Putra, Zainuddin Sajuri, Zenji Horita, 2023-04-05 Computational and experimental mechanics are approaches frequently used in the design and assessment of the material behaviour and the mechanical performance of structures. These approaches can be used to determine the physical properties of materials and the response of structures to loads which is carried out through stress analysis and measurements of deformation shape and strain. This book collects new scientific articles that contribute to the development of new computational and experimental methods bridging the gap between the fields of modelling simulation and experiments of materials and structures with a particular focus on Fatigue Design Computational Fracture Mechanics Structural Durability Reliability and Additive Manufacturing Recent Advances in Pipe Support Design Eric Van Stijgeren, 1982 An Introduction to Machinery Reliability Assessment Heinz P. Bloch, Fred K. Geitner, 1994

Here is the ultimate reference for ascertaining the functionality and remaining life of industrial process equipment. Packed with graphs, figures, photos and checklists, this edition of An Introduction to Machinery Reliability Assessment is the most approachable and useful book on this topic. This single volume contains dozens of assessment techniques based on probability and statistical analysis. Theoretical and practical contexts are given for the various methods which include failure mode and effect analysis, risk and hazard assessment, fault tree analysis, Weibull analysis and field reliability assessment. The second edition now contains expanded treatments of turbomachinery, particularly centrifugal pumps, Weibull analysis techniques and equipment safety checklists. Most importantly, it includes a new chapter focusing on mechanical structures and piping. New appendixes on safety design checklists and installation reviews and an updated glossary enhance the book's utility and practical application, making it a complete single source of machinery reliability assessment techniques.
