Londons Contemporary Architecture:

Guide to London's Contemporary Architecture Kenneth Allinson, Victoria Thornton, 2014-05-12 *Guide to London's Contemporary Architecture* provides a guide to the wealth of architecture completed in London. The book first offers information on the buildings located in the City of London and the Docklands. These include the Broadgate Complex, Alban Gate, Bracken House, Whitechapel Art Gallery, Queen Street offices, Girozentrale Vienna, Minster Court, Billingsgate Securities Market, Canary Wharf Financial Times, Printing Works, Isle of Dogs Neighborhood Center, Reuters Technical Services Centre and the David Mellor building. The publication examines the structures found in the East End, West End and north London. Discussions focus on Sainsbury Wing, National Gallery, Sackler Gallery, Queen Elizabeth II Conference Center, Richmond House, Clore Gallery, Lauriston Studios, Leyton Fire Station, Lisson Bell Street galleries, Lisson Grove offices and flats, Sainsbury supermarket and housing, Crowndale Centre, Nightingale house and the Bisterne Avenue apartments. The text takes a look at the edifices located in west London including Richmond Riverside, Sterling Hilton Hotel, Thames Wharf Studios, St Mary's Church, Barnes Metropolis Studios and the Fowler Jestic house. The publication is a dependable reference for architects and design engineers interested in the architecture of London.

London's Contemporary Architecture Kenneth Allinson, Victoria Thornton, 2014 First edition published 1994 by

Architectural Press Elsevier **London's Contemporary Architecture** Kenneth Allinson, Victoria Thornton, 2000 The second edition of this guide has been updated to cover the best and most interesting buildings completed in London during the period 1984-1997. It covers over 130 buildings and is supported by photographs, line diagrams and maps **London's Contemporary Architecture** Kenneth Allinson, 2009 This fifth edition is up to date with the best and most interesting architecture of London from the early 1980s right up to the first years of a new millennium for the city. As the book is logically arranged by geographical area, the reader is led on a tour around the sites most worth visiting London's Contemporary Architecture + Kenneth Allinson, 2007 **The Architects and Architecture of London** Kenneth Allinson, 2008 The guide explains why London is the way it is. It helps you link the historical and contemporary into a single pattern of significant places, spaces and buildings. It highlights old and new as a lively and vibrant pattern of on-going creative activity rooted in established urban patterns *New City* Alec Forshaw, 2013 Explores the large-scale redevelopment of the City of London since the mid-1980s **London's 'Big Bang' Moment and its Architectural Conversations** Stephen Rosser, 2025-06-30 This book explores the topic of architecture as a component of public discourse focussing on the reception of four high-profile developments in the City of London: the UK capital's financial district dating from the final years of the twentieth century. During this time, the City's mode of operation, culture and built environment were all transformed as a result of the market deregulation process labelled 'Big Bang'. It was also a period which saw the subject of architecture attracting public and media attention, becoming a prominent feature of national conversation. The book examines the extensive and often contentious discourse generated by the four case study projects. It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City's long and rich history. Topics explored include building and urban form on the eve of the millennium, the place of new development in a setting of unique historic importance, the iconic building and celebrity architect, and the role of then Prince Charles as an architectural critic. Also referenced are many of the broader issues of the day, including the Thatcher government policies and the preoccupations concerning London's infrastructure, public realm, inner city areas and inequalities. Furthermore, ranging across the discourse is the theme of the relationship between buildings and global finance, foreshadowing later controversies concerning London's post-millennial towers and their impact on the capital's skyline. The book will be of interest to researchers and students of late twentieth-century British architecture and urban development, London's history and UK public discourse in the 1980s, a decade of profound political, economic and social change **London Docklands** Brian C. Edwards, 2013-10-22 *London Docklands: Urban Design in an Age of Deregulation* discusses the process and products of the first 10 years of the London Docklands. The book is comprised of 10 chapters that are organized into three parts. The first part talks about the potentials of the London Docklands. The second part presents the area of studies which are the Isle of Dogs, Surrey Docks, Wapping and the Royal Docks. The last part deals with the observations and speculations. The text will be a

great source to urban planners particularly those who are involved in projects that deal with cities that are in close proximity to large bodies of water

This research considers how Tate Modern generated a set of new debates and what this might mean for the future role of the public museum and gallery Towards Tate Modern will be of particular interest to academics and students art practitioners and policy makers working in the fields of museum studies policy studies cultural studies urban studies and political and economic history as well as those involved in archival research It will also engage those wishing to widen their understanding of how an institution such as Tate Modern was created *London's Environment: Prospects For A Sustainable World City*

Julian Hunt, 2005-05-06 This comprehensive volume opens with an introductory editorial giving a general review of London's environment and its prospects for a sustainable future The subsequent chapters are written by experts on architecture planning air pollution biodiversity transport rivers parks aesthetic aspects of London's landscape politics health and economics The highly topical material authoritatively describes the major recent developments that have greatly affected London's environment and in some ways have set the city on a path towards a more sustainable future This progress includes changes in the law GLA act politics adopting sustainability as a political goal policies on waste disposal no more landfills housing areas building development e.g. Canary Wharf traffic management congestion charges policies for enhancing biodiversity transport infrastructure cars railways and managing the risk of floods and other disasters in response to climate change The book shows how these policies and practical developments interact and therefore need to be understood by considering them as a whole A postscript by the Deputy Mayor of London Nicky Gavron is included summarising London's environmental policies that have been developed since the conference on London Environment and Future was held on September 18-19 2002 **The Complex City: Social and Built Approaches and Methods** Caroline

Donnellan, 2022-10-31 The Complex City Social and Built Approaches and Methods explores different ways of understanding the city The social city approach proceeds from the ground up it focuses on human interactions shaped by economic and environmental processes The built city method looks through a top-down lens examining policy and planning for buildings and infrastructure including utilities and energy networks This volume is different from other city anthologies in that it explores them through their differences by presenting each chapter in one of the two categories While there is invariably an overlap between the two areas they are distinct positions In doing so the book identifies how despite their often adversarial approaches they both belong to the same city As essential components of the city they should not necessarily be resolved as it is in this friction where creativity and innovation happens The Complex City Social and Built Approaches and Methods is concerned about the ideas and solutions that they both offer The book's originality stems from this duality and from its recognition that cities are living organic protean places of opportunity crisis conflict and challenge The chapters demonstrate the complexity of cities as a set of ideas concerning what they engender how they function and why they continue to act as a catalyst for different kinds of human activity They explore issues of socio-political import and questions of the city as a physically constructed space The themes are diverse and include the inception of the city as a place of competition to centres

of regeneration and urban withdrawal They cover a range of city and urban regions from Athens to Wellington from site specific singular perspectives to comparative assessments The questions they raise include how do we inhabit urban areas how do we make plans for them and how do we at times ignore them entirely **Insight Guides: London City Guide** Insight Guides,2014-04-01 One of the most exciting and dynamic world cities London is an extraordinary megalopolis packed with both historic and cutting edge attractions Whether you want to view the city from the London Eye explore its many parks or browse the Sunday markets Insight City Guide London will make sure you have the quintessential London experience Features by local writers delve into topics including royalty shopping and Parliament while evocative accounts of the city s districts bring London to life from buzzy Soho and the South Bank s theatrical landmarks to Kensington s great museums and the vibrant East End Full colour photography and maps help you navigate with ease and our detailed Travel Tips give you all the practical information you need to plan your trip including our selection of the best and most authentic hotels and restaurants Fodor's London 2010 Fodor's Travel Publications, Inc.
