means towards eradicating the killing of women in the name of honour Using feminist approaches in particular the intersectionality approach the study looks at the application of such standards as well as the current obstacles Through such a lens the study discusses the strengths and weaknesses of the Turkish Constitution Turkish Civil Code Turkish Penal Code and Law to Protect Family and Prevent Violence Against Women and questions the judicial approach to the implementation of the women s right to life It identifies the lacunae in the Turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so called honour killings in the judgements The study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches The book will be a valuable resource for academics researchers and policy makers in the areas of international human rights law and feminist legal theory **Disability and Child Sexual Abuse** Martina Higgins,John Swain,2010 Disability and Child Sexual Abuse examines the ways in which society marginalises institutionalises and places disabled children in situations of unacceptable risk and how as evidenced in the survivors narratives patterns of service delivery can contribute to the problem Based on the accounts of seven disabled individuals who were sexually abused in childhood the book highlights a wide range of pertinent issues Through case vignettes and empirical research the authors ask practitioners to scrutinise their current professional practice exploring participants experiences of hospitalisation education systems and local authorities They consider the issue of who abuses and why and highlight issues relating to the complexities involved in revisiting past experiences and confronting unwarranted and unwanted feelings of responsibility The difficulty of recounting the abuse narrative is also examined within the research context This book will be relevant for professionals and students in the social health and education services such as social workers teachers and counsellors It will also offer insights for those seeking a less disablist society including disabled people themselves **WHO guideline on self-care interventions for health and well-being** World Health Organization,2021-07-31 Self care interventions are among the most promising and exciting new approaches to improve health and well being both from a health systems perspective and for people who use these interventions The World Health Organization WHO uses the following working definition of self care Self care is the ability of individuals families and communities to promote health prevent disease maintain health and cope with illness and disability with or without the support of a health worker The scope of self care as described in this definition includes health promotion disease prevention and control self medication providing care to dependent persons seeking hospital specialist primary care if necessary and rehabilitation including palliative care It includes a range of self care modes and approaches While this is a broad definition that includes many activities it is important for health policy to recognize the importance of self care especially where it intersects with health systems and health professionals Worldwide an estimated shortage of 18 million health workers is anticipated by 2030 a record 130 million people are currently in need of humanitarian assistance and disease outbreaks are a constant global threat At least

400 million people worldwide lack access to the most essential health services and every year 100 million people are plunged into poverty because they have to pay for health care out of their own pockets There is an urgent need to find innovative strategies that go beyond the conventional health sector response While self care is not a new term or concept self care interventions have the potential to increase choice when they are accessible and affordable and they can also provide more opportunities for individuals to make informed decisions regarding their health and health care In humanitarian settings for example due to lack of or limited health infrastructure and medical services in the crisis affected areas self care could play an important role to improve health related outcomes Self care also builds upon existing movements such as task sharing which are powerful strategies to support health systems *WHO guideline on self-care interventions for health and well-being, 2022 revision* World Health Organization,2022-06-17 A global shortage of an estimated 18 million health workers is anticipated by 2030 a record 130 million people are in need of humanitarian assistance and there is the global threat of pandemics such as COVID 19 At least 400 million people worldwide lack access to the most essential health services and every year 100 million people are plunged into poverty because they have to pay for healthcare out of their own pockets There is therefore an urgent need to find innovative strategies that go beyond the conventional health sector response These interventions are also relevant for all three areas of the Thirteenth General Programme of Work of the World Health Organization WHO recommends self care interventions for every country and economic setting as critical components on the path to reaching universal health coverage UHC promoting health keeping the world safe and serving the vulnerable
