Governance Reform Under Real World Conditions Citizens Stakeholders And Voice:

Governance Reform Under Real-World Conditions Sina Odugbemi, Thomas Jacobson, 2008-06-13 Although necessary and often first rate technocratic solutions alone have been ineffective in delivering real change or lasting results in governance reforms This is primarily because reform programs are delivered not in controlled environments but under complex diverse sociopolitical and economic conditions Real world conditions In political societies ownership of reform programs by the entire country cannot be assumed public opinion will not necessarily be benign and coalitions of support may be scarce or nonexistent even when intended reforms really will benefit those who need them most While the development community has the technical tools to address governance challenges experience shows that technical solutions are often insufficient Difficulties arise when attempts are made to apply what are often excellent technical solutions Human beings either acting alone or in groups small and large are not as amenable as are pure numbers and they cannot be ignored In the real world reforms will not succeed and they will certainly not be sustained without the correct alignment of citizens stakeholders and voice Governance Reform under Real World Conditions Citizens Stakeholders and Voice is a contribution to efforts to improve governance systems around the world particularly in developing countries The contributors who are academics and development practitioners provide a range of theoretical frameworks and innovative approaches and techniques for dealing with the most important nontechnical or adaptive challenges that impede the success and sustainability of reform efforts The editors and contributors hope that this book will be a useful guide for governments think tanks civil society organizations and development agencies working to improve the ways in which governance reforms are implemented around the world

Water, Democracy and Neoliberalism in India Vicky Walters, 2013-05-29 Since the early 1990s the achievement of good governance has been a dominant discourse in the pursuit of social and economic development This book presents a critical challenge to the contemporary development paradigm of good governance Based on original ethnographic fieldwork on urban water governance reforms in south India Karnataka the book examines the two propositions that underlie the current good governance debate The first refers to a claim that good governance is both democratic and pro market The second to the claim that commercially oriented water services whether private or public are good for poor and marginalised citizens The book analyses these propositions as they intersect on three levels policy practice process and outcome It argues that a number of tensions and contradictions exist within and between what the discourse promises the everyday practices of how good governance policies are implemented and in the outcomes of such It reveals the networks of power and the complexity of local reforms and their relation to global discourses as well as the motivations and everyday practices of those who currently possess the power to reform The book is of interest to academics in the fields of Development Studies Asian Studies and Comparative Politics

myriad efforts by diverse actors add up to reform What is needed to overcome setbacks and to consolidate the smaller victories These questions need answers Aid agencies have invested heavily in supporting civil society organizations as change agents in fledgling and established democracies alike Evidence gathered by donors NGOs and academics demonstrates how advocacy and campaigning can reconfigure power relations and transform governance structures at the local and global levels In the rush to go global or stay local however the national policy sphere was recently neglected Today there is growing recognition of the key role of champions of change inside national governments and the potential of their engagement with citizen activists outside These advances demand a better understanding of how national and local actors can combine approaches to simultaneously work the levers of change and how their successes relate to actors and institutions at the international level This book brings together eight studies of successful cases of citizen activism for national policy changes in South Africa Morocco Brazil Chile Mexico Turkey India and the Philippines They detail the dynamics and strategies that have led to the introduction change or effective implementation of policies responding to a range of rights deficits Drawing on influential social science theory about how political and social change occurs the book brings new empirical insights to bear on it both challenging and enriching current understandings NGO Management Alan Fowler, Chiku Malunga, 2020-09-23 The task environment of NGOs is changing rapidly and significantly making new demands on their management and leadership This Companion discusses the complexities involved It illustrates how NGOs can maintain performance and remain agile amidst increasing uncertainties These factors include the position of NGOs in civil society their involvement in governance and coping with the effects of the securitisation of international aid Complementing The Earthscan Reader in NGO Management selected contributions and specially commissioned pieces from NGO thought leaders and practitioners provide the reader with insights on the emerging thinking competences and practices needed for success in managing and leading tomorrow s NGOs *Governance for Development in Africa* David Booth, Diana Cammack, 2013-10-10 Drawing on in depth empirical research spanning a number of countries in Africa Booth and Cammack s path breaking book offers both an accessible overview of issues surrounding governance for development on the continent whilst also offering a bold new alternative In doing so they controversially argue that externally imposed good governance approaches make unrealistic assumptions about the choices leaders and officials are in practice able to make As a result reform initiatives and assistance programmes supported by donors regularly fail while ignoring the potential for addressing the causes rather than the symptoms of this situation In reality the authors show anti developmental behaviours stem from unresolved yet in principle soluble collective action problems Governance for Development in Africa offers a comprehensive and critical examination of the institutional barriers to economic and social progress in Africa and makes a compelling plea for fresh policy thinking and new ways of envisioning so called good governance **Voices in Aerosol** Caitlin Frances Bruce, 2024-01-09 Winner Visual Communication Division Outstanding Book Award National Communication Association NCA

Mapping Power Navroz K. Dubash, 2018-08-22 Electricity is critical to enabling India's economic growth and providing a better future for its citizens In spite of several decades of reform the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance To understand why *Mapping Power* provides the most comprehensive analysis of the political economy of electricity in India's states With chapters on fifteen states by scholars of state politics and electricity this volume maps the political and economic forces that constrain and shape decisions in electricity distribution Contrary to conventional wisdom it concludes that attempts to depoliticize the sector are misplaced and could worsen outcomes Instead it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards These arguments have implications for the challenges facing India's electricity future including providing electricity to all implementing government reform schemes and successfully managing the rise of renewable energy

Societal Dynamics and Fragility The World Bank, 2012-10-12 Today s world is changing at breakneck speed shaking the very foundations of many societies Increased mobility through massive urbanization and migration allows people unprecedented access to different cultures and ideas advanced technologies speed the pace of human interaction the globalization of communication offers new forms of social relationships that may directly contradict traditional norms for behavior These changes create tremendous stresses on relationships in societies affecting the way youth interact with their
