Oxford Textbook of Migrant Psychiatry Dinesh Bhugra, 2021-02-04 Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them Stress related to migration affects migrants and their extended families either directly or indirectly The process of migration is not just a phase but leads on to a series of adjustments including acculturation which may occur across generations Factors such as changes in diet attitudes and beliefs and overall adjustment are important in settling down and making the individuals feel secure This period of adjustment will depend upon the individual migrant's pre migration experiences migration process and post migration experiences but also upon an individual's personality social support and emotional response to migration Socio demographic factors such as age gender educational and economic status will all play a role in post migration adjustment In order to understand the impact on individuals not only the type of migration and different stressors but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate the mental health needs of migrants are often ignored by policy makers and clinicians The Oxford Textbook of Migrant Psychiatry is designed to serve as the comprehensive reference resource on the mental health of migrants bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals Individual chapters summarise theoretical constructs related to theories of migration the impact of migration on mental health and adjustment collective

trauma individual identity and diagnostic fallacies The book also covers the practical aspects of patient management including cultural factors ethnopsychopharmacology therapeutic interaction and therapeutic expectation and psychotherapy Finally the book will examine special clinical problems and special patient groups Part of the authoritative Oxford Textbooks in Psychiatry series this resource will serve as an essential reference for psychiatrists mental health professionals general practitioners primary care physicians social workers policy makers and voluntary agencies dealing with refugees and asylum seekers Through the Eyes of Titans: Finding Courage to Redeem the Soul of a Nation Danjuma G. Gibson, 2024-01-10

Human beings tend to romanticize history or idealize historical figures This is nowhere more apparent than the civil rights era of the twentieth century The problem is that when we idealize history we fail to learn from it The result is that history repeats itself along with its sins and atrocities The January 6 Capitol insurrection and the current racial reckoning we are experiencing is unoriginal to the American experience We have been here before This book seeks to humanize people we have idealized Readers are invited to challenge racial hatred and injustice in their own context by looking to the lives of historical figures who have faced the challenges we currently face By examining the self care practices of personalities like Ida B Wells Fannie Lou Hamer Benjamin Elijah Mays and Martin Luther King Jr this book examines the practices of introspection and self work these historical figures engaged in that enabled them to fulfill the body of work they are celebrated for today By humanizing these historical titans we can emulate similar practices of self care and introspection in our own lives that can equip us in continuing the ongoing work of dismantling structures of racial hatred and oppression and promoting freedom love equity and justice to redeem the soul of a nation Becoming a Pastor: Jaco J. Hamman, 2014-05-15

Mosher, Jeffrey Berman, 2015-07-01 Freud promised his patients absolute confidentiality regardless of what they revealed but privacy in psychotherapy began to erode a half century ago Psychotherapists now seem to serve as double agents with a dual and often conflicting allegiance to patient and society Some therapists even go so far as to issue Miranda type warnings advising patients that what they say in therapy may be used against them Confidentiality and Its Discontents explores the human stories arising from this loss of confidentiality in psychotherapy Addressing different types of psychotherapy breaches Mosher and Berman begin with the the story of novelist Philip Roth who was horrified when he learned that his psychoanalyst had written a thinly veiled case study about him Other breaches of privacy occur when the so called duty to protect compels a therapist to break confidentiality by contacting the police Every psychotherapist has heard about Tarasoff

but few know the details of this story of fatal attraction Nor are most readers familiar with the Jaffee case which established psychotherapist patient privilege in the federal courts Similarly the story of Robert Bierenbaum a New York surgeon who was brought to justice fifteen years after he brutally murdered his wife reveals how privileged communication became established in a state court Meanwhile the story of New York Chief Judge Sol Wachtler convicted of harassing a former lover and her daughter shows how the fear of the loss of confidentiality may prevent a person from seeking treatment with potentially disastrous results While affirming the importance of the psychotherapist patient privilege Confidentiality and Its Discontents focuses on both the inner and outer stories of the characters involved in noteworthy psychotherapy breaches and the ways in which psychiatry and the law can complement but sometimes clash with each other Depending on Strangers David P Levine,2021-03-01 We live in a world where our livelihood depends on our ability to relate to strangers The central quality that defines strangers is that they are unknown Because strangers are unknown they represent in the world outside the unknown self within The unknown self is the core of the personality considered as a potential to become something yet to be determined To be already known is to be determined prior to and independently of our presence in our lives At the outset of the process of taking form the individual is in a sense a stranger to self and to others The more this is the case the greater the openness of the process of self formation and the more marked the role of freedom from predetermination in that process Freedom from predetermination exists along three dimensions the free movement of thoughts and ideas or inner freedom the freedom to relate which is also the freedom not to relate and freedom in relating which is the possibility of maintaining secure self boundaries in relations with others In exploring freedom understood in this way Professor Levine considers such topics as the nature of inner freedom and its relationship to deliberation and choice stranger anxiety and its connection to group dynamics and social connection the internal factors that enable us to make the decisions that shape our lives and through our actions realize the ends embedded in our decisions how our memories shape our thought processes and therefore the choices we make and the lives we lead that result from them what makes it possible for us to live comfortably with and depend on people we do not know concern for the welfare of strangers and how our welfare can be secure in a world where we do not care about others and they do not care about us History and Educational Philosophy for Social Justice and Human Rights Chowdhury, Jahid Siraz,Vadevelu, Kumarashwaran,Zakaria, A.F.M.,Al-Mamun, Abdullah,Ahmed, Sajib,2024-03-22 In the complex landscape of educational philosophy and policy a difficult challenge arises the entwined issues of racism and other demographic differences and evolving education policies Traditional historical accounts fall short of addressing the broader historical patterns that underscore these challenges particularly their colonial legacy The need for a fresh perspective becomes evident one that transcends chronology and delves into the intricate dynamics shaping contemporary educational thought History and Educational Philosophy for Social Justice and Human Rights emerges as a groundbreaking solution to this conundrum Through a broad developmental and historical lens the book provides a fresh

perspective on the role of differences as the core content and subject of education It advocates for cultural resistance and a permanent political struggle by political cultural minorities and social movements while also challenging public institutions especially schools to actively embrace and utilize differences in their foundational work By engaging with the tensions and struggles around differences the book contends that institutions can transform becoming agents of positive change and contributing to the foundation of an inclusive and participatory democracy This book invites scholars and educators to not only understand the challenges but to actively participate in shaping a future where differences are not merely acknowledged but celebrated within the realms of education and society at large

On Freud's The Unconscious Salman Akhtar, Mary Kay O'Neil, 2018-03-08 If there ever was one word that could represent the essence of Freud's work that word would be unconscious Indeed Freud himself regarded his 1915 paper The Unconscious as central to clarifying the fundamentals of his metapsychology The paper delineates the topographic model of the mind and spells out the concepts of primary and secondary process thinking thing and word presentations timelessness of the unconscious condensation and symbolism unconscious problem solving and the relationship between the system Ucs and repression Examining these proposals in the light of contemporary psychoanalytic theory as well as from the perspective of current neurophysiology and ethology nine distinguished analysts take Freud's ideas further in ways that have implications for both psychoanalytic theory and practice

Dignity Matters Susan S. Levine, 2018-03-26 This book explores an ethical value central to all mental health professions Although dignity appears near the beginning of many codes of ethics it has been largely unexamined in the professional literature Potter Stewart famously declared about pornography that we can't define it but we know it when we see it Likewise with dignity This book addresses that gap The book considers the role of dignity as an ethical dimension of practice in individual psychotherapeutic and psychoanalytic work in the therapeutic community and in groups organizations and nations It outlines dignity in individual development and families the role of dignity violations in the understanding and treatment of trauma and how dignity and its violations can be a powerful force in conflict resolution The book will also address dignity in relations to specific populations with chapters on the African American and the LGBT experiences Listening with the question of dignity in mind offers a fresh non pathologizing framework for the practitioner

Clinical Psychometrics: Old Issues and New Perspectives Michela Balsamo, Marco Innamorati, Dorian A. Lamis, 2019-09-20 Clinical Psychometrics can be defined as a discipline that deals with the definition and measurement of clinical constructs Among its interests it includes dimensions such as skills behavior psychopathology quality of life and personality Indeed this discipline focuses on individual differences the theory of measurement the construction of measure instruments and their application in an international context Clinical Psychometrics can be considered as an essential tool in many fields of research related to psychological and psychiatric interventions for example it is useful for diagnostic assessment in various fields including clinical and forensic areas for the design and evaluation of specific psychological and pharmacological

treatments Therefore Clinical Psychometrics is an applied discipline using psychometric tools to develop evidence based type procedures relating to the understanding and improvement of the psychological conditions of individuals This Research Topic on Clinical Psychometrics is interested in several aspects of measurement of psychological variables focusing on the two fundamental paradigmatic aspects of the discipline the Classical Test Theory and the Item Response Theory This Research Topic seeks to stimulate a scientific debate between psychotherapists and psychometricians in this area It could have applicative fallouts such as designing trans cultural studies in order to 1 investigate the invariance of new instruments for measuring clinical variables 2 test the invariance of existing instruments used in clinical research 3 develop more refined measure instruments for the evaluation of clinical dimensions similarly to work conducted by the Obsessive Compulsive Cognitions Working Group in identifying domains considered central to OCD and developing the 87 item Obsessive Beliefs Questionnaire 4 evaluate therapeutic outcomes and processes such as states stress psychological distress psychological adjustment to illness health related quality of life mood disorders sexual functioning etc The goal of this Research Topic is to disseminate a culture of integration between psychometric model and clinical model promoting the scientific debate about the deepening of the existing methods and or the proposal of new methods capable of combining clinical significance with quantitative rigor This Research Topic welcomed all types of articles with the exception of case reports We were particularly interested in 1 Systematic reviews shedding new lights on the psychometric properties of the most used psychological measures in clinical psychology neuroscience psychiatry psychosomatics etc 2 Guidelines and suggestions on the correct use and gold standards in psychological assessment in the form of research studies and brief reports on the development of new measures and adaptation of existing ones

Unlit Corners Salman Akhtar, 2024-06-06 With contributions from Salman Akhtar Jerome Blackman Michael Civin Lois Choi Kain Nilofer Kaul M Sagman Kayatekin Z Emel Kayatekin Nina Savelle Rocklin and Ann Smolen Unlit Corners endeavours to bring light to neglected character traits which many struggle to overcome Filled with relevant case studies and carefully crafted psychoanalytic theory the book elucidates the multilayered nature of such psychopathologies and its treatment Beginning in the public realm Nina Savelle Rocklin explores the complex meaning of dirtiness both literally and figuratively relating it the body mind and language Ann Smolen s investigation of miserliness follows where she emphasizes that it is not about money but instead arises from the poverty of internal good objects which are the basic source of generosity Jerome Blackman examines the nuanced potential meanings of shyness using psychopathology and underlying etiology while Lois Choi Kain deftly categorizes outrageousness into three types a guilt driven masochist a hope driven optimist and a hate driven sadist with a subcategory for creative writers and artists The more private traits start with shallowness Michael Civin develops shallow as a general construct and studies it from a psychoanalytic perspective arguing that no human being can be described accurately as shallow The Kayatekins come next with their study of indecisiveness and the role of the ego as a way of understanding this trait Nilofer Kaul looks at

restlessness and its associations in psychoanalysis literature and culture The final chapter comes from Salman Akhtar on the subject of cowardliness where he links it to the lack of self protective devices emanating from breeches in the early mother child bond and deficient identification with the same sex parent This book is highly recommended to clinicians to give them the tools to not only understand and empathize with their patient s struggles but also to enhance their capacity to help them overcome such struggles **La psicología de tu relación con el dinero** Reynal, Vicky,2025-04-07 Las creencias
