What Works in Latin American Municipalities? Claudia N. Avellaneda, 2023-03-02 This incisive book presents a critical compilation of empirical studies assessing local government performance in Latin America Analysing original administrative data from municipalities in the understudied countries of Brazil Chile Colombia Ecuador and Mexico Claudia N Avellaneda and contributors pose the titular question what works in Latin American municipalities

The Routledge Handbook of International Local Government Richard Kerley, Joyce Liddle, Pamela T. Dunning, 2018-09-13 The Routledge Handbook of International Local Government conducts a rigorous innovative and distinctive analysis of local government within a comparative international context Examining the subject matter with unrivalled breadth and depth this handbook shows how different cultures and countries develop different institutions structures and processes over time yet that all have some features in common the most obvious of which is the recognition that some decisions are better made some services better delivered and some engagement with the state better organised if there is structured organisational expression of the importance of the local dimension of all these factors Thematically organised it includes contributions from international experts with reference to the wider context in terms of geographies local government modes recent developments and possible further lines of research It has a wide academic appeal internationally and will steer a course between the two dimensions of mono jurisdictional studies and cataloguing forms of comparison The Routledge Handbook of International Local Government will be essential reading and an authoritative reference for scholars students researchers and practitioners involved in and actively concerned about research on local government

The Forum of Federations Handbook on Local Government in Federal Systems Nico Steytler, 2024-02-19 This book brings together leading scholars and practitioners from around the globe to examine the current roles of and future trends in local government structures and mechanisms in 16 different federal and federal type countries In doing so this volume explores pressing topics such as the institutions of local government constitutional recognition financial management intergovernmental relations political culture and the impact of the COVID 19 pandemic on the role of local government in federal systems Contributors to this volume provide a timely and comprehensive account of the integral role local governments play in federal countries and

offer fascinating perspectives on how these roles may change as individual federal systems evolve These individual analyses are contextualized in a comparative perspective in order to gain a holistic understanding of the challenges and opportunities of various local government dynamics in different regions around the world This is an open access book **Capital City Politics in Latin America** David J. Myers, Henry A. Dietz, 2002 As Latin America's new democratic regimes have decentralized the region's capital cities and their elected mayors have gained increasing importance Capital City Politics in Latin America tells the story of these cities how they are changing operationally how the empowerment of mayors and other municipal institutions is exacerbating political tensions between local executives and regional and national entities and how the cities' growing significance affects traditional political patterns throughout society The authors weave a tapestry that illustrates the impact of local, national and transnational power relations on the strategies available to Latin America's capital city mayors as they seek to transform their greater influence into desired actions The Structure of Local Governments Throughout the World Samuel Humes, 2013-11-11 1 The purpose The purpose of this study is to gain an insight into and make an introductory comparison of the structure of local government in many countries throughout the world More specifically the aim is to define and describe in a comparative fashion the various organs of local government and their relationships The need for as well as the obstacles encountered in such a survey are perhaps equally obvious It is said that he who understands only his own language knows none It may just as easily be contended that he who understands only his own governmental institutions knows none Governmental comparisons are useful not only to find out how others are governed but also to more fully comprehend the role which one's own governmental institutions play 1 From a pragmatic point of view there is a still further value in making comparisons of local governments Local government institutions are constantly undergoing changes The changes are both formal and informal they may be evolutionary and revolutionary A comparative study of local government can help many countries to take advantage of the experiments and experiences of others From the beginning of recorded history there are indications of man borrowing heavily from the institutions of his neighbour in organizing his own institutions In local government there are several examples of countries which have set up their local government systems by wholesale copying the model of another *Local Government in Central and Eastern Europe* Andrew Coulson, Adrian Campbell, 2007-08-02 Advocates of democratization in Central and Eastern Europe before 1989 placed great emphasis on community self government as the basis of civil society and democracy After the Velvet Revolutions of 1989 and the break up of the Soviet Union in 1991 the new states created an elected local government whereby cities, towns and villages elected the

Improving Local Government Michiel S. de Vries, P. Reddy, M. Haque, 2008-04-09 Local governments encounter many problems and although there is not one panacea that works internationally this book argues that there are mechanisms to improve local situations By drawing on case studies from the developing world the authors review best practices in good governance Local Governments and Rural Development Krister Andersson, Gustavo Gordillo, Frank van Laerhoven, 2009

Despite the recent economic upswing in many Latin American countries rural poverty rates in the region have actually increased during the past two decades Experts blame excessively centralized public administrations for the lackluster performance of public policy initiatives In response decentralization reforms have become a common government strategy for improving public sector performance in rural areas The effect of these reforms is a topic of considerable debate among government officials policy scholars and citizens groups This book offers a systematic analysis of how local governments and farmer groups in Latin America are actually faring today Based on interviews with more than 1 200 mayors local officials and farmers in 390 municipal territories in four Latin American nations the authors analyze the ways in which different forms of decentralization affect the governance arrangements for rural development on the ground Their comparative analysis suggests that rural development outcomes are systemically linked to locally negotiated institutional arrangements formal and informal between government officials NGOs and farmer groups that operate in the local sphere They find that local government actors contribute to public services that better assist the rural poor when local actors cooperate to develop their own institutional arrangements for participatory planning horizontal learning and the joint production of services This study brings substantive data and empirical analysis to a discussion that has until now more often depended on qualitative research in isolated cases With more than 60 percent of Latin America s rural population living in poverty the results are both timely and crucial

Metropolitan Governance in Latin America Alejandra Trejo Nieto, Jose L. Niño Amézquita, 2021-11-29 This book represents a powerful analysis of the challenges of metropolitan governance in all its messiness and complexity It examines Latin American metropolitan governance by focusing on the issue of public service provision and comparatively examining five of the largest and most complex urban agglomerations in the region Buenos Aires Bogota Lima Mexico City and Santiago The volume identifies and discusses the most pressing challenges associated with metropolitan coordination and the coverage quality and financial sustainability of service delivery It also reveals a number of spatial inequalities associated with inadequate provision which may perpetuate poverty and other inequalities Metropolitan Governance in Latin America will be valuable reading for advanced students researchers and policymakers tackling themes of urban planning spatial inequality public service provision and Latin American urban development

Decentralized Development in Latin America Paul Lindert, Otto Verkoren, 2010-03-02 Much of the scholarly and professional literature on development focuses either on the macro level of national policies and politics or on the micro level of development projects and household or community socio economic dynamics By contrast this collection pitches itself at the meso level with a comparative exploration of the ways in which local institutions municipalities local governments city authorities civil society networks and others have demanded and taken on a greater role in planning and managing development in the Latin American region The book s rich empirical studies reveal that local institutions have engaged upwards with central authorities to shape their policy and resource environments and in turn been pressured from below by local actors contesting the ways in which the

structures and processes of local governance are framed. The examples covered in this volume range from global cities such as Mexico and Santiago to remote rural areas of the Bolivian and Brazilian Amazon. As a result, the book provides a deep understanding of the diversity and complexity of local governance and local development in Latin America while avoiding the stereotyped claims about the impact of globalisation or the potential benefits of decentralisation as frequently stated in less empirically grounded analysis.

Innovations and Risk Taking Tim Campbell, 1997-01-01. Annotation: World Bank Discussion Paper No 357. Decentralization and democratization in the Latin America and the Caribbean region have produced a wave of innovations on the local government level: upgrading professional staffs, raising taxes and user fees, delivering better services and mobilizing participation in public choice making. This paper documents five cases of best practices at the local level, focusing on innovations in Mendoza, Argentina; Curitiba, Brazil; Cali, Colombia; Manizales, Colombia; and Tijuana, Mexico. The central message of the paper is that by supporting creation and adoption of best practice, donors can enjoy a cost-effective impact in achieving the next stages of reform in the region, but that work must be done at the local level.

Basic Services for All in an Urbanizing World United Cities and Local Governments, 2014-07-25. UCLG's Third Global Report on Local Democracy and Decentralization. GOLD III examines basic service provision and the current state of play of the local governance of basic services around the world. Basic Services for All in an Urbanizing World examines the enormous challenge of ensuring the universal provision of basic services in a world that is being shaped by rapid global urbanization, climate change, and economic, social, and technological transformation. The world's urban population is predicted to reach 5 billion people within the next 20-30 years. The report analyses the conditions necessary for local governments to provide these new urban residents with quality basic services. Water, sanitation, waste management, transport, and energy are essential not only for the preservation of human life and dignity but also in driving economic growth and ensuring social equality. Each chapter examines a world region, drawing on existing research and consultation with local authorities on the ground. The chapters review access, levels, legal and institutional frameworks, and the different ways in which basic services are managed and financed, as well as showcasing diverse examples of innovation in the local and multi-level governance of services. It concludes with a set of recommendations for all stakeholders with a view to making the goal of basic services for all a reality. This report contributes to discussions on the Millennium Development Goals and the UN Post 2015 Development Agenda. The findings of GOLD III will also be essential to promoting the vision of local governments at the 2016 UN Conference on Human
