Women's Poetry of Late Imperial China Xiaorong Li,2013-05-03 This study of poetry by women in late imperial China examines the metamorphosis of the trope of the inner chambers gui to which women were confined in traditional Chinese households and which in literature were both a real and an imaginary place Originally popularized in sixth century palace style poetry the inner chambers were used by male writers as a setting in which to celebrate female beauty to lament the loneliness of abandoned women and by extension to serve as a political allegory for the exile of loyal and upright male ministers spurned by the imperial court Female writers of lyric poetry ci soon adopted the theme beginning its transition from male fantasy to multidimensional representation of women and their place in society and eventually its manifestation in other poetic genres as well Emerging from the role of sexual objects within poetry late imperial women were agents of literary change in their expansion and complication of the boudoir theme While some take ownership and de eroticizing its imagery for their own purposes adding voices of children and older women and filling the inner chambers with purposeful activity such as

conversation teaching religious ritual music sewing childcare and chess playing some simply want to escape from their confinement and protest gender restrictions imposed on women Women s Poetry of Late Imperial China traces this evolution across centuries providing and analyzing examples of poetic themes motifs and imagery associated with the inner chambers and demonstrating the complication and nuancing of the gui theme by increasingly aware and sophisticated women writers

Circulation of Poetry in Manuscript in Early Modern England Arthur F. Marotti, 2021-05-26 This study examines the transmission and compilation of poetic texts through manuscripts from the late Elizabethan era through the mid seventeenth century paying attention to the distinctive material social and literary features of these documents The study has two main focuses the first the particular social environments in which texts were compiled and second the presence within this system of a large body of usually anonymous rare or unique poems Manuscripts from aristocratic academic and urban professional environments are examined in separate chapters that highlight particular collections Two chapters consider the social networking within the university and London that facilitated the transmission within these environments and between them Although the topic is addressed throughout the study the place of rare or unique poems in manuscript collections is at the center of the final three chapters The book as a whole argues that scholars need to pay more attention to the social life of texts in the period and to little known or unknown rare or unique poems that represent a field of writing broader than that defined in a literary history based mainly on the products of print culture **Masculinity and Its Challenges in India**
