Locating Privacy In Tudor London:

Locating Privacy in Tudor London Lena Cowen Orlin, 2007-12-13 Locating Privacy in Tudor London asks new questions about where private life was lived in the early modern period about where evidence of it has been preserved and about how progressive and coherent its history can be said to have been The Renaissance and the Reformation are generally taken to have produced significant advances in individuality subjectivity and interiority especially among the elite but this study of middling sort culture shows privacy to have been an object of suspicion of competing priorities and of compulsory betrayals The institutional archives of civic governance livery companies parish churches and ecclesiastical courts reveal the degree to which society organized itself around principles of preventing privacy as a condition of order Also represented in the discussion are such material artefacts as domestic buildings and household furnishings which were routinely experienced as collective and monitory agents rather than spheres of exclusivity and self expression In everyday life it is argued economic motivations were of more urgent concern than the political paradigms that have usually informed our understanding of the Renaissance Locating Privacy pursues the case study of Alice Barnham 1523 1604 a previously unknown merchant class woman subject of one of the earliest family group paintings from England Her story is touched by many of the changes in social structure religion the built environment the spread of literacy and the history of privacy that define the sixteenth century The book is of interest to literary social cultural and architectural historians to historians of the Reformation and of London and to historians of gender and women s studies

the historical roots of the phenomenon becomes more and more necessary to navigate our contemporary struggles with availability and control of personal information. When we ponder what people of the past valued and aimed to protect and what they considered threatening and needing uncovering, we achieve a broader perspective of the importance of privacy in everyday life. The early modern period in particular was a period in which many views and experiences of privacy were negotiated and consolidated into more recognisable feelings and norms in different layers of society. This volume will focus on Saxony as it is a great example to explore how privacy was created and negotiated in the early modern period. Throughout the sixteenth century, Saxony rose to prominence in the broader European context through the influence of its Electors. Saxony is an emblematic context to explore notions of privacy in the early modern period as the region underwent a range of transformations: religious, political, legal, and cultural, that reconfigured the thresholds between the private and the public. The main goals of this volume are to put Saxony on the map of early modern studies of privacy by bringing forth the region's contribution to political, cultural, scientific, religious, and legal developments; to challenge preconceived notions of privacy in the early modern German context by providing new analytical tools to analyse both well-known and novel sources; to inaugurate and instigate further the research of early modern privacy in regional studies.

Beyond Boundaries Linda Phyllis Austern, Candace Bailey, Amanda Eubanks Winkler, 2017-02-13. English music studies often apply rigid classifications to musical materials: their uses, their consumers, and their performers. The contributors to this volume argue that some performers and manuscripts from the early modern era defy conventional categorization as amateur or professional, native or foreign. These leading scholars explore the circulation of music and performers in early modern England, reconsidering previously held ideas about the boundaries between locations of musical performance and practice.

The Handbook of Privacy Studies Bart Sloot, Aviva Groot, 2025-10-01. The Handbook of Privacy Studies is the first book in the world that brings together several disciplinary perspectives on privacy, such as the legal, ethical, medical, informatics, and anthropological perspective. Privacy is in the news almost every day: mass surveillance by intelligence agencies, the use of social media data for commercial profit and political microtargeting, password hacks, and identity theft. New data protection regimes, questionable reuse of medical data, and concerns about how algorithms shape the way we think and decide. This book offers interdisciplinary background information about these developments and explains how to understand and properly evaluate them. The book is set up for use in interdisciplinary educational programmes. Each chapter provides a structured analysis of the role of privacy within that discipline, its characteristics, themes, and debates, as well as current challenges. Disciplinary approaches are presented in such a way that students and researchers from every scientific background can follow the argumentation and enrich their own understanding of privacy issues.

Notions of Privacy at Early Modern European Courts Dustin M. Neighbors, Lars Cyril Nørgaard, Elena Woodacre, 2025-10-01 Grand extravagant magnificent scandalous corrupt political personal fractious these are terms often associated with the medieval and early modern courts Moreover the court constituted a forceful nexus in the social world which was central to the legitimacy and authority of rulership As such courts shaped European politics and culture architecture art fashion patronage and cultural exchanges were integral to the spectacle of European courts Researchers have convincingly emphasised the public nature of courtly events procedures and ceremonies Nevertheless court life also involved pockets of privacy which have yet to be systematically addressed This edited collection addresses this lacuna and offers interpretations that urge us to reassess the public nature of European courts Thus the proposed publication will fertilise the grounds for a discussion of the past and future of court studies Indeed the contributions make us reconsider present day understandings of privacy as a stable and uncontested notion

At Home in Renaissance Bruges Julie De Groot, 2022-03-29 Domestic materiality in a remarkable European city How did citizens in Bruges create a home What did an ordinary domestic interior look like in the sixteenth century And more importantly how does one study the domestic culture of bygone times by analysing documents such as probate inventories These questions seem straightforward yet few endeavours are more challenging than reconstructing a sixteenth century domestic reality from written sources This book takes full advantage of the inventory and convincingly frames household objects in their original context of use Meticulously connecting objects people and domestic spaces the book introduces the reader to the rich material world of Bruges citizens in the Renaissance their sensory engagement their religious practice the role of women and other social factors By weaving insights from material culture studies with urban history At Home in Renaissance Bruges offers an appealing and holistic mixture of in depth socio economic cultural and material analysis In its approach the book

Tracing Private Conversations in Early Modern Europe Johannes Ljungberg, Natacha Klein Käfer, 2024-03-01 This open access book provides a multifold exploration of how people in early modern Europe understood conducted and actively used private conversations From sharing personal matters to discussing delicate secrets all layers of early modern society had their motives for wanting to keep certain exchanges out of public eyes and ears and ways of trying to achieve this Detecting such instances in historical sources typically becomes a complex pursuit full of subtle references that require creative approaches especially when it comes to more informal practices Yet in a reading against the grain different sources can offer us hints of how conversations took place in private The book consists of a historiographical and methodological introduction to the study of private conversations followed by ten case studies from a variety of cities villages and countryside across early modern Europe The concluding epilogue suggests some pathways to further explore the terrain of how people have talked in private in past societies *From the Margins to the Centre in Seventeenth-Century England* Angela McShane, Tim Reinke-Williams, 2025-05-20 Collection of essays showcasing how one of the greatest historians of seventeenth century England has shaped and continues to influence the direction of studies in early modern society culture and belief This collection of essays showcases how over an illustrious career spanning more than fifty years Professor Bernard Capp FBA has shaped and continues to influence the direction of studies in early modern English social and cultural history Initially influenced by the historiographical agendas set in the 1960s by Christopher Hill and Sir Keith Thomas over the last five decades Capp has produced important studies of religious radicalism print culture gender and sibling relations the culture wars of the 1650s and the maritime world Collectively this body of work enabled him not only to recover the experiences of the marginalised but also to highlight the importance of topics previously deemed at best of marginal interest to historians of seventeenth century England The contributions to this volume produced by a new generation of historians whose doctoral work Capp supervised and examined are similarly wide ranging and innovative Engaging in dialogue with Capp's work as well as those he has been in dialogue with himself the authors provide novel studies of hermits sailors and surgeons as well as shedding fresh light on topics such as the politics of the parish the lives of plebeian women men's emotions and the cultural worlds of Jane Shore and John Taylor the Water Poet Like Capp the authors use evidence from legal records life writings and cheap printed texts to recover marginalised voices and reconstruct the everyday lives of those overlooked and

misunderstood by their contemporaries and by historians. By doing so they demonstrate how one of the greatest historians of seventeenth century England continues to inspire the production of innovative studies of early modern society, culture, and belief.

Botanical Poetics Jessica Rosenberg, 2022-10-25 During the middle years of Queen Elizabeth's reign the number of books published with titles that described themselves as flowers, gardens, or forests more than tripled. During those same years English printers turned out scores of instructional manuals on gardening and husbandry, retailing useful knowledge to a growing class of literate landowners and pleasure gardeners. Both trends, Jessica Rosenberg shows, reflected a distinctive style of early modern plant thinking, one that understood both plants and poems as composites of small pieces, slips, or seeds to be recirculated by readers and planters. *Botanical Poetics* brings together studies of ecology, science, literary form, and the material text to explore how these developments transformed early modern conceptions of nature, poetic language, and the printed book. Drawing on little studied titles in horticulture and popular print alongside poetry by Shakespeare, Spenser, and others, Rosenberg reveals how early modern print used a botanical idiom to anticipate histories of its own reading and reception, whether through replanting, uprooting, or fantasies of common property and proliferation. While our conventional narratives of English literary culture in this period see reading as an increasingly private practice and literary production as more and more of an authorial domain, *Botanical Poetics* uncovers an alternate tradition of commonplaces and common ground of slips of herbs and poetry circulated, shared, and multiplied.

Cultural Histories of Noise, Sound and Listening in Europe, 1300-1918 Kirsten Gibson, Ian Biddle, 2016-11-18 *Cultural Histories of Noise, Sound and Listening in Europe, 1300-1918* presents a range of historical case studies on the sounding worlds of the European past. The chapters in this volume explore ways of thinking about sound historically and seek to understand how people have understood and negotiated their relationships with the sounding world in Europe from the Middle Ages through to the early twentieth century. They consider in particular sound and music in the later Middle Ages, the politics of sound in the early modern period, the history of the body and perception during the Ancien Régime, and the sounds of the city in the nineteenth century and sound and colonial rule at the fin de siècle. The case studies also range in geographical orientation to include considerations not only of Britain and France, the countries most considered in European historical sound studies in English language scholarship to date, but also Bosnia, Herzegovina, British Colonial India, Germany, Italy, and Portugal. Out of this diverse group of case studies emerge significant themes that recur, time and again, varying according to time and place: sound, power, and identity; sound as a marker of power or violence; and sound, physiology, and sensory perception, and technologies of sound, consumption, and meaning.
