Tasting Tourism: Travelling for Food and Drink Priscilla Boniface, 2017-03-02 Along with basic practical reasons our practices concerning food and drink are driven by context and environment belief and convention aspiration and desire to display in short by culture Similarly culture guides how tourism is used and operates This book examines food and drink tourism as it is now and is likely to develop through a cultural lens It asks what is food and drink tourism and why have food and drink provisions and information points become tourist destinations in their own right rather than remaining among a number of tourism features and components While it offers a range of international examples the main focus is on food and drink tourism in the UK What with the current diversification of tourism in rural areas the increased popularity of this type of tourism in the UK the series of BSE vCJD and foot and mouth crises in British food production and the cultural and ethnic fusion in British towns and cities it makes a particularly rich place in which to explore this subject The author concludes that the future of food and drink tourism lies in diversity and distinctiveness In an era of globalisation there is a particular desire to enjoy varied rather than mono cultural ambiance and experience She also notes that there is an immediacy of gratification in food and drink consumption which has become a general requirement of contemporary society
