**Sanitation, Latrines and Intestinal Parasites in Past Populations** Piers D. Mitchell, 2016-03-03 Sanitation and intestinal health is something we often take for granted today. However, people living in many regions of the developing world still suffer with debilitating diseases due to the lack of sanitation. Despite its clear impact upon health in modern times, sanitation in past populations is a topic that has received surprisingly little attention. This book brings together key experts from around the world to explore fascinating aspects of life in the past relevant to sanitation and how that affected our ancestors. By its end, readers will realize that toilets were in use in ancient Mesopotamia even before the invention of writing and that flushing toilets with anatomic seats were a technology of ancient Greece at the time of the Minotaur myth. They will see how sanitation compared in ancient Rome and medieval London and will take a virtual walk around the sanitation of York at the time of the Vikings. Readers will also understand which intestinal parasites infected humans in different regions of the world over different time periods, what these parasites tell us about early human evolution, later population migrations, past diet, lifestyle, and the effects of sanitation technology. There is good evidence that over the millennia, people in the past realized that sanitation mattered. They invented toilets, cleaner water supplies, drains, waste disposal, and sanitation legislation. While past views on sanitation were very different to those of today, it is clear that many past societies took sanitation much more seriously than was previously thought.

**Afterlives of Abandoned Work** Matthew Harle, 2018-12-27 *Afterlives of Abandoned Work* considers the relevance of unfinished projects to literary history and criticism, looking beyond famous posthumous work to investigate the abandoned everyday, from scrapped plans and rejected ideas to half-written novels or unfinished artistic works. It traces how the reading of abandoned creative endeavor, whether arriving in the form of a rejection letter, a disagreement with a collaborator, or the simple act of walking away from one's desk, can change the way we think about cultural production, the creative process, and the intellectual construction of everyday life. Over five distinct journeys through a variety of archives, from major research libraries to the unique collections of individual enthusiasts, Matthew Harle draws surprising connections between literary studies, media studies, and visual arts, exploring unfinished projects from Thomas Pynchon, Muriel Spark, B. S. Johnson, Harold Pinter, and others. Rooted in literary criticism, *Afterlives of Abandoned Work* reads unbuilt buildings, unfilmed screenplays, and unpublished novels and radio sketches as forms of text that can help us consider the enduring fragmentation and anecdotal construction of cultural form, as well as expand literary criticism's approach to the archive.

**The Surprising Design of Market Economies** Alex Marshall, 2012-09-01 The free market has been a hot topic of debate for decades. Proponents tout it as a cure-all for just about everything that ails modern society, while opponents blame it for the very same ills. But the heated rhetoric obscures one very important, indeed fundamental, fact: markets don't just run themselves; we create them. Starting from this surprisingly simple yet often ignored or misunderstood fact, Alex Marshall takes us on a fascinating tour of the fundamentals that shape markets and, through them, our daily economic lives. He debunks the myth of the free market, showing how markets could not exist without governments.

to create the structures through which we assert ownership of property real and intellectual and conduct business of all kinds Marshall also takes a wide ranging look at many other structures that make markets possible including physical infrastructure ranging from roads and railroads to water systems and power lines mental and cultural structures such as common languages and bodies of knowledge and the international structures that allow goods services cash bytes and bits to flow freely around the globe Sure to stimulate a lively public conversation about the design of markets this broadly accessible overview of how a market economy is constructed will help us create markets that are fairer more prosperous more creative and more beautiful *London Travellers Guide* Berlitz Guides,1993-12 **Cedric Price: Potteries Thinkbelt** Kester Rattenbury,Samantha Hardingham,2020-08-13 The Supercrit series revisits some of the most influential architectural projects of the recent past and examines their impact on the way we think and design today Based on live studio debates between protagonists and critics the books describe explore and criticise these major projects This first book in the unprecedented series examines Cedric Price s groundbreaking Potteries Thinkbelt project from the 1960s an innovative high tech educational facility in the North Staffordshire Potteries Highly illustrated and with contemporary criticism this is a book not to be missed In Cedric Price Potteries Thinkbelt you can hear the architect s project definition see the drawings and join in the crit This innovative and compelling book is an invaluable resource for any architecture student **Images of Fear** Martin Tropp,1999-11-15 On the Western Front in World War I a generation faced a horrifying reality that ushered in the modern age But in the previous century many of the fears we still face were first given form in the pages of popular fiction Books such as Frankenstein Dr Jekyll and Mr Hyde and Dracula became modern myths because they gave people a safe way to confront modern fears also taking shape at that time By looking at such varied subjects as Victorian architecture urban crime women s rights and the impact of new technology we can come to understand the peculiar relationship between horror in literature and the horror of daily life World War I made it clear that the images of horror in popular fiction had not been an escape from the world around us but a way of seeing deeper into it as well as revealing the shape of things to come
