Vought's F7U Cutlass was inspired by design data retrieved from Germany's Arado Company at the end of WWII. To avoid extreme nose down forces the Cutlass was a tailless aircraft. Its swept wings had vertical fins and aileron control surfaces. Although intended to operate at up to Mach 0.95 the aircraft was hampered by underpowered Westinghouse turbojets and its nose up profile made carrier landings dangerous. Although its in-flight performance was acceptable the Navy initially rejected the plane as unfit for carrier use. While nearly 200 F7U-3s were eventually delivered they were retired only five years after their introduction. Originally printed by the U.S. Navy this F7U-3 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified Restricted it was recently declassified and is here reprinted in book form. This facsimile has been reformatted. Care has been taken however to preserve the integrity of the text. *Operator's, Organizational, DS, and GS Maintenance Manual Including Repair Parts and Special Tools List*, 1973
