Making Cities Work Prospects And Policies For Urban America:

Making Cities Work Robert P. Inman, 2009-01-05 Making Cities Work brings together leading writers and scholars on urban America to offer critical perspectives on how to sustain prosperous livable cities in today's fast evolving economy. Successful cities provide jobs, quality schools, safe and clean neighborhoods, effective transportation, and welcoming spaces for all residents. But cities must be managed well if they are to remain attractive places to work, relax, and raise a family; otherwise, residents, firms, and workers will leave, and the social and economic advantages of city living will be lost. Drawing on cutting edge research in the social sciences, the contributors explore optimal ways to manage the modern city and propose solutions to today's most pressing urban problems. Topics include the urban economy, transportation, housing, and open space; immigration; race; the impacts of poverty on children; education, crime, and financing; and managing services. The contributors show how to make cities work for diverse urban constituencies and why we still need cities despite the many challenges they pose. Making Cities Work brings the latest findings in urban economics to policymakers, researchers, and students, as well as anyone interested in urban affairs. In addition to the editor, the contributors are David Card, Philip J. Cook, Janet Currie, Edward L. Glaeser, Joseph Gyourko, Richard J. Murnane, Witold Rybczynski, Kenneth A. Small, and Jacob L. Vigdor. **The Oxford**

Handbook of Urban Economics and Planning Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2011-02-01 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning. The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship. Although economists were among the early contributors to the literature on urban planning, many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions, equity over efficiency, and normative prescriptions over positive analysis. Planners, meanwhile, even as they draw upon economic principles, often view the work of economists as abstract, not sensitive to institutional contexts, and communicated in a formal language spoken by few with decision making authority. Not surprisingly, papers in the leading economic journals rarely cite clearly pertinent papers in planning journals, and vice versa. Despite the historical divergence in perspectives and methods, urban economics and urban planning share an intense interest in many topic areas: the nature of cities, the prosperity of urban economies, the provision of urban services, efficient systems of transportation, and the proper allocation of land between urban and environmental uses. In bridging this gap, this book highlights the best scholarship in planning and economics that addresses the most pressing urban problems of our day and will stimulate further dialog between scholars in urban planning and urban economics. *Urban Models and Public-Private Partnership* Remo Dalla Longa, 2011-03-29 This book addresses the topic of urban models with reference to large western cities and particularly to global cities. In the current transitional phase, the use of language and the systematization of phenomena has become important. The book's matrix examines two important and strongly connected themes: urban models and public-private partnerships (PPP) determined by urban functions.

Local Redistribution and Local Democracy Clayton P. Gillette, 2011-06-28 The traditional theory of urban finance argues against local redistribution of wealth on the assumption that such action is likely to chase away the relatively wealthy leaving only the impoverished behind Nevertheless Clayton P Gillette observes local governments engage in substantial redistribution both to the wealthy and to the poor In this thoughtful book Gillette examines whether recent campaigns to enact living wage ordinances and other local redistributive programs represent gaps in the traditional theory or political opportunism He then investigates the role of the courts in distinguishing between these explanations The author argues that courts have greater capacity to review local programs than

is typically assumed He concludes that when a single interest group dominates the political process judicial intervention to determine a program's legal validity may be appropriate But if the political contest involves competing groups courts should defer to local political judgments *The Price of Paradise* David Dante Troutt, 2023-11-21 American communities are facing chronic problems fiscal stress urban decline environmental sprawl mass incarceration political isolation disproportionate foreclosures and severe public health risks In *The Price of Paradise* David Troutt argues that it is a lack of mutuality in our local decision making that has led to this looming crisis facing cities and local governments Arguing that there are structural flaws in the American dream Troutt investigates the role that place plays in our thinking and how we have organized our communities to create or deny opportunity Legal rules and policies that promoted mobility for most citizens simultaneously stifled and segregated a growing minority by race class and most importantly place A conversation about America at the crossroads *The Price of Paradise* is a multilayered exploration of the legal economic and cultural forces that contribute to the squeeze on the middle class the hidden dangers of growing income and wealth inequality and the literature on how growth and consumption patterns are environmentally unsustainable *Green Products* Joao Neiva de Figueiredo, Mauro F Guillen, 2011-07-12 Sharing successful examples of sustainable products from around the world *Green Products Perspectives on Innovation and Adoption* supplies an in depth analysis of the key factors that influence the adoption of sustainable products It examines case studies of green production and consumption from a business perspective considering both techno

Innovation Through Cooperation Georg Weiers, 2013-09-26 Many people have great ideas Without the necessary skills and means most never get to realize them If they could cooperate with competent firms and entrepreneurs together both could achieve much and this is increasingly happening Mechanisms are being established making a division of labour between inventors and implementers a reality This is changing the nature of innovation from an internal R D or purely entrepreneurial attempt to a more cooperative innovation An Idea Economy emerges where anyone has the possibility to profit from their ideas and everyone will benefit from more and better innovation This book presents us the emergence and structure of the Idea Economy by extending the seminal concepts of Entrepreneurial Society and Open Innovation Part I describes the big picture on how innovation is evolving where we are today and what an Idea Economy will look like Part II points the way forward discussing in detail on how cooperation in the

Migration and Forced Displacement - Vulnerability and Resilience - Volume 1 Samson Maekele Tsegay, 2024-11-06 Migration has been one of the contested topics among scholars and politicians throughout the world. Similarly, the experiences of refugees, asylum seekers, and migrants have been different as they are influenced by race, gender, class, and geographical location. This book explores the experiences of international migrants, including the challenges they face from nation states, environmental issues, and sociocultural factors. It consists of chapters that discuss the causes and effects of migration, the role of nation states, and the environment. Moreover, the book covers gender and family relations and the relationship of refugees and migrants with the host population and the socio-cultural and economic integration of migrants. Overall, the book argues that international migrants, particularly refugees and asylum seekers, are among the most vulnerable groups in the world. However, they use various strategies to overcome their vulnerability and become resilient in the face of adversity. Hence, the book contributes to increasing people's awareness of migration and the experiences of refugees, asylum seekers, and migrants. It can also be a significant source for initiating further debate and academic discussion on issues of migration and forced displacement, vulnerability, and resilience.

Shadows of Doubt Brendan O'Flaherty, Rajiv Sethi, 2019-04-15 Crime and punishment occur under extreme uncertainty. Offenders, victims, police, judges, and jurors make high-stakes decisions with limited information under severe time pressure. With compelling stories and data on how people act and react, O'Flaherty and Sethi reveal the extent to which we rely on stereotypes as shortcuts in our decision making.

Small Business and the City Rafael Gomez, Andre Isakov, Matthew Semansky, 2015-02-26 In *Small Business and the City*, Rafael Gomez, Andre Isakov, and Matt Semansky highlight the power of small-scale entrepreneurship to transform local neighbourhoods and the cities they inhabit. Studying the factors which enable small businesses to survive and thrive, they highlight the success of a Canadian concept which has spread worldwide: the Business Improvement Area (BIA). BIAs allow small-scale entrepreneurs to pool their resources with like-minded businesses, becoming sources of urban rejuvenation, magnets for human talent, and incubators for local innovation in cities around the globe. *Small Business and the City* also analyses the policies necessary to support this urban vitality, describing how cities can encourage and support locally owned independent businesses. An inspiring account of the dynamism of urban life, *Small Business and the City* introduces a new main street agenda for the twenty-first century city.

Tiger Economies Under Threat Shahid Yusuf, Kaoru Nabeshima, 2009-10-01 In recent years, growth rates in the so-called Tiger economies of Southeast Asia have been above the average, not only for developing countries but for the world as a whole. Yet they fall short of the economic growth experienced during 1975-95. The underlying worry for policy makers is that the decrease presages the beginning of a downward trend, a worry that has been sharpened by the global recession. But are the Tiger economies under threat? And if so, what are the causes and how can they be addressed? This book employs a comparative analysis of the Southeast Asian Tiger economies centered on Malaysia to tackle these questions. The findings

presented will be of particular interest to policy makers academics business people and researchers **URBAN SPRAWL**
