Long Now Manual For Civilization:

When We Are No More Abby Smith Rumsey, 2016-03-01 Our memory gives the human species a unique evolutionary advantage Our stories ideas and innovations in a word our culture can be recorded and passed on to future generations Our enduring culture and restless curiosity have enabled us to invent powerful information technologies that give us invaluable perspective on our past and define our future Today we stand at the very edge of a vast uncharted digital landscape where our collective memory is stored in ephemeral bits and bytes and lives in air conditioned server rooms What sources will historians turn to in 100 let alone 1 000 years to understand our own time if all of our memory lives in digital codes that may no longer be decipherable In *When We Are No More* Abby Smith Rumsey explores human memory from pre history to the present to shed light on the grand challenge facing our world the abundance of information and scarcity of human attention Tracing the story from cuneiform tablets and papyrus scrolls to movable type books and the birth of the Library of Congress Rumsey weaves a compelling narrative that explores how humans have dealt with the problem of too much information throughout our history and indeed how we might begin solve the same problem for our digital future Serving as a call to consciousness *When We Are No More* explains why data storage is not memory why forgetting is the first step towards remembering and above all why memory is about the future not the past If we re thinking 1 000 years 3 000 years ahead in the future we have to ask ourselves how do we preserve all the bits that we need in order to correctly interpret the digital objects we create We are nonchalantly throwing all of our data into what could become an information black hole without realizing it Vint Cerf Chief Evangelist at Google at a press conference in February 2015

Death Glitch Tamara Kneese, 2023-08-15 An accessible yet erudite deep dive into how platforms are remaking experiences of death Since the internet s earliest days people have died and mourned online In quiet corners of past iterations of the web the dead linger But attempts at preserving the data of the dead are often ill fated for websites and devices decay and die just as people do Death disrupts technologists plans for platforms It reveals how digital production is always collaborative undermining the entrepreneurial platform economy and highlighting the flaws of techno solutionism Big Tech has authority not only over people s lives but over their experiences of death as well Ordinary users and workers though advocate for changes to tech companies policies around death Drawing on internet histories along with interviews with founders of digital afterlife startups caretakers of illness blogs and transhumanist tinkerers the technology scholar Tamara Kneese takes readers on a vibrant tour of the ways that platforms and people work together to care for digital remains What happens when commercial platforms encounter the messiness of mortality
