Loose Leaf Financial Accounting With Connect Access Card:

Loose Leaf Financial Accounting with Connect Access Card w/LearnSmart J. David Spiceland, Don Herrmann, Wayne M Thomas, 2013-05-08 The financial accounting course is taken by all business majors usually in their sophomore year Financial accounting reports summarize the financial health operating results and changes in financial status for a business as viewed over a specific period of time This information is used by outside parties such as stockholders creditors prospective investors regulatory agencies and the general public The financial accounting market can be segmented into three categories preparer traditional balanced and user innovative Spiceland Thomas Herrmann falls into the balanced segment by offering a balance between the user and preparer orientation The decision maker s perspective used throughout the book competes directly with Kimmel s pedagogical approach Financial Accounting has been revised based on the great success of Financial Accounting 2e Spiceland Thomas Herrmann The content was developed with feedback from over 480 reviewers and focus group participants from across the country The authors David Spiceland Wayne Thomas and Don Herrmann have developed a unique text based on over 50 collective years of experience in the classroom They ve brought together best practices like highlighting Common Mistakes offering frequent Let s Review exercises integrating the course with a running Continuing Problem demonstrating the relevance of the course to non majors with a Career Corner and communicating it all in a student friendly Conversational Writing Style

Loose Leaf Version of Fundamental Financial Accounting Concepts with Connect Access Card Philip Olds, Thomas Edmonds, Frances McNair, 2011-11-08 Students are often overwhelmed by the amount of information presented in the introductory financial accounting course By focusing on fundamental concepts in a logical sequence students are able to fully comprehend the material rather than memorize seemingly unrelated terms and topics The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given business event affects the financial statements The financial statements model is a highly praised feature because it allows students to visualize the simultaneous impact of business events on all of the key financial statements the income statement the balance sheet and the statement of cash flows

Loose Leaf Financial Accounting with Connect Access Card Patricia Libby, Daniel G Short, Robert Libby, 2013-05-08 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style pedagogy and design Libby Libby Short successfully implements a real world single focus company approach in every chapter Students and instructors have responded very favorably to the use of focus companies and the real world financial statements The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting Libby

Libby Short believes in the building block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

Loose-Leaf version Financial Accounting: Making the Connection with Connect Access Card J. David Spiceland, Don Herrmann, Wayne Thomas, 2012-01-09 Financial Accounting Making the Connection 1e has been developed based on the great success of Financial Accounting 2e. Spiceland Thomas Herrmann 2e was developed with feedback from over 330 reviewers and focus group participants from across the country. With the usage of digital resources growing exponentially and high Connect usage rates among instructors and students using Financial Accounting 2e, Financial Accounting Making the Connection 1e removes all end of chapter content from the 2e print text and houses it exclusively in Connect. The result is the same highly successful content contained in 2e without the added page length of end of chapter problems and exercises. Financial Accounting Making the Connection 1e also provides additional study materials and explanations through short tutorial videos and practice activities that can be accessed via SmartPhone by scanning the Quick Response codes in the margin. Just like with Financial Accounting 2e, the authors David Spiceland, Wayne Thomas, and Don Herrmann have developed a unique text based on over 50 collective years of experience in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem demonstrating the relevance of the course to non-majors with a Career Corner, and communicating it all in a student-friendly Conversational Writing Style.
