the moon shot and the creation of the internet These are stories of immense government achievement Part III looks at what might lie ahead reflecting on a huge irony the ideology which underpins the economic and political rise of Asia by which America now feels so threatened echoes the pragmatic plans and actions which once secured America s rise to globalism
