

LOOK UP!

A stylized illustration of a woman, Henrietta Leavitt, in profile, looking up at a night sky. She is wearing a dark, long-sleeved dress with a white collar and a white shawl draped over her shoulders. The sky is a deep blue, filled with various celestial objects: large, glowing green and blue nebulae, smaller red and orange nebulae, and several bright stars with white light and blue halos. In the background, a dark, silhouetted house with a chimney and a small porch is visible on a hill. The overall style is reminiscent of mid-20th-century children's book illustrations.

*HENRIETTA LEAVITT,
PIONEERING WOMAN
ASTRONOMER*

ROBERT BURLEIGH

Illustrated by RAÚL COLÓN

Look Up Henrietta Leavitt Pioneering Woman Astronomer:

Look Up! Robert Burleigh, 2013-02-19 Henrietta Levitt was the first person to discover the scientific importance of a star's brightness so why has no one heard of her Learn all about a female pioneer of astronomy in this picture book biography with audio Henrietta Swan Leavitt was born on July 4 1868 and she changed the course of astronomy when she was just twenty five years old Henrietta spent years measuring star positions and sizes from photographs taken by the telescope at the Harvard College Observatory where she worked After Henrietta observed that certain stars had a fixed pattern to their changes her discovery made it possible for astronomers to measure greater and greater distances leading to our present understanding of the vast size of the universe An astronomer of her time called Henrietta Leavitt one of the most important women ever to touch astronomy and another close associate said she had the best mind at the Harvard Observatory Henrietta Leavitt's story will inspire young women and aspiring scientists of all kinds and includes additional information about the solar system and astronomy This eBook edition also includes audio accompaniment Look Up! Robert Burleigh, 2013 An illustrated portrait of astronomer Henrietta Swan Leavitt traces the years she spent measuring stars from her position at the Harvard College Observatory and her important discoveries that enabled the scientific community to gain a fuller understanding of the universe's vast size Look Up! Henrietta Leavitt, Pioneering Woman Astronomer - Spanish Great Minds PBS, 2022-03 *Inclusive Texts in Elementary Classrooms* Amy J. Heineke, Aimee Papola-Ellis, 2022 Put children's diverse experiences at the center of the curriculum with texts that promote their identity development literacy engagement and comprehension and learning across the content areas This practical text includes guidance for setting learning goals that align with relevant standards and curricular directives as well as classroom examples teaching strategies and reflective questions **Invisible Labour in Modern Science** Jenny Bangham, Xan Chacko, Judith Kaplan, 2022-09-01 Invisible Labour in Modern Science is about the people who are concealed eclipsed or anonymised in accounts of scientific research Many scientific workers including translators activists archivists technicians curators and ethics review boards are absent in publications and omitted from stories of discovery Scientific reports are often held to ideals of transparency yet they are the result of careful judgments about what and what not to reveal Professional scientists are often celebrated yet they are expected to uphold principles of objective self denial The emerging and leading scholars writing in this book negotiate such silences and omissions to reveal how invisibilities have shaped twentieth and twenty first century science Invisibility can be unjust it can also be powerful What is invisible to whom and when does this matter How do power structures built on hierarchies of race gender class and nation frame what can be seen And for those observing science When does the recovery of the invisible serve social justice and when does it invade privacy Tackling head on the silences and dilemmas that can haunt historians this book transforms invisibility into a guide for exploring the moral sensibilities and politics of science and its history **Creativity and Children's Literature** Marianne Saccardi, 2014-07-31 Today's students need to be able to do

more than score well on tests they must be creative thinkers and problem solvers The tools in this book will help teachers and parents start students on the path to becoming innovative successful individuals in the 21st century workforce The children in classrooms today will soon become adult members of society they will need to apply divergent thinking skills to be effective in all aspects of their lives regardless of their specific occupation How well your students meet complicated challenges and take advantage of the opportunities before them decades down the road will depend largely upon the kind of thinking they are trained and encouraged to do today This book provides a game plan for busy librarians and teachers to develop their students abilities to arrive at new ideas by utilizing children s books at hand Following an introduction in which the author defines divergent thinking discusses its characteristics and establishes its vital importance chapters dedicated to types of literature for children such as fantasy poetry and non fiction present specific titles and relevant activities geared to fostering divergent thinking in young minds Parents will find the recommendations of the kinds of books to read with their children and explanations of how to engage their children in conversations that will help their creative thinking skills extremely beneficial The book also includes a case study of a fourth grade class that applied the principles of divergent thinking to imagine innovative designs and come up with new ideas while studying a social studies science unit on ecology

10 Women Who Changed Science and the World Catherine Whitlock, Rhodri Evans, 2019-06-11 Spanning the nineteenth and twentieth centuries this fascinating history explores the lives and achievements of great women in science across the globe Ten Women Who Changed Science and the World tells the stories of trailblazing women who made a historic impact on physics biology chemistry astronomy and medicine Included in this volume are famous figures such as two time Nobel Prize winner Marie Curie as well as individuals whose names will be new to many though their breakthroughs were no less remarkable These women overcame significant obstacles discrimination and personal tragedies in their pursuit of scientific advancement They persevered in their research whether creating life saving drugs or expanding our knowledge of the cosmos By daring to ask How and Why each of these women made a positive impact on the world we live in today In this book you will learn about Astronomy Henrietta Leavitt United States 1868 1921 discovered the period luminosity relationship for Cepheid variable stars which enabled us to measure the size of our galaxy and the universe Physics Lise Meitner Austria 1878 1968 fled Nazi Germany in 1938 taking with her the experimental results which showed that she and Otto Hahn had split the nucleus and discovered nuclear fission Chien Shiung Wu United States 1912 1997 demonstrated that the widely accepted law of parity which stated that left spinning and right spinning subatomic particles would behave identically was wrong Chemistry Marie Curie France 1867 1934 became the only person in history to have won Nobel prizes in two different fields of science Dorothy Crowfoot Hodgkin United Kingdom 1910 1994 won the Nobel Prize for Chemistry in 1964 and pioneered the X ray study of large molecules of biochemical importance Medicine Virginia Apgar United States 1909 1974 invented the Apgar score used to quickly assess the health of newborn babies Gertrude Elion United States 1918 1999 won

the Nobel Prize for Physiology or Medicine in 1988 for her advances in drug development Biology Rita Levi Montalcini Italy 1909 2012 won the Nobel Prize for Physiology or Medicine in 1986 for her co discovery in 1954 of Nerve Growth Factor NGF Elsie Widdowson United Kingdom 1906 2000 pioneered the science of nutrition and helped devise the World War II food rationing program Rachel Carson United States 1907 1964 forged the environmental movement most famously with her influential book *Silent Spring*
