Ramsey Anne Reiber DeWindt, Edwin Brezette DeWindt, 2006 The people of Ramsey included clerics knights and laborers and their activities overlapped to the point that the infamous tripartite division of medieval society into those who prayed fought and worked becomes meaningless The book also crosses chronological boundaries moving through decades of rebellion plague demographic turnover violence bloodshed and war and ending with religious upheaval that spelled the death of the 600 year old abbey and the intrusion of an ambitious new lay landlord with courtly connections BOOK JACKET

Mapping the Medieval City Catherine A M Clarke, 2011-05-15 This ground breaking volume brings together contributions from scholars across a range of disciplines including literary studies history geography and archaeology to investigate questions of space place and identity in the medieval city Using Chester as a case study with attention to its location on the border between England and Wales its rich multi lingual culture and surviving material fabric the essays seek to recover the experience and understanding of the urban space by individuals and groups within the medieval city and to offer new readings from the vantage point of twenty first century disciplinary and theoretical perspectives The volume includes new interpretations of well known sources and features such as the Chester Whiston Plays and the city's Rows and

walls but also includes discussions of less studied material such as Lucian's *In Praise of Chester* one of the earliest examples of urban encomium from England and an important text for understanding the medieval city and the wealth of medieval Welsh poetry relating to Chester. Certain key themes emerge across the essays within this volume including relations between the Welsh and English formulations of centre and periphery, nation and region, different kinds of mapping and the visual and textual representation of place, borders and boundaries, uses of the past in the production of identity and the connections between discourses of gender and space. The volume seeks to generate conversation and debate amongst scholars of different disciplines working across different locations and periods and to open up directions for future work on space, place and identity in the medieval city.

Literature and class Andrew Hadfield, 2021-08-24 This book explores the intimate relationship between literature and class in England and later Britain from the Peasants' Revolt at the end of the fourteenth century to the impact of the French Revolution at the end of the eighteenth century and beginning of the nineteenth. The book argues throughout that class cannot be seen as a modern phenomenon that occurred after the Industrial Revolution but that class divisions and relations have always structured societies and that it makes sense to assume a historical continuity. The book explores a number of themes relating to class: class consciousness, class conflict, commercialisation, servitude, rebellion, gender relations and colonisation. After outlining the history of class relations, five chapters explore the ways in which social class consciously and unconsciously influenced a series of writers: Chaucer, Shakespeare, Behn, Rochester, Defoe, Dickens, Richardson, Burney, Blake and Wordsworth.

Lordship and Literature Elliot Kendall, 2008-05-08 In a sustained new reading of John Gower's major English poem *Confessio Amantis* (1390-3) Elliot Kendall shows how deeply the great household shaped the way Gower and his contemporaries including Chaucer, Langland, chroniclers and parliamentary petitioners imagined their world.

Contesting the Middle Ages John Aberth, 2018-10-03 *Contesting the Middle Ages* is a thorough exploration of recent arguments surrounding nine hotly debated topics: the decline and fall of Rome, the Viking invasions, the Crusades, the persecution of minorities, sexuality in the Middle Ages, women within medieval society, intellectual and environmental history, the Black Death and lastly the waning of the Middle Ages. The historiography of the Middle Ages, a term in itself controversial amongst medieval historians, has been continuously debated and rewritten for centuries. In each chapter John Aberth sets out key historiographical debates in an engaging and informative way, encouraging students to consider the process of writing about history and prompting them to ask questions even of already thoroughly debated subjects such as why the Roman Empire fell or what significance the Black Death had both in the late Middle Ages and beyond. Sparking discussion and inspiring examination of the past and its ongoing significance in modern life, *Contesting the Middle Ages* is essential reading for students of medieval history and historiography.
